1.) SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**A. Accounting Practices**

The financial statements of Mid-Continent Casualty Company ("the Company") are presented on the basis of accounting practices prescribed or permitted by the Ohio Department of Insurance.

The Ohio Department of Insurance recognizes only statutory accounting practices prescribed or permitted by the state of Ohio for determining and reporting the financial condition and results of operations of an insurance company, for purposes of determining its solvency under the Ohio Insurance Law. The National Association of Insurance Commissioners' ("NAIC") *Accounting Practices and Procedures Manual* has been adopted as a component of prescribed or permitted practices by the state of Ohio. The Company has no prescribed or permitted practices that would result in differences between NAIC SAP and the state of Ohio basis, as shown below:

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policies

Investments – Invested asset values are generally stated as follows:

Bonds with a NAIC rating 1 and 2 are stated at amortized cost using the interest method; all others are stated at the lower of amortized cost or fair value. For residential mortgage-backed securities (RMBS), commercial mortgage-backed securities (CMBS) and loan-backed and structured securities (LBASS), the NAIC has retained third-party investment management firms to assist in the determination of the appropriate NAIC designations and Book Adjusted Carrying Values based not only on the probability of loss, but also the severity of loss. Those RMBS, CMBS and LBASS securities that are not modeled but receive a current year Acceptable Rating Organizations (ARO) rating are subject to the Modified FE process which determines the appropriate NAIC designations and Book Adjusted Carrying Values.

Redeemable preferred stocks rated RP1 and RP2 are stated at amortized cost; perpetual preferred stocks rated P1 and P2 are stated at fair value; all others are stated at the lower of cost, amortized cost, or fair value.

Common stocks are stated at fair value except investment in subsidiaries. Investments in insurance subsidiaries are stated at the statutory equity in net assets plus any applicable remaining goodwill. Goodwill is amortized on a straight-line basis over ten years. Investments in non-insurance subsidiaries are stated at NAIC specified values.

Short-term investments are stated at cost.

Unpaid Losses and Loss Adjustment Expenses – The net liabilities stated for unpaid claims and for expenses of investigation and adjustment of unpaid claims are based upon (a) the accumulation of case estimates for losses reported prior to the close of the accounting period on the direct business written; (b) estimates received from ceding reinsurers and insurance pools and associations; (c) estimates of unreported losses (including possible development on known claims) based on past experience; (d) estimates based on experience of expenses for investigating and adjusting claims; and (e) the current state of the law and coverage litigation. Establishing reserves for asbestos, environmental, and other mass tort claims involves considerably more judgment than other types of claims due to, among other things, inconsistent court decisions, an increase in bankruptcy filings as a result of asbestos-related liabilities, novel theories of coverage, and judicial interpretations that often expand theories of recovery and broaden the scope of coverage.

Loss reserve liabilities are subject to the impact of changes in claim amounts and frequency and other factors. Changes in estimates of the liabilities for losses and loss adjustment expenses are reflected in the Statement of Income in the period in which determined. Despite the variability inherent in such estimates, management believes the liabilities for unpaid losses and loss adjustment expenses are adequate.

Premium Deficiency Reserve – The Company does not use anticipated investment income as a factor in premium deficiency calculations.

Premium Recognition – Premiums are earned over the terms of the related insurance policies and reinsurance contracts. Unearned premium reserves are established to cover the unexpired portion of premiums written. Generally, for direct business, such reserves are computed by pro rata methods. For certain collateral protection products, earned premium and unearned premium reserves are computed consistent with the proportion of the total exposure provided throughout the term of the contract. For assumed business, unearned premium reserves are based on reports received from ceding companies for reinsurance.

Underwriting Expense Recognition – Expenses incurred in connection with acquiring new insurance business, including such acquisition costs as sales commissions, are charged to operations as incurred. Expenses incurred are reduced for ceding allowances received or receivable.

Non-Admitted Assets – Certain assets designated as "non-admitted", in accordance with Statement of Statutory Accounting Principles (SSAP) No. 4 Assets and Non-Admitted Assets, are excluded from the statutory balance sheet and such amounts are charged directly to unassigned funds.

NOTES TO FINANCIAL STATEMENTS**G. Consolidated/Holding Company Plans****Employee Retirement Plan**

American Financial Group, Inc. has established the American Financial Group, Inc. 401(k) Retirement and Savings Plan for the benefit of employees of American Financial Group, Inc. and its participating subsidiaries. Substantially all employees meeting minimum requirements regarding service are eligible to participate in this Plan. The Plan is a defined contribution plan in which participating employees are entitled to share in contributions made by the Company on their behalf. The Plan has three types of contributions, including (1) Retirement Contributions made by the Company, (2) 401(k) Contributions made by participating employees, and (3) Matching Contributions made by the Company. The benefits for the Retirement Contributions are based on eligible compensation as defined in the Plan for each year of participation. Funding is determined annually. Each Company contributes an amount for the Retirement Contributions based upon the relationship of its total eligible compensation to total eligible compensation under the Plan for all participating subsidiaries. In addition, participating employees are permitted to make 401(k) Contributions to the Plan. Matching Contributions may be made by the Company based on the amount of 401(k) Contributions made by the participating employees. Plan costs are funded as they accrue and vested benefits are fully funded. Both Retirement Contributions and Matching Contributions to the Plan are subject to the discretion of the Company. The Company has no liability for future contributions to the Plan. At December 31, 2016, the fair market value of the Plan's Retirement Contributions Account assets was \$447,339,127 and the fair market value of the Plan's Matching Contributions Account assets was \$220,256,966. The Company's share of the expense for the plan during 2016 was \$972,327.

