Prepayment assumptions for loan-backed and structured debt securities are obtained from available market data, broker/dealers, and/or internal estimates, and are consistent with current interest rate and economic trends. See Note 5.D.

13.	Capital and Surplus, Dividend Restrictions and Quasi-Reorganizations

14.	Contingencies
G.	All Other Contingencies
	The Company routinely assesses the collectibility of premiums and agents' balances receivable and records a bad debt reserve for amounts exceeding the nonadmitted balance that the Company believes are uncollectible. The Company is named as defendant in various lawsuits arising out of its insurance operations. All legal actions relating to claims made under insurance policies are considered by the Company in establishing its loss and LAE reserves. The Company also has, on a net basis, potential exposure relating to lawsuits due to its participation in the 100% pooling reinsurance agreement for which it is allocated litigation expenses. The following is a discussion of potentially significant pending cases at March 31, 2016. The Company does not consider a loss from these cases to be probable and is unable to estimate a range of loss, if any, at this time. As of March 31, 2016 there was one case consolidated into multi-district proceedings alleging that the Company improperly steers automobile repair work to certain auto body repair shops and challenging the labor rates the Company pays to auto body repair shops. As of March 31, 2016, there was a putative class action lawsuit challenging fees charged to insureds.

The related premiums receivable remain in the Company's assets, and a corresponding liability was established. As the related cash is collected, it is transferred to PICI, and the liability is reduced. The premiums receivable transaction was approved by the Ohio Department of Insurance.
C.	Wash Sales

20.	Fair Value Measurements
A.	Inputs Used for Assets and Liabilities Measured at Fair Value in the Company's Financial Statements
1.	Fair Value Measurements by Levels 1, 2 and 3
	The Company categorizes its financial instruments, based on the degree of subjectivity inherent in the method by which they are valued, into a fair value hierarchy of three levels, as follows: Level 1 - Inputs are unadjusted, quoted prices in active markets for identical instruments at the measurement date (e.g., active exchange-traded equity securities). Level 2 - Inputs (other than quoted prices included within Level 1) that are observable for the instrument either directly or indirectly. This includes: (i) quoted prices for similar instruments in active markets, (ii) quoted prices for identical or similar instruments in markets that are not active, (iii) inputs other than quoted prices that are observable for the instruments, and (iv) inputs that are derived principally from or corroborated by observable market data by correlation or other means. Level 3 - Inputs that are unobservable. Unobservable inputs reflect the Company's subjective evaluation about the assumptions market participants would use in pricing the financial instrument. The Company's management evaluated whether the market was distressed or inactive in determining the fair value of the Company's securities and reviewed certain market level inputs to evaluate whether sufficient activity, volume, and new issuances existed to create an active market. Based on this evaluation, management concluded that there was sufficient activity in determining the fair market value of the Company's securities. As of March 31, 2016, the Company did not measure and report any securities at fair value on the balance sheet. All bonds were carried at amortized cost.
2.	Roll forward of Level 3 Items
	Not applicable
3.	Policy on Transfers Into and Out of Level 3
	At the end of each reporting period, the Company evaluates whether or not any event has occurred or circumstances have changed that would cause an instrument to be transferred into or out of Level 3.

The unfavorable development is primarily due to private passenger auto liability originally anticipated severity for accident year 2014 increasing by less than 1% and more late reported losses than anticipated for auto physical damage.
