### **A. Fair Market Value at Reporting Date**

1. Fair Value Measurements at Reporting Date – None
2. Fair Value Measurements in (Level 3) of the Fair Value Hierarchy – None
3. GHPOI's policy for determining when transfers between levels are recognized is determined at the end of the reporting period.
4. In accordance with SSAP No. 100, financial assets and liabilities recorded at fair value in the statements of assets, liabilities, capital and surplus are categorized based upon the level of judgment associated with the inputs used to measure their fair value. Input levels, as defined by NAIC SAP, are as follows:

Level 1 – Pricing inputs are based on unadjusted quoted market prices for identical financial assets in active markets. Active markets are those in which transactions occur in sufficient frequency and volume to provide pricing information on an ongoing basis.

Level 2 – Pricing inputs are based on other than quoted prices in active markets included in Level 1 that are observable unadjusted quoted market prices for similar financial assets or liabilities in active markets or quoted market prices for identical assets in inactive markets.

Level 3 – Pricing inputs include unobservable inputs that are supported by little or no market activity that reflect management's best estimate of what market participants would use in pricing the asset at the measurement date.

The following methods and assumptions were used to determine the fair value of each class of the following assets and liabilities recorded at fair value in the statements of assets, liabilities, capital and surplus:

**Bonds** – Fair values are based on quoted market prices, where available. These fair values are obtained primarily from a third party pricing service, which generally uses Level 1 or Level 2 inputs for the determination of fair value to facilitate fair value measurements and disclosures. Level 2 securities primarily include corporate securities, securities from states, municipalities, and political subdivisions and mortgage-backed securities. Inputs that are often used in the valuation methodologies include, but are not limited to, broker quotes, benchmark yields, credit spreads, default rates and prepayment speeds.

**Short-term securities** – Short-term securities include Class 1 and exempt money market accounts, and securities with a maturity of less than one year but greater than 90 days at the date of purchase. Fair values of short-term securities are based on quoted market prices, where available. These fair values are obtained primarily from a third party pricing service, which generally use Level 1 or Level 2 inputs, for the determination of fair value to facilitate fair value measurements and disclosures. U.S. Government securities represent Level 1 securities, while Level 2 securities include corporate securities. Inputs that are often used in the valuation methodologies include, but are not limited to, broker quotes, benchmark yields, credit spreads, default rates, and prepayment speeds.

**Cash and cash equivalents**: Cash equivalents include commercial paper, and discount notes or securities with a maturity of 3 months or less. Cash equivalents are designated as Level 1 or Level 2, depending on structure and the extent of credit-related features.

GHPOI uses a third party pricing service to obtain quoted prices for each security. The third party service provides pricing based on recent trades of the specific security or like securities, as well as a variety of valuation methodologies for those securities where an observable market price may not exist. The third party service may derive pricing for Level 2 securities from market corroborated pricing, matrix pricing, and inputs such as yield curves and indices. Pricing for Level 3 securities may be obtained from investment managers for private placements or derived from discounted cash flows, or ratio analysis and price comparisons of similar companies. GHPOI performs an analysis of reasonableness of the prices received for fair value by monitoring month-to-month fluctuations and determining reasons for significant differences, selectively testing fair values against prices obtained from other sources, and comparing the combined fair value of a class of assets against an appropriate index benchmark. There were no adjustments to quoted market prices obtained from third party pricing services during the period ended September 30, 2015 that were material to the statutory financial statements.
