The financial statements of Central Mutual Insurance Company are presented on the basis of accounting practices prescribed or permitted by the Ohio Insurance Department.

The Ohio Insurance Department recognizes only statutory accounting practices prescribed or permitted by the State of Ohio for determining and reporting the financial condition and results of operations of an insurance company, for determining solvency under the Ohio Insurance Law. The National Association of Insurance Commissioners' (NAIC) *Accounting Practices and Procedures* manual - Version effective January 1, 2001, (NAIC SAP) has been adopted as a component of prescribed or permitted practices by the State of Ohio. The Commissioner of Insurance has the right to permit specific practices that deviate from prescribed practices.

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policy

Premiums are earned over the terms of the related insurance policies and reinsurance contracts. Unearned premium reserves are established to cover the unexpired portion of premiums written. Such reserves are computed by pro rata methods for direct business and are based on reports received from ceding companies for reinsurance.

Expenses incurred in connection with acquiring new insurance business, including such acquisition costs as sales commissions, are charged to operations as incurred. Expenses incurred are reduced for ceding allowances received or receivable.

In addition, Central Mutual Insurance Company uses the following accounting policies:

- (1) Short-term investments are stated at amortized cost.
- (2) Bonds not backed by other loans are stated at amortized cost using the interest method.
- (3) Common stocks are stated at market value except investments in stocks of uncombined subsidiaries and affiliates in which Central Mutual Insurance Company has an interest of 20% or more are carried on the equity basis.
- (4) Preferred stocks are stated at market value except qualified sinking fund preferreds which are stated at amortized cost.
- (5) Central Mutual Insurance Company has no mortgage loans on real estate.
- (6) Loan-backed securities are stated at amortized cost. Prepayment assumptions for loan-backed bonds and structured securities are obtained from dealer surveys. These assumptions are consistent with the current interest rate and economic environment. The prospective adjustment method is used to value these securities.
- (7) Central Mutual Insurance Company owns 100% of the common stock of All America Insurance Company, a property and casualty insurance company. Central Mutual Insurance Company owns 100% of Security Central, a holding company. Stocks held in all subsidiaries are carried at their Admitted Asset Equivalent.
- (8) Central Mutual Insurance Company has minor ownership interest in a limited liability company. The company carries this interest based upon the underlying audited GAAP equity of the investee.
- (9) Central Mutual Insurance Company's derivatives are carried at fair market value (marked-to-market monthly) on Schedule DB. An unrealized gain or loss is incurred monthly as a result. Derivatives in which the positions are closed (expire, purchased, or exercised) incur a realized gain or loss.
- (10) Central Mutual Insurance Company anticipates investment income as a factor in the premium deficiency calculation, in accordance with SSAP No. 53, Property-Casualty Contracts - Premiums.
- (11) Unpaid losses and loss adjustment expenses include an amount determined from individual case estimates and loss reports and an amount, based on past experience, for losses incurred but not reported. Such liabilities are necessarily based on assumptions and estimates and while management believes the amount is adequate, the ultimate liability may be in excess of or less than the amount provided. The methods for making such estimates and for establishing the resulting liability are continually reviewed and any adjustments are reflected in the period determined.
- (12) There was no change in the capitalization policy or the resultant predefined thresholds from the prior period.
- (13) Central Mutual Insurance Company has no pharmaceutical rebate receivables.

The investment is carried on Schedule BA, Other Invested Assets, and valued at book value per CAP financial statements. Due to initial start-up costs, as well as investments in infrastructure and other project costs, the value of the investment has met the criteria of the Company’s OTTI procedure, and has subsequently been written down entirely. The current statement value of the investment is zero (\$0). Central Mutual Insurance Company has invested \$6.607 million in Project CAP since its inception, which has been written down in full. No additional write downs were taken in 2015.

7. Investment Income

- A. Due and accrued income was excluded from surplus on the following bases:
 - All income due and accrued with amounts that are over 90 days past due with the exception of mortgage loans in default.
- B. No amount was excluded.

8. Derivative Instruments

Central Mutual Insurance Company’s derivatives transacted in 2015 included both covered calls and stock warrants. Both would be subject to market risk, specifically, equity risk, as stock prices or implied volatility of the underlying securities change. These derivatives should have no credit risk. Cash requirements would be minimal, since the vast majority of options written are the sale of covered calls, which is a cash inflow. The warrants would entail cash outflows, but are minimal.

The derivatives are written for income generation purposes. The sale of these covered calls, on only a portion of our equity holdings, is to allow some appreciation on the underlying stock, and to recognize a realized gain if the calls are exercised. The covered calls may be purchased back if fundamental changes occur in the stock, and it is advantageous to do so and roll to a higher strike price.

