NOTES TO FINANCIAL STATEMENTS**Note 1 – Summary of Significant Accounting Policies and Going Concern**

A. Accounting Practices

The financial statements of Falls Lake National Insurance Company ("the Company") are presented on the basis of accounting practices prescribed or permitted by the Ohio Department of Insurance.

The Ohio Department of Insurance recognizes only statutory accounting practices prescribed or permitted by the state of Ohio for determining and reporting the financial condition and results of operations of an insurance company, for purposes of determining its solvency under the Ohio Insurance Law. The National Association of Insurance Commissioners ("NAIC") *Accounting Practices and Procedures Manual* (NAIC SAP) has been adopted as a component of prescribed or permitted practices by the state of Ohio. The Insurance Commissioner has the right to permit other specific practices that deviate from prescribed practices.

Note 5 – Investments

D. Loan-Backed Securities

- (1) Prepayment assumptions for mortgage-backed securities, collateralized mortgage obligations and other structured securities were generated using a purchased prepayment model. The prepayment model uses a number of factors to estimate prepayment activity including the time of year (seasonality), current levels of interest rates (refinancing incentive), economic activity (including housing turnover) and term and age of the underlying collateral (burnout, seasoning).
- (2) For the year quarter ended March 31, 2017, the Company did not recognize any other-than-temporary impairments for loan-backed and structured securities as a result of the Company's intent to sell or inability (or lack of intent) to retain the security for a period of time sufficient to recover the amortized cost basis.
- (3) Recognized OTTI securities
At March 31, 2017 the Company held no securities with a recognized other-than-temporary impairment.
- (4) All impaired securities (fair value is less than cost or amortized cost) for which an other-than-temporary impairment has not been recognized in earnings as a realized loss (including securities with a recognized other-than-temporary impairment for non-interest related declines when a non-recognized interest related impairment remains):

a. The aggregate amount of unrealized losses:	1. Less than 12 Months	\$ 22,718
	2. 12 Months or Longer	
b. The aggregate related fair value of securities with unrealized losses:	1. Less than 12 Months	\$ 1,313,117
	2. 12 Months or Longer	

NOTES TO FINANCIAL STATEMENTS

(5) The Company's management regularly reviews the value of investments. If the value of an investment falls below its cost basis, the decline is analyzed to determine whether it is an other-than-temporary decline in value. To make this determination, the following are considered:

- (a) How long and by how much the fair value has been below its cost;
- (b) The financial condition and near-term prospects of the issuer of the security, including any specific events that may affect its operations;
- (c) Management's intent to hold the security long enough for it to recover its value;
- (d) Any downgrades of the security by a rating agency; and
- (e) Any nonpayment of scheduled interest payments.

Based on that analysis, management makes a judgment as to whether the loss is other-than-temporary. If the loss is other-than-temporary, the impairment is recognized as a realized capital loss in the Statement of Income in the period the determination is made.

Note 20 – Fair Value Measurements

- A. Fair value measurements for fixed income and equity securities are based on values either published by the NAIC's Security Valuation Office (SVO) or from an independent pricing service vendor. Under certain circumstances, if neither an SVO price nor vendor price is available, a price may be obtained from a broker. Short term securities and cash equivalents are valued at amortized cost.

When published prices from the SVO are not available, the Company's investment manager relies predominantly on independent pricing service vendors that have been evaluated and approved by the investment manager's internal pricing policy committee. Generally, pricing service vendors use a pricing methodology involving the market approach, including pricing models, which use prices and relevant market information regarding a particular security or securities with similar characteristics to establish a valuation.

For statutory accounting, certain investments are carried at fair value, while others may periodically be carried at fair value based on certain factors such as the NAIC's lower of cost or market rule or an impairment. Assets recorded at fair value are categorized based on an evaluation of the various inputs used to measure the fair value. Supporting documentation received from pricing vendors detailing the inputs, models and processes used in the vendor's evaluation process is used to determine the appropriate fair value hierarchy. Documentation from each pricing vendor is reviewed and monitored periodically to ensure they are consistent with the investment manager's pricing policy procedures. Market information obtained from brokers with respect to security valuations is also considered in the pricing hierarchy.

The Company attempts to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. There are three levels of inputs that may be used to measure fair value: (1) Level 1: quoted price (unadjusted) in active markets for identical assets, (2) Level 2: inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets, and inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the instrument, and (3) Level 3: inputs to the valuation methodology are unobservable for the asset or liability.

Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date.

To measure fair value, the Company obtains quoted market prices for its investment securities. If a quoted market price is not available, the Company uses prices of similar securities. Values for U.S. Treasury and publicly traded equity securities are generally based on Level 1 inputs which use the market approach valuation technique. The values for all other bonds (including state and municipal securities and obligations of U.S. government corporations and agencies) generally incorporate significant Level 2 inputs using the market approach and income approach valuation techniques. There have been no changes in the Company's use of valuation techniques during 2017. There were no transfers between Level 1 and Level 2 or between Level 2 and Level 3 during 2017.

Reserves, net of Reins Recoverables at End of Period	\$ 14,733,086	\$ 13,991,871

Reserves for incurred losses and LAE attributable to insured events of prior years, decreased by approximately \$92 thousand in 2017, resulting primarily from other liability lines of business. This change is the result of an ongoing analysis of recent development trends and additional information regarding individual claims. These results are attributable to the business retained from the intercompany reinsurance pooling agreement of which the Company holds 7%.
