B. Use of Estimates

The preparation of financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policies

Premiums are earned over the terms of the related insurance policies and reinsurance contracts. Unearned premium reserves are established to cover the unexpired portion of premiums written. Such reserves are computed by pro rata methods for direct business and are based on reports received from ceding companies for reinsurance. Expenses incurred in connection with acquiring new insurance business, including such acquisition cost as sales commissions, are charged to operations as incurred. Expenses incurred are reduced for ceding allowances received or receivable.

In addition, the Company uses the following accounting policies:

Note 20 Fair Value Measurements

A. Inputs Used for Assets and Liabilities Measured at Fair Value

1. Fair Value Measurements by Level 1, 2, and 3

The Company has categorized its assets and liabilities that are measured at fair value into the three-level fair value hierarchy as reflected in the table below. The three-level value hierarchy is based on the degree of subjectivity inherent in the valuation method by which fair value was determined. The three levels are defined as follows.

Level 1- Quoted Prices in Active Markets for Identical Assets and Liabilities: This category, for items measured at fair value on a recurring basis, including exchange-traded preferred and common stocks. It also includes derivative liabilities for written call options on common stock which are also exchanged traded. The estimated fair value of the equity securities and derivatives within this category are based on quoted prices in active markets and are thus classified as Level 1.

Level 2- Significant Other Observable Inputs: This category for items measured at fair value on a recurring basis includes bonds, preferred stocks and common stocks which are not exchange-traded. The estimated fair values of some of these items were determined by independent pricing services using observable inputs. Other were based on quotes from markets which were not considered actively traded.

Level 3 – Significant Unobservable Inputs: The Company has no assets or liabilities measured at fair value in this category.

The following table provides information as of June 30, 2015 about the Company’s financial assets measured at fair value on a recurring basis:

	Quoted prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level II)	Significant Unobservable Inputs (Level III)	Total at June 30, 2015
Bonds	\$	\$	\$	\$
Common stocks	8,451,180	129,871		8,581,051
Preferred stocks	141,135			141,135
Total	<u>\$ 8,592,315</u>	<u>\$ 129,871</u>	<u>\$</u>	<u>\$ 8,722,186</u>

At the end of each reporting period, the Company evaluates whether or not any event has occurred or circumstances have changed that would cause an instrument to be transferred between Levels 1 and 2. This policy also applies to transfers into or out of Level 3 as stated in paragraph 3 below.

2. Rollforward of Level 3 Items

The Company has no assets or liabilities measured at fair value in the Level 3 category.

3. Policy on Transfers Into and Out of Level 3

At the end of each reporting period, the Company evaluates whether or not any event has occurred or circumstances have changed that would cause an instrument to be transferred into or out of Level 3. During the current year, no transfers into or out of Level 3 were required.

4. Inputs and Techniques Used for Level 2 and Level 3 Far Values

The Company has no assets or liabilities measured at fair value in the Level 3 category.

Common stock carried at fair value categorized as Level 2 were valued using a market approach. These valuations were determined to be Level 2 valuations because quoted market prices for identical instruments trading in an inactive market were utilized. When an equity instrument is illiquid due to limited trading activity, the use of quoted markets for identical instruments was determined by the Company to be the most reliable method to determine fair value.

5. Derivative Fair Values

Not applicable

B Other Fair Value Disclosure

Not applicable

C. Fair Values for All Financial Instruments by Levels 1, 2, and 3

The table below reflects the fair value and admitted values of all admitted assets and liabilities that are financial instruments excluding those accounted for under the equity method (subsidiaries, joint ventures and ventures). The fair values are also categorized into the three-level fair value hierarchy as described above in Note 20A. This was not practicable for mortgage loans as described below in Note 20D.

Type of Financial Instrument	Fair Value in Investment Schedule	Admitted Value in Investment Schedule	Level 1	Level 2	Level 3
Financial instruments - assets					
Bonds	34,811,448	34,803,078	34,811,448		
Preferred Stocks	171,820	141,135	171,820		
Common Stock	8,581,051	8,581,051	8,451,180	129,871	
Cash	4,451,546	4,451,546	4,451,546		
Short-term investments	300,214	300,214	300,214		
Mortgage Loan		31,488			
Total Assets	48,316,079	48,308,512	48,186,208	129,871	

D. Items for which Not Practicable to Estimate Fair Values

It's not practical to determine the fair value of mortgage loans for the purpose of the above disclosure of Note 20C due to the fact that these items are not traded and therefore quoted market prices are not available. Also, the cost of obtaining estimates of fair values from other sources is considered excessive given the immateriality of the mortgage loans.

C. Other Disclosures

These investments include bond, mortgage loans, mortgage-backed securities and equity investments in financial institutions. The company believes that its greatest exposure is to unrealized losses from declines in asset values versus realized losses resulting from defaults or foreclosures. Conservative lending and investment practices limit the company's exposure to such losses.
