NOTES TO THE FINANCIAL STATEMENTS

Note 1 – Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The accompanying statutory financial statements of Veterinary Pet Insurance Company (the Company) have been prepared in conformity with accounting practices prescribed or permitted by the National Association of Insurance Commissioners (NAIC) and the State of Ohio.

The Ohio Department of Insurance recognizes only statutory accounting practices (SAP) prescribed or permitted by the State of Ohio for determining and reporting the financial condition and results of operations of an insurance company, as well as, determining its solvency under the Ohio Insurance law. The NAIC's *Accounting Practices and Procedures Manual* (NAIC SAP) has been adopted as a component of prescribed or permitted practices by the State of Ohio. The Company has no statutory accounting practices that differ from NAIC SAP.

A reconciliation of the Company's net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the State of Ohio is shown below:

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of statutory financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policies

Federal Income Taxes. The Company's parent, Nationwide Mutual Insurance Company (Mutual), files a consolidated federal income tax return, which includes all eligible U.S. subsidiaries and affiliates. In this regard, the included subsidiaries and affiliates pay to Mutual the amount which would have been payable on a separate return basis without regard to the alternative minimum tax. Mutual pays tax due on a consolidated basis.

The Company provides for federal income taxes based on amounts the Company believes it will ultimately owe. Inherent in the provision for federal income taxes are estimates regarding the deductibility of certain items and the realization of certain tax credits. In the event the ultimate deductibility of certain items or the realization of certain tax credits differs from estimates, the Company may be required to change the provision for federal income taxes recorded in the financial statements which could be significant. Management has used best estimates to establish reserves based on current facts and circumstances regarding tax exposure items where the ultimate deductibility is open to interpretation.

In accordance with guidance specified in the NAIC SAP, the Company utilizes the asset and liability method of accounting for income taxes. Under this method, deferred tax assets (DTA), net of any non-admitted portion and statutory valuation allowance, and deferred tax liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax basis. DTAs and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The change in deferred taxes, excluding the impact of taxes on unrealized capital gains or losses and nonadmitted deferred taxes, is charged directly to surplus.

Reinsurance Recoverables. The Company cedes insurance to other companies in order to limit potential losses and diversify its exposure. Such agreements do not relieve the Company of its primary obligation to the policyholder in the event the reinsurer is unable to meet the obligations it has assumed. The Company monitors the financial condition of reinsurers on an ongoing basis and reviews its reinsurance agreements regularly in an attempt to minimize its exposure to significant losses from reinsurer insolvencies. Reinsurance recoverables include amounts billed to reinsurers on losses paid. Estimates of amounts expected to be recovered from reinsurers that have not yet been paid on losses are estimated in a manner consistent with the claim liability associated with the underlying policy. Such reinsurance recoverables and reserved deductions partially offset claim costs in the Company's statutory statements of operations and are included as an offset to losses and loss expense reserves in the accompanying statutory statements of admitted assets, liabilities and surplus. There were no contracts using deposit accounting as of December 31, 2016 and 2015.

Statutory accounting principles require recognition of a minimum liability for certain unsecured or overdue reinsurance recoverables. As of December 31, 2016 and 2015, the Company had no provision related to conditional reinsurance recoverables.

In addition, the Company uses the following accounting policies:

1. Short-term investments consist of investments with maturities of twelve months or less at acquisition and are stated at amortized cost, which approximates fair value.
2. Bonds, excluding loan-backed and structured securities, are stated at amortized cost except those with a NAIC designation of "3" through "6" which are stated at the lower of amortized cost or fair value. Amortization of premiums and discounts is calculated using the effective yield method.
3. Unaffiliated common stocks are reported at fair value.
4. Redeemable preferred stocks
Not applicable.
5. Mortgage loans
Not applicable.

NOTES TO THE FINANCIAL STATEMENTS

6.

Loan-backed and structured securities (collectively, loan-backed securities) are stated at amortized cost or the lower of amortized cost or fair value in accordance with the provisions of Statement of Statutory Accounting Principles No. 43-Revised and the Purposes and Procedures Manual of the NAIC Securities Valuation Office. The retrospective adjustment method is used to value loan-backed securities where the collection of all contractual cash flows is probable. For all other loan-backed securities, the Company uses the prospective adjustment method.
7.

Investments in subsidiary and affiliated companies are stated as follows:

Non-insurance subsidiaries, DVM Insurance Agency, Inc. (DVM) and VPI Services, Inc. (VPIS), are carried at their values in accordance with SSAP 97 - *Investments in Subsidiary, Controlled and Affiliated Entities*.
8.

