C. Accounting Policy

Premiums are earned over the terms of the related insurance policies and reinsurance contracts. Unearned premium reserves are established to cover the unexpired portion of premiums written. Such reserves are computed by pro rata methods for direct business and are based on reports received from ceding companies for reinsurance.

Expenses incurred in connection with acquiring new insurance business, including such acquisition costs as sales commissions, are charged to operations as incurred. Expenses incurred are reduced for ceding allowances received or receivable. In addition, the Company uses the following accounting policies:

- (1-5) No significant change
- (6) Loan-backed securities are stated at either amortized cost or the lower of amortized cost or fair market value. The retrospective adjustment method is used to value all securities. Level 2 - Inputs include quoted prices for similar assets or liabilities in active markets , quoted prices from those willing to trade in markets that are not active , or other inputs that are observable or can be corroborated by market data for the term of the instrument . If an input changes, the Company evaluates the new input (s) and makes the determination whether or not a transfer between levels is appropriate . If an asset or liability is transferred between levels , it is the Company's policy to record the transfer as of the beginning of the quarter in which the transfer occurs . The Company held no assets or liabilities categorized as Level 1 , 2 or 3 during the reporting period that were transferred into or out of the level categorization held at January 1, 2015 .

Where independent pricing services provide fair values, the Company has obtained an understanding of the methods, models and inputs used in pricing and has controls in place to validate that amounts provided represent current fair values . Estimated fair values of investments categorized as Level 3 generally include inputs for which no readily observable inputs are available and require management judgment .

(5) As of June 30, 2015, the Company had no holdings classified as either a derivative asset or liability .

B. Combining Fair Value Information- Not required

C. The method (s) and significant assumptions used to estimate the fair value of financial instruments are as follows:

*Investment Securities* - Fair values for bonds are based on the values prescribed by an independent pricing service or from brokers . For bonds that are not actively traded, estimated fair values are based on values of bonds of comparable yield and credit quality . The fair values for common stocks are based on quoted market prices, where available, which are provided to the Company by an independent pricing service .

*Short-term investments, Receivables for securities, Uncollected premiums and agents' balances in the course of collection, and Deferred premiums, agents' balances and installments booked but deferred and not yet due* - The carrying amounts reported as admitted assets or liabilities for these financial instruments approximate their fair values due to the short-term nature of these financial instruments .

*Other Invested Assets* - The estimated fair value of publicly traded limited partnerships is based on the values prescribed by an independent pricing service .

24. Retrospectively Rated Contracts and Contracts Subject to Redetermination- Not applicable

25. Changes in Incurred Losses and Loss Adjustment Expenses-  
Reserves as of December 31, 2014 were \$193.1 million . In calendar year 2015, \$36.3 million has been paid for incurred claims and claim adjustment expenses attributable to insured events of prior years . Reserves remaining for prior years are now \$153.2 million . Therefore, there has been a \$3.6 million favorable prior-year development from December 31, 2014 to June 30, 2015 . The favorable development is principally from decreases in the estimates of loss and loss adjustment expenses for the following lines of business: workers compensation and fidelity/surety . This is offset , in part, by increases in the estimates of loss and loss adjustment expenses for Commercial Auto Liability . This change is generally the result of ongoing analysis of recent loss development trends . Original estimates are increased or decreased , as additional information becomes known regarding individual claims . The estimates are not affected by prior year loss development on retrospectively rated policies , as the Company does not write this type of policy .
