The standards require insurers to recognize the overfunded or underfunded status of a defined benefit postretirement plan as an asset or liability and include non-vested employees in determining the plan obligations . In addition , a sponsor's fiscal year end will be used as the measurement date for estimating the fair value of postretirement benefit assets and liabilities . The guidance contains a transition provision that gives insurers the option to recognize the initial impact to surplus over a period not to exceed 10 years . OFIC elected the transition option . The Company expects the remaining transition liability of \$0.7 million to be recognized in 2016 .

OFIC contributed \$14.0 million to its pension plan in March 2016 . OFIC does not expect to make any additional contributions during the remainder of fiscal year 2016 .

20. Fair Value Measurements-
- A. For assets that are measured and reported at fair value in the statement of financial position after initial recognition, the valuation techniques and the inputs used to develop those measurements are as follows:
- Level 1 - Values are unadjusted quoted prices for identical assets and liabilities in active markets accessible at the measurement date.
- Level 2 - Inputs include quoted prices for similar assets or liabilities in active markets, quoted prices from those willing to trade in markets that are not active, or other inputs that are observable or can be corroborated by market data for the term of the instrument. Such inputs include market interest rates and volatilities, spreads and yield curves.
- Level 3 - Certain inputs are unobservable (supported by little or no market activity) and significant to the fair value measurement. Unobservable inputs reflect the Company's best estimate of what hypothetical market participants would use to determine a transaction price for the asset or liability at the reporting date.

The Company has no liabilities that are measured at fair value in the statement of financial position.

- (2) At March 31, 2016, the Company held no investments in assets or liabilities measured and reported at fair value that were classified as Level 3.
- (3) The Company's policy for determining when transfers between levels is required is based upon change in the inputs used to determine fair value measurement. If an input changes, the Company evaluates the new input (s) and makes the determination whether or not a transfer between levels is appropriate. If an asset or liability is transferred between levels, it is the Company's policy to record the transfer as of the beginning of the quarter in which the transfer occurs. The Company held no assets or liabilities categorized as Level 1, 2 or 3 during the reporting period that were transferred into or out of the level categorization held at January 1, 2016.
- (4) As of March 31, 2016, the Company held no investments in assets or liabilities measured and reported at fair value that were classified as Level 2 or Level 3. Historically, fair values in the Level 2 category are provided by independent pricing services. Where independent pricing services provide fair values, the Company has obtained an understanding of the methods, models and inputs used in pricing and has controls in place to validate that amounts provided represent current fair values. Estimated fair values of investments categorized as Level 3 generally include inputs for which no readily observable inputs are available and require management judgment.
- (5) As of March 31, 2016, the Company had no holdings classified as either a derivative asset or liability.

- B. Combining Fair Value Information- Not required
- C. The method (s) and significant assumptions used to estimate the fair value of financial instruments are as follows:

Investment Securities - Fair values for bonds are based on the values prescribed by an independent pricing service or from brokers. For bonds that are not actively traded, estimated fair values are based on values of bonds of comparable yield and credit quality. The fair values for common stocks are based on quoted market prices, where available, which are provided to the Company by an independent pricing service.

Short-term investments, Uncollected premiums and agents' balances in the course of collection, and Deferred premiums, agents' balances and installments booked but deferred and not yet due - The carrying amounts reported as admitted assets or liabilities for these financial instruments approximate their fair values due to the short-term nature of these financial instruments.

Other Invested Assets - The estimated fair value of publicly traded limited partnerships is based on the values prescribed by an independent pricing service.

- 24. Retrospectively Rated Contracts and Contracts Subject to Redetermination- Not applicable

25. Changes in Incurred Losses and Loss Adjustment Expenses- Reserves as of December 31, 2015 were \$139.1 million. In calendar year 2016, \$15.9 million has been paid for incurred claims and claim adjustment expenses attributable to insured events of prior years. Reserves remaining for prior years are now \$121.1 million. Therefore, there has been a \$2.1 million favorable prior-year development from December 31, 2015 to March 31, 2016. The favorable development is principally from decreases in the estimates of loss and loss adjustment expenses for the following lines of business: Commercial Multiple Peril, Auto Physical Damage, Workers Compensation and Fidelity/Surety. This is offset, in part, by increases in the estimates of loss and loss adjustment expenses for Other Liability-Occurrence. This change is generally the result of ongoing analysis of recent loss development trends. Original estimates are increased or decreased, as additional information becomes known regarding individual claims. The estimates are not affected by prior year loss development on retrospectively rated policies, as the Company does not write this type of policy.