Investments in joint ventures and partnerships

Not applicable.
9.

Accounting for derivatives

Not applicable.
10.

Insurance premiums are generally earned ratably over the policy term. The liability for unearned premiums represents the portion of premiums written relating to the unexpired terms of coverage. Such reserves are computed by pro rata methods for direct business and are based on reports received from ceding companies for reinsurance assumed. Premiums in course of collection represent agent balances and uncollected premiums from policyholders for current policies in force and policy premiums assumed from others, including amounts placed with affiliates. As of December 31, 2016 and 2015, the Company had no liabilities related to premium deficiency reserves. The Company policy allows for anticipated investment income to be included when calculating its premium deficiency reserves, in accordance with SSAP No. 53, Property-Casualty Contracts – Premiums. However, as of December 31, 2016 and 2015, anticipated investment income was not included in the premium deficiency reserves calculation.
11.

Unpaid losses and loss adjustment expenses include an amount based on past experience, for losses incurred but not reported. Such liabilities are necessarily based on assumptions and estimates and while management believes the amounts are adequate, the ultimate liabilities may be in excess of or less than the amount provided. The methods for making such estimates and for establishing the resulting liabilities are continually reviewed and any adjustments are reflected in the period determined.
12.

The Company has a written capitalization policy for prepaid expenses and purchases of items such as electronic data processing equipment, software, furniture, vehicles, other equipment and leasehold improvements. The Company has not modified its capitalization policy from the prior period.

4. All impaired securities (fair value is less than cost or amortized cost) for which an other-than-temporary impairment has not been recognized in earnings as a realized loss (including securities with a recognized other-than-temporary impairment for non-interest related declines when a non-recognized interest related impairment remains):

a. The aggregate amount of unrealized losses:

1.	Less than 12 Months	\$	(120,587)
2.	12 Months or Longer	\$	-

b. The aggregate related fair value of securities with unrealized losses:

1.	Less than 12 Months	\$	7,286,649
2.	12 Months or Longer	\$	-

NOTES TO THE FINANCIAL STATEMENTS

5. The Company reviews all loan-backed and structured securities in which the fair value of the given security is less than the amortized cost to determine if a given security is other-than-temporarily impaired. The Company examines characteristics of the underlying collateral, such as delinquency and default rates, the quality of the underlying borrower, the type of collateral in the pool, the vintage year of the collateral, subordination levels within the structure of the collateral pool, and the quality of any credit guarantors, to determine the cash flows expected to be received for the security.

If the severity and duration of the security's unrealized loss indicates a risk of an other-than-temporary impairment, then the Company will evaluate if the amortized cost basis of the security will be recovered by comparing the present value of the cash flows expected to be received for the given security with the amortized cost basis of the security. If the present value of cash flows is greater than the amortized cost basis of a security then the security is deemed not to be other-than-temporarily impaired.

Effective January 1, 2015, the consolidated federal income tax filing group of which the Company is a member expanded to include Mutual's eligible life insurance subsidiaries and non-insurance subsidiaries of the life insurance companies.

2. Effective January 1, 2015, the Company became a party to a revised tax sharing agreement which was approved by the Board of Directors. The revised tax sharing agreement reflects Mutual's new consolidated federal return group which includes its eligible life and non-life subsidiaries. The method of allocation among the companies is based upon separate return calculations with current benefit for tax losses and credits utilized in the consolidated return.

G. Federal or Foreign Federal Income Tax Loss Contingencies

The Company does not have any tax loss contingencies for which it is reasonably possible that the total liability will significantly increase within twelve months of the reporting date.

Note 10 - Information Concerning Parent, Subsidiaries, Affiliates and Other Related Parties

A., B., C. Nature of Relationships and Description of Transactions

Veterinary Pet Insurance Company (the Company or VPI) is affiliated with the following entities: DVM Insurance Agency, Inc. (DVM), and VPI Services, Inc. (VPIS). DVM and VPIS are wholly-owned subsidiaries of the Company. Neither of the subsidiaries has employees. Such entities have been established for the following arrangements.

DVM

DVM, a licensed, nonresident insurance agency in all states outside California, places all insurance written outside California with National Casualty Company (NCC), which is owned 100% by Mutual. Mutual also owns 100% of Scottsdale Insurance Company (SIC). NCC cedes 100% of the business generated through DVM to SIC. Prior to January 1, 2016, VPI assumed 100% of the non-California business generated through DVM from SIC.

