Note: Supplemental disclosures of cash flow information for non-cash transactions:

20.0001 Noncash financing activities			
20.0002 Dividends and return of capital			(3,300,000)
20.0003			

NOTES TO FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies

A. Accounting Practices

The Ohio Department of Insurance recognizes only statutory accounting practices prescribed or permitted by the State of Ohio for determining and reporting the financial condition and results of operations of an insurance company, and for determining its solvency under the Ohio Insurance Law. The National Association of Insurance Commissioners ("NAIC") *Accounting Practices and Procedures Manual* ("NAIC SAP") has been adopted as a component of prescribed or permitted practices by the State of Ohio. The state of Ohio has adopted certain prescribed accounting practices that differ from those found in NAIC SAP. Specifically, the timing of amounts released from the statutory premium reserve under Ohio's required practice differs from NAIC SAP.

A reconciliation of the Company's capital and surplus between NAIC SAP and practices prescribed and permitted by the State of Ohio are shown below:

	SSAP#	FS Page	FS Line#	2017	2016
<u>Net Income</u>					
State of Ohio Basis				\$ 521,707	\$ 2,114,314
State Prescribed Practice that incr/(decr) NAIC SAP					
Statutory Premium Reserve Recovery, net of tax	57	3	2	(205,070)	391,853
NAIC SAP				\$ 316,637	\$ 2,506,167
<u>Surplus</u>					
State of Ohio Basis				\$ 11,182,930	\$ 10,517,989

No change.

20. Fair Value Measurements

A. The fair value of debt securities is based on the market values obtained from an independent pricing service that are evaluated using pricing models that vary by asset class and incorporate available trade, bid and other market information and price quotes from well-established independent broker-dealers. The independent pricing service monitors market indicators, industry and economic events, and for broker-quoted only securities, obtains quotes from market makers or broker-dealers that it recognizes to be market participants. The pricing service utilizes the market approach in determining the fair value of the debt securities held. Additionally, to the extent possible, the Company obtains an understanding of the valuation models and assumptions utilized by the service and has controls in place to determine that the values provided represent fair value. The validation procedures include comparing prices received from the pricing service to quotes received from other third party sources for securities with market prices that are readily verifiable. If the price comparison results in differences over a predefined threshold, the Company will assess the reasonableness of the changes relative to prior periods given the prevailing market conditions and assess changes in the issuers' credit worthiness, performance of any underlying collateral and prices of the instrument relative to similar issuances.

Typical inputs and assumptions to pricing models used to value U.S. Treasury bonds, governmental agency bonds, governmental agency mortgage-backed securities, municipal bonds, foreign bonds and corporate debt securities include, but are not limited to, benchmark yields, reported trades, broker-dealer quotes, credit spreads, credit ratings, bond insurance (if applicable), benchmark securities, bids, offers, reference data and industry and economic events. For mortgage-backed securities, inputs and assumptions may also include the structure of issuance, characteristics of the issuer, collateral attributes and prepayment speeds. The fair value of non-agency mortgage-backed securities is obtained from the independent pricing service referenced above and subject to the validation procedures discussed above.

The Company's financial assets measured at fair value have been classified, for disclosure purposes, based on a hierarchy. The hierarchy gives the highest ranking to fair values determined using unadjusted quoted prices in active markets for identical assets (Level 1) and the lowest ranking to fair values determined using methodologies and models with unobservable inputs (Level 3). An asset's classification is based on the lowest level input that is significant to its measurement. For example, a

NOTES TO FINANCIAL STATEMENTS

Level 3 fair value measurement may include inputs that are both observable (Levels 1 and 2) and unobservable (Level 3). The levels of the fair value hierarchy are as follows:

Level 1: Observable inputs that reflect quoted prices for identical assets or liabilities in active markets that the company has the ability to access at the measurement date. Level 1 securities include highly liquid money market funds, certain mortgage-backed securities, and exchange traded equity and derivative securities.

Level 2: Quoted prices in markets that are not active or significant inputs that are observable either directly or indirectly. Level 2 inputs include the following:

- a. Quoted prices for similar assets or liabilities in active markets;
- b. Quoted prices for identical or similar assets or liabilities in non-active markets;
- c. Inputs other than quoted market prices that are observable;
- d. Inputs that are derived principally from or corroborated by observable market data through correlation or other means.

Level 3: Prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement. These reflect management's own judgments about the assumptions a market participant would use in pricing the asset or liability.

There were investments requiring fair value measurements as of September 30, 2016.
