1. Summary of Significant Accounting Policies

Accounting Practices

The financial statements of EnTitle Insurance Company (the “Company”) have been prepared in conformity with accounting practices prescribed or permitted by the Ohio Department of Insurance and the National Association of Insurance Commissioners (“NAIC”).

The Ohio Department of Insurance does not allow any prescribed or permitted practices for determining and reporting the financial condition and results of operations of a title insurance company and for assessing its solvency.

Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements, in conformity with Statutory Accounting Principles, requires management to make estimates and assumptions that affect amounts reported in the financial statements and accompanying notes. Such estimates and assumptions could change in the future as more information becomes known and impacts the amounts reported and disclosed in the Financial Statements.

Accounting Policy

For premiums written in Ohio, Ohio insurance law requires the Company to establish an unearned premium reserve equal to 10% of the premium retained by the Company. The Company may release .5% of that which was added to the reserve during the previous 20 years. For all other states where the Company writes insurance, the Company follows the various state insurance department regulations when determining what statutory premium reserves are established. Premiums on title insurance policies issued by the Company are recognized as revenue when the Company is legally or contractually entitled to collect the

NOTES TO FINANCIAL STATEMENTS

premium. Premiums from title policies issued by the Company through independent agents are recognized when the policies are reported by the agent.

Case loss and loss adjustment expense reserves are recorded for outstanding known claims at the time of determination.

Investments in bonds are generally reported at amortized cost, using the effective interest method, unless the National Association of Insurance Commissioners' (NAIC) rating specifies another value. Held-to-maturity investments are reported at amortized cost, and the remaining investments are at fair value, with unrealized holding gains and losses reported in operations for those designated as trading, and as a separate component of shareholder's equity for those designated as available-for-sale. Non-agency residential mortgage backed securities (RMBS) are valued using the NAIC financial model as approved by the Valuation of Securities Task Force and Financial Condition Committee.

Common stock is carried at NAIC prescribed market values.

a. On July 13, 2007, the Company was acquired by BDT Holdings Inc., now by change of name, Entitle Direct Group, Inc. ("EDG"), pursuant to a Stock Purchase Agreement with Guardian Financial Services, Inc. The Company's Articles of Incorporation were amended as of that date to increase the par value of its shares from \$4,000 per share to \$5,000 per share. The change in par value had the effect of increasing the Company's common capital stock from \$800,000 to \$1.0 million (200 shares of common voting stock being outstanding). As set forth in the Form A Statement filed with the Ohio Department of Insurance on May 16, 2007, EDG contributed \$2.0 million to the Company on July 16, 2007 in exchange for the issuance to EDG of an additional 200 shares of the Company's common voting stock, thus increasing the Company's common capital stock to \$2.0 million and its contributed and paid-in surplus to \$1.8 million. In addition, EDG contributed the following: \$3.0 million as additional paid-in capital and contributed surplus to the Company on July 25, 2007; \$3.0 million as additional paid-in capital and contributed surplus to the Company effective December 31, 2010; \$1.2 million as additional paid-in capital and contributed surplus to the Company effective June 30, 2011; \$1.2 million as additional paid-in capital and contributed surplus to the Company effective December 31, 2011; and \$10 million as additional paid-in capital and contributed surplus to the Company effective September 30, 2012. PRE is a global reinsurance company based in Bermuda with total capital of \$6.7 billion and assets of \$22.9 billion as of December 31, 2012. The agreement called for PRE to invest \$19 million for a minority equity stake in EDG. Existing EDG shareholders invested an additional \$2 million alongside PRE. The transaction closed on October 3, 2012. In connection with that transaction, EDG contributed \$10 million to EnTitle Insurance Company as referenced above.

b. At December 31, 2008, the Company had related party transactions with BDT Holdings Inc., now by change of name, Entitle Direct Group, Inc. ("EDG") as set forth in the Company's Form D approved by the Ohio Department of Insurance on October 3, 2008.

On March 18, 2016, EXOR S.p.A., a publicly traded Italian corporation ("EXOR"), acquired, through certain wholly-owned subsidiaries, all of the outstanding common shares of PRE. EXOR filed a Form A for the transaction with the Department on September 8, 2015. By Order dated March 7, 2016, the Superintendent of the Ohio Insurance Department approved the acquisition of control of EIC by EXOR. As shown in the Organizational Chart attached as Exhibit A, following the transaction PRE is now 100% owned by Exor N.V.; Exor N.V. is 100% owned by EXOR S.A.; and EXOR S.A. is 100% owned by EXOR. 20. Fair Value Measurements

Included in bonds in the statutory financial statements are certain financial instruments carried at fair value. The fair value of an asset is the amount at which that asset could be bought or sold in a current transaction between willing parties, that is, other than in a forced or liquidation sale. The fair value of a liability is the amount at which that liability could be incurred or settled in a current transaction between willing parties, that is, other than in a forced or liquidation sale.

Fair values are based on quoted market prices when available. When market prices are not available, fair value is generally estimated using discounted cash flow analyses, incorporating current market inputs for similar financial instruments with comparable terms and credit quality (matrix pricing). In instances where there is little or no market activity for the same or similar instruments, the Company estimates fair value using methods, models, and assumptions that management believes market participants would use to determine a current transaction price. These valuation techniques involve some level of management estimation and judgment which becomes significant with increasingly complex instruments or pricing models. Where appropriate, adjustments are included to reflect the risk inherent in a particular methodology, model, or input used.

The Company’s financial assets and liabilities have been classified, for disclosure purposes, based on the SAP 100 hierarchy. The hierarchy gives the highest ranking to fair values determined using unadjusted quoted prices in active markets for identical assets and liabilities (Level 1) and the lowest ranking to fair values determined using methodologies and models with unobservable inputs (Level 3). An asset’s or a liability’s classification is based on the lowest level input that is significant to its measurement. For example, a Level 3 fair value measurement may include inputs that are both observable (Levels 1 and 2) and unobservable (Level 3). The levels of the fair value hierarchy are as follows:

NOTES TO FINANCIAL STATEMENTS

Level 1 - Values are unadjusted quoted prices for identical assets and liabilities in active markets accessible at the measurement date.

Level 2 - Inputs include quoted prices for similar assets or liabilities in active markets, quoted prices from those willing to trade in markets that are not active, or other inputs that are observable or can be corroborated by market data for the term of the instrument. Such inputs include market interest rates and volatilities, spreads and yield curves.

Level 3 - Certain inputs are unobservable (supported by little or no market activity) and significant to the fair value measurement. Unobservable inputs reflect the Company's best estimate of what hypothetical market participants would use to determine a transaction price for the asset or liability at the reporting date.

The following table provides information as of September 30, 2016 about the Company’s financial assets measured at fair value.