Postretirement Benefit Plan

The Company provides postretirement health care and life insurance benefits to employees meeting age and service requirements through plans sponsored by American Financial Group, Inc. The retiree medical care plan is a contributory plan covering all eligible employees hired prior to 1993; employees hired after 1992 pay the full cost of retiree medical coverage. The Company has established a cap on the total amount of health care costs that are subsidized for the majority of current retirees. All eligible future retirees receive a flat dollar amount contributed to a Retiree Health Reimbursement Arrangement Account. The Company currently pays the full cost of life insurance coverage for past retirees, but no coverage is provided for new retirees after 2005. The medical plan is funded by monthly payments to a trust. Life insurance benefits are provided by insurance contracts. American Financial Group, Inc. has the right to modify or terminate either of these plans in the future. The Company has the right to terminate its participation at any time in the future.

The Company accrues its postretirement benefits over the period the employees qualify for such benefits. At December 31, 2016, the Company's accumulated postretirement benefit obligation was \$895,835, using a discount rate of 3.25% of which \$1,052,641 is currently accrued. Net postretirement benefits costs for the year ended December 31, 2016, were \$(19,603) which includes service cost, interest cost, and amortization of the transition obligation.

The weighted average annual assumed rate of increase in the health care cost trend rate is 6.75% for 2017 and is assumed to decrease gradually to 5% over 7 years and to remain at that level thereafter. The effect of a 1% increase in the assumed health care cost trend rate for each year would increase the accumulated postretirement benefit obligation at December 31, 2016 by \$(606).

3. Fair Value Recognition of Transfers Between Levels

The Company recognizes and records the transfer of securities into and out of Level 3 due to changes in availability of market observable inputs. All transfers are reflected in the table above at fair value as of the end of the reporting period.

4. Inputs and Techniques Used in Estimating Fair Value

Level 1 - Quoted prices for identical assets or liabilities in active markets (markets in which transactions occur with sufficient frequency

NOTES TO FINANCIAL STATEMENTS

and volume to provide pricing information on an ongoing basis). The Company's Level 1 financial instruments consist primarily of publicly traded equity securities and highly liquid government bonds for which quoted market prices in active markets are available. Level 2 - Quoted prices for similar instruments in active markets; quoted prices for identical or similar assets or liabilities in inactive markets (markets in which there are few transactions, the prices are not current, price quotations vary substantially over time or among market makers, or in which little information is released publicly); and valuations based on other significant inputs that are observable in active markets. The Company's Level 2 financial instruments include corporate and municipal fixed maturity securities and MBS priced using observable inputs. Level 2 inputs include benchmark yields, reported trades, corroborated broker/dealer quotes, issuer spreads and benchmark securities. When non-binding broker quotes can be corroborated by comparison to similar securities priced using observable inputs, they are classified as Level 2.

Level 3 - Valuations derived from market valuation techniques generally consistent with those used to estimate the fair value of Level 2 financial instruments in which one or more significant inputs are unobservable or when the market for a security exhibits significantly less liquidity relative to markets supporting Level 2 fair value measurements. The unobservable inputs may include management's own assumptions about the assumptions market participants would use based on the best information available in the circumstances. The Company's Level 3 is comprised of financial instruments whose fair value is estimated based on non-binding broker quotes or internally developed using significant inputs not based on, or corroborated by, observable market information.

The Company's investment manager, American Money Management Corporation (an affiliate) is responsible for the valuation process and uses data from outside sources (including nationally recognized pricing services and broker/dealers) in establishing fair value. Valuation techniques utilized by pricing services and prices obtained from external sources are reviewed by AMMC's internal investment professionals who are familiar with the securities being priced and the markets in which they trade to ensure the fair value determination is representative of an exit price. To validate the appropriateness of the prices obtained, these investment managers consider widely published indices (as benchmarks), recent trades, changes in interest rates, general economic conditions and the credit quality of the specific issuers. In addition, AMMC communicates directly with the pricing service regarding the methods and assumptions used in pricing, including verifying, on a test basis, the inputs used by the service to value specific securities.

B. The Company has no additional fair value disclosures.

C. The Company has categorized all the financial assets in the financial statements into the three-level fair value hierarchy as reflected in the following table. See item 4 above for a discussion of each of these three levels.

Loss and loss adjustment expense incurred:
