B. Use of Estimates in the Preparation of the Financial Statements:

The preparation of financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the financial statements and revenue and expenses for the period then ended. It also requires estimates in the disclosure of contingent assets and liabilities at the date of the financial statements. Actual results could differ materially from these estimates.

C. Accounting Policy:

Ohio Indemnity's insurance premiums are earned over the terms of the related insurance policies and reinsurance contracts. For certain of our lender service products, premiums are earned over the contract period in proportion to the amount of insurance protection provided as the amount of insurance protection declines according to a predetermined schedule. For all other products, premiums are earned pro rata over the contract period. The portion of premiums written applicable to the unexpired portion of insurance policies is recorded in the balance sheet as unearned premiums.

Certain lender service policies are eligible for premium adjustments based on loss experience. For certain policies, return premiums are calculated and settled on an annual basis. Certain other policies are eligible for an experience rating adjustment that is calculated and adjusted from period to period and settled upon cancellation of the policy. These balances are presented in the accompanying balance sheet as unearned premiums.

SSAP No. 65, "Property and Casualty Contracts," requires a separate test for unearned premiums for policies with coverage periods equal to or in excess of thirteen months. Depending on the results of this test, a reporting entity may be required to record additional unearned premiums on a statutory basis that are not recorded on a GAAP basis. As of March 31, 2016 and December 31, 2015, respectively, we recorded \$2,120,206 and \$2,120,206, respectively of additional unearned premiums under SSAP No. 65 for our GAP product line.

Expenses incurred in connection with acquiring new insurance business, including such acquisition costs as sales commissions, are charged to operations as incurred. Expenses incurred are reduced for ceding commissions received or receivable.

In addition, the Company uses the following accounting policies:

- (1) Short-term investments are stated at amortized cost. Money market investments are reflected at cost.
- (2) Bonds not backed by other loans are stated at amortized value using the scientific interest method.
- (3) Redeemable preferred stocks are stated at amortized cost.

## NOTES TO FINANCIAL STATEMENTS

(4) Common stocks, non-redeemable preferred stocks and mutual funds are stated at market values based upon prices prescribed by the NAIC.

(5) Realized gains and losses on disposal of investments are determined by the specific identification method and are included in investment income. The carrying value of investments is revised and the amount of revision is charged to net realized losses on investments when management determines that a decline in the value of an investment is other-than-temporary.

We continually monitor the difference between the book value and the estimated fair value of our investments, which involves judgment as to whether declines in value are temporary in nature. If we believe the decline in any investment is "other-than-temporarily impaired," we record the decline as a realized loss through the income statement. If our judgment changes in the future, we may ultimately record a realized loss for a security after having originally concluded that the decline in value was temporary. We begin to monitor a security for other-than-temporary impairment when its fair value to book value ratio falls below 80%. Our assessment as to whether a security is other-than-temporarily impaired depends on, among other things: (1) the length of time and extent to which the estimated fair value has been less than book value; (2) whether the decline appears to be related to general market or industry conditions or is issuer specific; (3) our current judgment as to the financial condition and future prospects of the entity that issued the investment security; and (4) our intent to sell the security or the likelihood that we will be required to sell the security before its anticipated recovery.

(6) Unpaid losses and loss adjustment expenses ("LAE") include an amount determined from individual case estimates and loss reports and an amount, based on past experience, for losses incurred but not reported. Such liabilities are necessarily based on assumptions and estimates and while management believes the amount is adequate, the ultimate liability may be in excess of or less than the amount provided. The methods for making such estimates and for establishing the resulting liability are continually reviewed and any adjustments are reflected in the period determined.

Assumed reinsurance is a line of business with inherent volatility. Since the length of time required for the losses to be reported through the reinsurance system can be quite long, unexpected events are more difficult to predict. Ultimate loss experience for assumed reinsurance is based primarily on reports received by the Company from the underlying ceding insurers.

Loss and LAE reserves as of December 31, 2015 were \$14.35 million. As of March 31, 2016, \$6.44 million had been paid for incurred claims and claim adjustment expenses attributable to insured events of prior years. Reserves remaining for prior years are now \$6 million as a result of re-estimation of unpaid claims and claim adjustment expenses principally from our lender services, unemployment, waste industry and other specialty product lines. Therefore, there has been approximately \$1.91 million of favorable prior-year development from December 31, 2015 to March 31, 2016. The decrease is generally the result of ongoing analysis of recent loss development trends. Original estimates are increased or decreased, as additional information becomes known regarding individual claims. Conditions that affected these changes in reserves may not necessarily occur in the future. Accordingly, it may not be appropriate to extrapolate these changes to future periods.

As of March 31, 2016, no additional premiums or return premiums have been accrued as a result of the prior-year reserve effects.
