C. Accounting Policy

(6) Loan-backed and other structured securities are stated at amortized cost or the lower of amortized cost or fair value. Anticipated prepayments are used at the time of purchase to determine the effective yield. Changes in the timing of expected cash flows after original acquisition are accounted for using the retrospective method. Securities that are determined to be other-than-temporarily impaired are accounted for using the prospective method.

D. Going Concern

After evaluating the entity's ability to continue as a going concern, management was not aware of any conditions or events which raised substantial doubts concerning the entity's ability to continue as a going concern as of the date of the filing of this statement.

(3) Not applicable

(4) Not applicable

(5) Several sources of information are considered when determining impairments are, or are not, other-than-temporary. These include, but are not limited to, the following. Credit rating agency information related to the security is reviewed, in addition to direct discussions with the rating analyst as needed. Reports from third party research providers and sell-side research analysts are reviewed. Market and trading information on the securities and other like-securities is monitored to assess trends impacting the securities. Market liquidity is analyzed to gauge how much it is impacting prices versus actual credit quality changes. Some sources of information will not be available for all securities. Where applicable, additional information is gathered for collateralized investments. This includes analysis of the individual underlying collateral and estimates of potential future collateral performance. Multiple cash flow scenarios are calculated based on various loss rate assumptions and used to assess the likelihood of future possible impairment.

Note 20 – Fair Value Measurements

A. Fair values for securities are based on quoted market prices when available and otherwise are based on quoted market prices of comparable instruments in active markets, quotes in inactive markets, or other observable criteria.

(1) Fair Value Measurements at Reporting Date

Assets at Fair Value	Level 1	Level 2	Level 3	Total
Bonds - Municipals	\$	\$ 392,887	\$	\$ 392,887
Real Estate		670,000		670,000
Total	\$	\$ 1,062,887	\$	\$ 1,062,887

The Company had a real estate investment measured and reported at fair value during the quarter and categorized as Level 2. During the quarter, the Company did not have any transfers between Levels 1 and 2 for assets measured and reported at fair value on the statement of financial position. Transfers between levels are recognized at the end of the reporting period in which they occur.

- (2) As of quarter-end, the Company did not have any securities categorized as Level 3 that are measured and reported at fair value on the statement of financial position.
- (3) During the quarter, the Company did not have any transfers into or out of Level 3 for assets measured and reported at fair value on the statement of financial position.
- (4) The majority of the Company's securities are not actively traded and direct quotes are not generally available. Management therefore determines the fair values of securities after consideration of data provided by third-party pricing services, independent broker/dealers, and other resources. Prices provided by third-party pricing services are not binding offers but are estimated exit values. They are based on observable market data inputs which can vary by security type. Such inputs include benchmark yields, available trades, broker/dealer quotes, issuer spreads, benchmark securities, bids, offers, and other inputs that are corroborated in the market. All fair value measurements based on prices determined with observable market data are reported as Level 1 or Level 2 measurements. When third-party vendor prices are not available, the Company attempts to obtain valuations from other sources, including but not limited to broker/dealers, broker quotes, and prices on comparable securities.

When valuations have been obtained for all securities in the portfolio, management reviews and analyzes the prices to insure their reasonableness, taking into account available observable information. When two or more valuations are available for a security and the variance between the valuations is 10% or less, the close correlation suggests similar observable inputs were used in deriving the prices, and the average of the prices is used. Securities valued in this manner are classified as Level 2. When the variance exceeds 10%, further review is performed on the available valuations to determine if they can be corroborated within reasonable tolerance to any other observable evidence. If one of the valuations or the average of the available valuations can be corroborated with other observable evidence, then the corroborated value is used and reported as Level 2. The Company uses information and analytical techniques deemed appropriate for determining the point within the range of reasonable fair value estimates that is most representative of fair value under current market conditions. Valuations that cannot be corroborated within a reasonable tolerance are classified as Level 3.

- (5) Derivative assets and liabilities - None

- B. Other fair value disclosures - None