DVM acts in the capacity for the collection of premiums and the payment of losses and receives an agency commission. DVM, in turn, remits all income received from SIC to the Company, which provides all services on behalf of DVM. Agency commission income totaled approximately \$74.4 million and \$64.0 million for the years ended December 31, 2016 and 2015, respectively, and is included as a reduction of other underwriting expenses. Ceding commission expense paid by VPI to SIC, also included in other underwriting expenses, totaled approximately \$70.7 million for the year ended December 31, 2015. No ceding commission expense was paid during 2016 due to the 100% quota share agreement between VPI and SIC that was entered into on January 1, 2016. Refer to Note 26 for additional details.

In accordance with SSAP No. 97, VPI recorded its investment in DVM at the statutory equity of DVM. DVM, acquired by VPI in 2003, had an equity balance of approximately \$72 thousand at December 31, 2016, and a negative equity balance of approximately \$(1.8) million at December 31, 2015. The investment in DVM is nonadmitted for statutory reporting as of December 31, 2016.

On September 29, 2016, the Company made a non-cash capital contribution of \$1.9 million to DVM.

VPIS

VPIS administers most non-insurance related programs for the Company. General and administrative operating expenses are apportioned to VPIS based on appropriate time studies, activity counts, expense sharing or other appropriate methods of allocation. Transactions between the Company and VPIS are settled according to the terms of their written agreement.

NOTES TO THE FINANCIAL STATEMENTS

VPIS offers administrative services to veterinary practices that offer and manage a monthly billed pet wellness program to pet owners. During the year ended December 31, 2015, the Company made a capital contribution of \$5.0 million to VPIS for this business. The Company did not make any capital contributions to VPIS during 2016.

During 2015, VPIS decided to discontinue offering its preventive and wellness services program, resulting in the recognition of a \$12.8 million realized loss for the Company's investment in VPIS. The adjusted fair value of the Company's investment in VPIS was determined using estimated discounted cash flow analyses.

VPI recorded its investment in VPIS at the equity of VPIS. VPIS was acquired by VPI in 2005 and had a \$1.2 million and a \$0.9 million equity balance at December 31, 2016 and 2015, respectively. The investment in VPIS is nonadmitted for statutory reporting as of December 31, 2016.

The following information is a summary of the financial position of the Company's wholly owned subsidiaries, DVM and VPIS, as of and for the years ended December 31:

	2016				2015			
	DVM		VPIS		DVM		VPIS	
Total Assets	\$	562,252	\$	2,615,708	\$	86,448,154	\$	2,794,411

SIC / Mutual

The Company is a wholly-owned subsidiary of SIC. SIC is a wholly-owned subsidiary of Mutual.

D. Amounts Due to or from Related Parties

Affiliate receivables and payables are the result of cost sharing and intercompany service agreements between the Company and its affiliates in which settlement has not yet occurred. Affiliate receivables are presented gross of affiliate payables when the Company has the right to offset. The gross amounts due from affiliates were \$101,341,017 and \$13,141,018 as of December 31, 2016 and 2015, respectively. The gross amounts due to affiliates were \$114,591,493 and \$2,713,738 as of December 31, 2016 and 2015, respectively. These arrangements are subject to written agreements which require that intercompany balances be settled within 30 days.

E. Guarantees or Undertakings for Related Parties

The Company has no guarantees or contingent commitments to affiliates.

F. Management, Service Contracts, Cost Sharing Arrangements

The Company and various affiliates share a home office, other facilities, equipment, common management and administrative services. Pursuant to a cost sharing agreement between the companies, the amounts associated with these services are subject to allocation based on standard allocation techniques and procedures acceptable under general cost accounting techniques and procedures in conformity with the NAIC SAP. Measures used to determine the allocation among companies includes individual employee estimates of time spent, special cost studies, claims counts, policies in force, direct written premium, paid losses, pro rata share of employees or their salaries, and other methods agreed to by the participating companies. The Company does not believe amounts recognized under the intercompany agreement are materially different than what would have been recognized had the Company operated on a stand-alone basis.

Note 20 – Fair Value Measurements

A. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair value measurements are based upon observable and unobservable inputs. Observable inputs reflect market data obtained from independent sources while unobservable inputs reflect the Company's view of market assumptions in the absence of observable market information. The Company utilizes valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs. In determining fair value, the Company uses various methods including market, income and cost approaches.

The Company categorizes its financial assets and liabilities into a three-level hierarchy based on the priority of the inputs to the valuation technique. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). If the inputs used to measure fair value fall within different levels of the hierarchy, the category level is based on the lowest priority level input that is significant to the fair value measurement of the instrument in its entirety.

The Company categorizes financial assets and liabilities as follows:

Level 1. Unadjusted quoted prices accessible in active markets for identical assets or liabilities at the measurement date and mutual funds where the value per share (unit) is determined and published daily and is the basis for current transactions.

