Note 20 - Fair Value

- A. The Company's financial assets carried at fair value have been classified, for disclosure purposes, based on a three-level hierarchy shown below. The hierarchy gives the highest ranking to fair values determined using unadjusted quoted prices in active markets for identical assets (Level 1) and the lowest ranking to fair values using methodologies and models with unobservable inputs (Level 3). An asset's classification is based on the lowest level input that is significant to its measurement. The levels of the fair value hierarchy are as follows:
- Level 1—Values are quoted prices (unadjusted) in active markets for identical assets that can be accessed at the reporting date. Actively traded, as defined by the Company, is a security that has traded in the past seven days.
 - Level 2—Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.
 - Level 3—Unobservable inputs reflecting the Company's own assumptions about the assumptions market participants would use in pricing the asset or liability based on the best information available in the circumstances.

These prices are determined using observable market information such as dealer quotes, market spreads, cash flows, yield curves, live trading levels, trade execution data, market consensus prepayment speeds, credit information and the security's terms and conditions, among other things.
