ANNUAL STATEMENT FOR THE YEAR 2016 OF THE CINCINNATI CASUALTY COMPANY

NOTES TO FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The financial statements of The Cincinnati Casualty Company (the Company) are presented on the basis of accounting practices prescribed or permitted by the Ohio Department of Insurance.

The Ohio Department of Insurance recognizes only statutory accounting practices prescribed or permitted by the state of Ohio for determining and reporting the financial condition and results of operations of an insurance company, and for determining its solvency under the Ohio Insurance Law. The National Association of Insurance Commissioners' Accounting Practices and Procedures Manual (NAIC SAP), version effective January 1, 2001 and updates through the current year have been adopted as a component of prescribed or permitted practices by the state of Ohio.

The Company has no prescribed or permitted practices that would result in differences between the NAIC SAP and the state of Ohio basis, as shown below:

	SSAP #	F/S Page	F/S Line #	2016	2015

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policies

Premiums are earned over the terms of the related insurance policies and reinsurance contracts. Unearned premium reserves are established to cover the unexpired portion of premiums written. These reserves are computed by pro rata methods for direct business and are based on reports received from ceding companies for reinsurance.

Expenses incurred in connection with acquiring new insurance business, including such acquisition costs as sales commissions, are charged to operations as incurred. Expenses incurred are reduced for ceding allowances received or receivable.

In addition, the Company uses the following accounting policies:

1. Cash equivalents, highly liquid debt instruments with original maturities of 90 days or less, and short term investments are carried at amortized cost, which approximates fair value.
2. Fixed maturities (bonds and notes) are valued and reported in accordance with the NAIC *Purposes and Procedures Manual of the NAIC Investment Analysis Office*, generally at amortized cost using the scientific interest method with one exception. Fixed maturities with an NAIC designation 3 through 6 are carried at the lower of amortized cost or fair value, with the difference reflected in assigned surplus.
3. Common stocks of non-affiliates are stated at fair values.
4. The Company does not have any investments in preferred stocks.
5. The Company does not have any investments in mortgage loans.
6. The Company does not have any investments in loan-backed and structured securities.
7. The Company does not have any investments in non-insurance subsidiaries, controlled or affiliated companies.
8. The Company's investment in joint ventures, partnerships, and limited liability entities consist of limited liability companies that invest in low income housing tax credit properties and are carried at proportional amortized cost.
9. The Company does not have any investments in derivatives.
10. In the event that a first-order approximation (excluding anticipated investment income) of estimated future costs related to unearned premium as of a particular evaluation date exceeds the unearned premium as of that date, the Company would incorporate consideration of the related investment income it would expect to earn. However, to date the Company has not had to proceed to this step in order to demonstrate that no premium deficiency exists.

ANNUAL STATEMENT FOR THE YEAR 2016 OF THE CINCINNATI CASUALTY COMPANY

NOTES TO FINANCIAL STATEMENTS

11. Unpaid losses and loss adjustment expenses include an amount determined from individual case estimates and loss reports and an amount, based on past experience, for losses incurred but not reported. Such liabilities are necessarily based on assumptions and estimates and while management believes the amount is adequate, the ultimate liability may be in excess of or less than the amount provided. The methods for making such estimates and for establishing the resulting liability is continually reviewed and any adjustments are reflected in the period determined.
12. The Company has not modified its capitalization policy from a prior period.
13. The Company has no pharmaceutical rebate receivables.

D. Going Concern

After review of the Company’s financial condition, management has no doubts about the Company’s ability to continue as a going concern.

2. Accounting Changes and Correction of Errors

NOTES TO FINANCIAL STATEMENTS

20. Fair Value Measurements

A. Inputs Used for Assets and Liabilities Measured at Fair Value

1. Included in various investment related line items in the financial statements are certain financial instruments carried at fair value. Other financial instruments are periodically measured at fair value, such as when impaired, or, for certain fixed maturities and preferred stock, when carried at the lower of cost or market.

The fair value of an asset is the amount at which that asset could be bought or sold in a current transaction between willing parties, that is, other than in a forced or liquidation sale. The Company does not have any material liabilities carried at fair value.