Level 2. Unadjusted quoted prices for similar assets or liabilities in active markets or inputs (other than quoted prices) that are observable or that are derived principally from or corroborated by observable market data through correlation or other means. Primary inputs to this valuation technique may include comparative trades, bid/asks, interest rate movements, U.S. Treasury rates, U.S. LIBOR, prime rates, cash flows, maturity dates, call ability, estimated prepayments and/or underlying collateral values.

Level 3. Prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement. Inputs reflect management's best estimate about the assumptions market participants would use at the measurement date in pricing the asset or liability. Consideration is given to the risk inherent in both the method of valuation and the valuation inputs. Primary inputs to this valuation technique include broker quotes and comparative trades.

The Company reviews its fair value hierarchy classifications for financial assets and liabilities quarterly. Changes in observability of significant valuation inputs identified during these reviews may trigger reclassifications. Reclassifications are reported as transfers at the beginning of the period in which the change occurs.

To determine the fair value of bonds and stocks for which market quotations are available, independent pricing services are most often utilized. For these bonds and stocks, the Company obtains the pricing services' methodologies, inputs and assumptions and classifies the investments accordingly in the fair value hierarchy.

A corporate pricing matrix is used in valuing certain corporate bonds. The corporate pricing matrix was developed using publicly available spreads for privately placed corporate securities with varying weighted average lives and credit quality ratings. The weighted average life and credit quality rating of a particular bond to be priced using the corporate pricing matrix are important inputs into the model and are used to determine a corresponding spread that is added to the appropriate U.S. Treasury yield to create an estimated market yield for that bond. The estimated market yield and other relevant factors are then used to estimate the fair value of the particular bond.

Non-binding broker quotes are also utilized to determine the fair value of certain bonds when quotes are not available from independent pricing services or a corporate pricing matrix. These bonds are classified accordingly in the fair value hierarchy as only one broker quote is ordinarily obtained, the investment is not traded on an exchange, the pricing is not available to other entities and/or the transaction volume in the same or similar investments has decreased. Inputs used in the development of prices are not provided to the Company by the brokers as the brokers often do not provide the necessary transparency into their quotes and methodologies. Broker quotes are subject to validation of price movements that require approval from the Company's management. Management uses its knowledge of the investment and current market conditions to determine if the price is indicative of the investment's fair value.

30.

Provide the following information for all short-term and long-term bonds and all preferred stocks. Do not substitute amortized value or statement value for fair value.

		1	2	3
		Statement (Admitted) Value	Fair Value	Excess of Statement over Fair Value (-), or Fair Value over Statement (+)
30.1	Bonds	109,112,114	110,419,523	1,307,409
30.2	Preferred Stocks	0	0	0
30.3	Totals	109,112,114	110,419,523	1,307,409

30.4

Describe the sources or methods utilized in determining the fair values:
For fixed maturity and marketable equity securities for which market quotations generally are available, Nationwide generally uses independent pricing services to assist in determining the fair value measurement. For certain fixed maturity securities not priced by independent services (generally private placement securities without quoted market prices), an internally developed pricing model or "corporate pricing matrix" is most often used. The corporate pricing matrix is developed by obtaining private spreads versus the U.S. Treasury yield for corporate securities with varying weighted average lives and bond ratings. The weighted average life and bond rating of a particular fixed maturity security to be priced using the corporate matrix are important inputs into the model and are used to determine a corresponding spread that is added to the U.S. Treasury yield to create an estimated market yield for that bond. The estimated market yield and other relevant factors are then used to estimate the fair value of the particular fixed maturity security. Nationwide also utilized broker quotes to assist in pricing securities or to validate modeled prices.

31.1

Was the rate used to calculate fair value determined by a broker or custodian for any of the securities in Schedule D?

Yes [X] No []

31.2

If the answer to 31.1 is yes, does the reporting entity have a copy of the broker's or custodian's pricing policy (hard copy or electronic copy) for all brokers or custodians used as a pricing source?

Yes [] No [X]

31.3

If the answer to 31.2 is no, describe the reporting entity's process for determining a reliable pricing source for purposes of disclosure of fair value for Schedule D:
Nationwide relies on broker valuations only when an approved third party vendor evaluation is not available. Any exceptions are approved by Risk Management and the Middle Office and reviewed by the Investments Pricing Committee. The brokers used to value securities are deemed to be main market makers for each individual security and therefore have in depth knowledge of the particular issue.

32.1

Have all the filing requirements of the *Purposes and Procedures Manual of the NAIC Investment Analysis Office* been followed?