All derivatives are carried at fair market value (marked-to-market monthly) on Schedule DB. An unrealized gain or loss is incurred monthly as a result. Derivatives in which the positions are closed (expire, purchased, or exercised) incur a realized gain or loss.

| | 2015 | 2014 | 2015 | 2014 |
|--|-------|-------|-------|-------|
| (a) Weighted-average discount rate | 4.35% | 5.25% | 4.70% | 5.25% |

| (c) Rate of compensation increase | 3.00% | 3.00% | N/A | N/A |

Weighted-average assumptions used to determine projected benefit obligations as of December 31:

| | | | | |
|-----------------------------------|--------------------------------------|--------------------------------------|-------|-------|
| (d) Weighed-average discount rate | 4.70% | 4.35% | 4.70% | 4.35% |
| (e) Rate of compensation increase | 5.50% of base plus 24.1% for bonuses | 5.50% of base plus 22.0% for bonuses | N/A | N/A |

For measurement purposes, an 8.50% annual rate of increase in the per capita cost of covered health care benefits was assumed for 2015. The rate was assumed to decrease gradually to 6.00% for 2021 and remain at that level thereafter.

(9) The amount of the accumulated benefit obligation for defined benefit pension plans was \$116,275,314 as of December 31, 2015 and \$119,663,685 as of December 31, 2014.

(10) The Company has a non-pension postretirement benefit plan. The health care plan is contributory, with participants’ contributions adjusted annually; the life insurance plan is noncontributory. The accounting for the health care plan does not anticipate future cost-sharing changes to the written plan due to the company’s expressed intent not to increase retiree contributions each year in excess of the expected general inflation rate. On March 1, 2013, the company amended the postretirement health care plan to limit eligibility for the benefits to employees that retire within 10 years of their Social Security “normal” retirement date, have completed at least 10 years of service since their most recent hire date, and had the coverage on the day just prior to their retirement date.

Notes to Financial Statements

(11) Assumed health care cost trend rates have a significant effect on the amounts reported for the health care plans. A one-percentage-point change in assumed health care cost trend rates would have the following effects:

| | 1 Percentage Point Increase | 1 Percentage Point Decrease |
|---|--------------------------------|--------------------------------|
| (a) Effect on total of service and interest rate components | \$ 1,263,332 | \$ (972,626) |
| (b) Effect on postretirement benefit obligation | \$ 10,180,900 | \$ (8,179,269) |

(12) The benefits expected to be paid in each of the next five fiscal years related to the defined benefit pension plan are as follows:

| | |
|------|-------------|
| 2016 | \$4,615,511 |
| 2017 | \$4,968,267 |
| 2018 | \$5,335,463 |
| 2019 | \$5,758,983 |
| 2020 | \$6,244,743 |

The aggregate for five fiscal years thereafter are estimated to be: \$38,549,601.

The net benefits expected to be paid in each of the next five fiscal years related to the postretirement plan are as follows:

| | |
|------|-------------|
| 2016 | \$1,694,227 |
| 2017 | \$1,901,568 |
| 2018 | \$2,083,843 |
| 2019 | \$2,333,517 |
| 2020 | \$2,566,405 |

The aggregate for five fiscal years thereafter are estimated to be: \$15,890,056.

- (13) The Company does not have any regulatory contribution requirements for 2015, and the Company does not intend to make any voluntary contributions to the defined benefit pension plan. The Company expects to contribute \$1,694,000 to the postretirement plan in 2016.
- (14) There are no securities of the employer or related parties included in plan assets. There are no future annual benefits of plan participants covered by insurance contracts issued by the employer or related parties. There were no significant transactions between the employer or related parties and the plan during the period.
- (15) There were no alternative methods used to amortize prior service amounts or unrecognized net gains and losses.
- (16) There were no substantive commitments used as the basis for accounting for the benefit obligation.
- (17) There were no costs of providing special or contractual termination benefits during the period.
- (18) There were no significant changes in the benefit obligation or plan assets that are not otherwise apparent in the previous disclosures.
- (19) There are no plan assets expected to be returned to the Company during the 12-month period, or operating cycle if longer, that follows the most recent annual statement of financial position presented.

Non-Qualified Pension Plan - Central Mutual Insurance Company also has a non-qualified pension plan to pay benefits to certain employees whose pension benefits under the qualified plan are limited by Sections 415 and 401(a)(17) of the Internal Revenue Code. The non-qualified plan is unfunded and will pay the difference of (1) the benefit determined by the qualified plan formula with no IRC limits applied less (2) the benefit determined by the qualified plan formula after the IRC limits are applied. Central Mutual's share of this liability as of December 31, 2015 is \$6,643,150.

B. The Investment Policy of the Plan indicates that the asset structure needs to reflect a proper balance

Notes to Financial Statements

of the Plan’s need for liquidity, stability of value, and diversification along with the risk tolerance of Central Mutual Insurance Company. The asset mix that identifies the company’s long-term investment objectives for the Plan lies in five major investment categories each with a permissible range. Those categories are Large Cap Equities (25-50%), Small/Mid Cap Equities (5-15%), International Equities (0-15%), Intermediate-Term Fixed Income (15-40%), and Long-Term Fixed Income (10-30%). The actual 12/31/2015 asset value mix was 40.02% in Large Cap Equities, 10.66% in Small/Mid Cap Equities, 8.08% in International Equities, 24.87% in Intermediate-Term Fixed Income, and 16.37% in Long-Term Fixed Income.

The company analyzes 20 years of return data for 20 asset categories on an annual basis in order to establish its basis for expected long-term rate-of-return on its assets.

The company also runs a monthly asset allocation model taking into consideration the desired asset mix, risk of asset categories, and the maturity needs of the plan’s liabilities. This model is used to determine what asset allocation changes need to be made in order to meet the asset mix requirements in the investment policy.

C. (1) Fair Value Measurements of Plan Assets at Reporting Date

(2) Fair Value Measurements in Level 3 of the Fair Value Hierarchy

| Description for each class of plan assets | Beginning Balance at 01/01/2015 | Transfers into Level 3 | Transfers out of Level 3 | Return on Assets Still Held | Return on Assets Sold | Purchases | Issuances | Sales | Settlements | Ending Balance at 12/31/2015 |

D. An annual study is performed that is designed to evaluate the real rates of return, allocations of investments by asset category, and expected future condition of the Group Pension Plan. This study serves as the basis for the rate of return assumption. Exhibit 1 of this study computes annual real rates of return for large cap equities, small/mid cap equities, international equities, fixed income intermediate maturity investments, and fixed income long-term maturity investments. Thirty years of returns are analyzed and are used to evaluate the reasonableness of the assumptions by asset class that are contained in the Plan’s Investment Policy. Exhibit 2 of the study uses the assumptions of the Company’s Asset Allocation Model and the payout, interest rate, liability, and asset information from the Plan’s actuarial report to develop a modeled allocation for the pension assets. Exhibit 3 of the study develops an expected real rate of return for the portfolio of Plan assets under alternative scenarios. The portfolio real rates of return are then compared to those in the Investment Policy for reasonableness. Exhibit 4 of the study provides long-term annual standard deviations and average returns for various portfolio asset allocations. These average returns are then compared to the assumption the pension actuary uses in the Plan’s annual actuarial report. Exhibit 5 of the study attempts to compute and display the expected future condition of the Group Pension Plan over the next 50 years under various market conditions, asset allocations, assumptions and scenarios. This exhibit provides some idea as to the expected level of funding that the Group Pension Plan will require in the future and the probability that the Company will have to do future funding of the Plan that is considerably different than that expected level. The final two exhibits of the study evaluate the ranges of investments by asset class indicated in the Investment Policy. Two alternate scenarios are evaluated: (1) assets are doubled and (2) assets are reduced by 25%.

The non-qualified Plan is unfunded and a participant is eligible to defer compensation under the non-qualified Plan only if he has made the maximum elective contributions which are permitted under the qualified SPP Plan. Yes(X) No()

Does Central Mutual Insurance Company have on the books, or has it ever written an insured for which it has been identified as having a potential for the existence of, a liability due to environmental losses?
Yes(X) No()

Central Mutual's exposure arises primarily from the sale of general liability insurance, including the general liability portion of commercial package policies. However, exposure also exists for these lines of insurance: workers' compensation, homeowners, and commercial property.

Central Mutual tries to estimate the full impact of the environmental and asbestos exposure by establishing full case basis reserves on all known losses and computing incurred but not reported loss reserves and allocated loss adjustment reserves based on previous experience.

The previous experience is combined with the other Company experience and analyzed in a combined manner as part of the regular loss reserve analysis.

Central Mutual's systems do not separate environmental and asbestos-related claims. Therefore, only combined environmental and asbestos-related loss data is available for presentation. Environmental claims represent the majority of the exposure included in the following numbers.

Central Mutual's environmental and asbestos-related losses (including coverage dispute costs) for each of the five most recent calendar years were as follows:

(1) Gross of Reinsurance Basis:
