20) Fair Value Measurements

- A) Inputs Used for Assets and Liabilities Measured and Reported at Fair Value
 - 1) Items Measured and Reported at Fair Value by Levels 1, 2 and 3.

The Company classifies the assets and liabilities that require measurement of fair value on a recurring basis based on the priority of the observable and market-based sources of data into a three-level fair value hierarchy. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The three levels of the fair value hierarchy are as follows:

Level 1 - Valuations based on quoted prices in active markets for identical assets or liabilities that the entity has the ability to access.

Level 2 - Valuations based on significant other observable inputs other than those included in Level 1, such as quoted prices for similar assets or liabilities, quoted prices in markets that are not active, or other inputs that are observable or can be corroborated by observable data for substantially the full term of the assets or liabilities.

Level 3 - Valuations based on unobservable inputs such as when observable inputs are not available or inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities. The Company has no assets or liabilities measured at fair value in this category.

The following table presents, for each of the fair value levels, the Company's assets and liabilities that are measured at fair value on a recurring basis as of December 31, 2015:

Financial assets and liabilities measured at fair value on a recurring basis

Description	Total 12/31/2015	Level 1	Level 2	Level 3	Total Gains (Losses)

Total assets at fair value		-	(324,867)	-	(324,867)
Total liabilities at fair value		-	-	-	-

At the end of each reporting period, the Company evaluates whether any event has occurred or circumstances have changed which would cause an instrument to be transferred between Levels 1 and 2. This policy also applies to transfers into or out of Level 3 as stated in paragraph 3 below.

During the current year there were no transfers among Levels 1, 2 and 3.

2) Rollforward of Level 3 items

4) Inputs and Techniques used for Level 2 and Level 3 Fair Values

The Company has no assets or liabilities measured at fair value in the Level 3 category.

For securities whose prices are not available through pricing services or index providers, the prices are obtained from other sources such as broker-dealers or pricing vendors. Debt instruments are valued by index providers, pricing services or broker-dealers using standard market conventions. The market conventions utilize market quotations, market transactions in comparable instruments and various relationships between instruments such as yield to maturity, dollar prices and spread prices in determining value. Cash instruments are priced with either a matrix pricing system that utilizes market yields and spreads, pricing vendors or amortized cost.