The Company has categorized its financial instruments, based on the priority of the inputs to the valuation technique, into a three-level fair value hierarchy. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). If the inputs used to measure the financial instruments fall within different levels of the hierarchy, the categorization is based on the lowest level that is significant to the fair value measurement of the instrument.

Financial assets that fall within Level 1 and Level 2 are priced according to observable data from identical or similar securities that have traded in the marketplace. Also within Level 2 are securities that are valued by outside services or brokers where the Company has evaluated the pricing methodology and determined that the inputs are observable. Financial assets that fall within Level 3 of the hierarchy are valued based upon unobservable market inputs. Pricing for each Level 3 security is based upon inputs that are market driven, including third-party reviews provided to the issuer or broker quotes. However, the Company places in the Level 3 hierarchy securities for which it is unable to obtain the pricing methodology or it could not consider the price provided as binding. Management ultimately determines the fair value for each Level 3 security that it considers to be the best exit price valuation.

The Company primarily bases fair value estimates for investments in equity and fixed-maturity securities on quoted market prices or on prices from a nationally recognized pricing vendor, an outside resource that supplies global securities pricing, dividend, corporate action and descriptive information to support fund pricing, securities operations, research and portfolio management. The Company obtains and reviews the pricing service's valuation methodologies and related inputs and validates these prices by replicating a sample across each asset class using a discounted cash flow model. When a price is not available from these sources, as in the case of securities that are not publicly traded, the Company determines the fair value using various inputs including quotes from independent brokers. In these circumstances, the Company has generally obtained and evaluated two nonbinding quotes from brokers; its investment professionals determine the best estimate of fair value. The fair value of investments not priced by a pricing vendor is less than 1 percent of the fair value of the Company's total investment portfolio.

Financial instruments are categorized based upon the following characteristics or inputs to the valuation techniques:

- Level 1—Financial assets and liabilities for which inputs are observable and are obtained from reliable quoted prices for identical assets or liabilities in active markets. This is the most reliable fair value measurement and includes, for example, active exchange-traded equity securities.
- Level 2 – Financial assets and liabilities for which values are based on quoted prices in markets that are not active or for which values are based on similar assets and liabilities that are actively traded. This also includes pricing models for which the inputs are corroborated by market data.
- The technique used for the Level 2 fixed-maturity securities is the application of market based modeling. The inputs used for all classes of fixed-maturity securities listed in the table below include relevant market information by asset class, trade activity of like securities, marketplace quotes, benchmark yields, spreads off benchmark yields, interest rates, U.S. Treasury or swap curves, yield to maturity and economic events. All of the Level 2 fixed-maturity securities are priced by a nationally recognized pricing vendor.
- Level 3—Financial assets and liabilities for which values are based on prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement. Level 3 inputs include the following:
 - Quotes from brokers or other external sources that are not considered binding;
 - Quotes from brokers or other external sources where it cannot be determined that market participants would in fact transact for the asset or liability at the quoted price; or
 - Quotes from brokers or other external sources where the inputs are not deemed observable.

The following table presents the Company's assets measured and reported at fair value by level within the fair value hierarchy as of December 31, 2016:

Assets at Fair Value:

	Level 1	Level 2	Level 3	Total
Common Stock	\$ 105,261,666	\$ 0	\$ 0	\$ 105,261,666

Prior year data included in Schedule P is calculated as follows:

Part 1-Payments made in the current year and current reserves for AY's 2006 & prior.

Parts 2&3-The prior line on last year's statement is combined with the year 2006 total. Paid amounts prior to 2007 are then subtracted from this sum to arrive at the prior figure.

Part 4-The sum of the prior year line and the 2006 line from the prior year's Schedule P compose the prior figures for this section.

Part 5 Section 1&3-The prior line is combined with year 2005 from the prior schedule P. Counts for accident year 2006 in the preceding year are then subtracted from this sum to arrive at the prior figure, removing the cumulative effect.

Part 5 Section 2 - The prior line is combined with the 2006 AY of the prior year's Schedule P to arrive at the new prior number.
