## B. Use of Estimates

The preparation of financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

## C. Accounting Policies

Premiums are earned over the terms of the related insurance policies and reinsurance contracts. Unearned premium reserves are established to cover the unexpired portion of premiums written. Such reserves are computed by pro rata methods for direct business and are based on reports received from ceding companies for reinsurance. Expenses incurred in connection with acquiring new insurance business, including such acquisition cost as sales commissions, are charged to operations as incurred. Expenses incurred are reduced for ceding allowances received or receivable.

In addition, the Company uses the following accounting policies:

1. Short-term investments are stated at amortized value using the interest method. Non-investment grade short-term investments are stated at the lower of amortized value or fair value.
2. Investment grade bonds not backed by other loans are stated at amortized value using the interest method. Non-investment grade bonds with NAIC designations of 3 through 6 are stated at the lower of amortized value or fair value.
3. Common stocks, other than investments in stocks of subsidiaries and affiliates, are stated at fair value.
4. Investment grade redeemable preferred stocks are stated at amortized value. Investment grade perpetual preferred stocks are stated at fair value. Non-investment grade preferred stocks are stated at the lower amortized value or fair value.
5. Unpaid losses and loss adjustment expenses include an amount determined from individual case estimates and loss reports and an amount, based on past experience, for losses incurred but not reported. Such liabilities are necessarily based on assumptions and estimates and while management believes the amounts are adequate, the ultimate liabilities may be in excess of or less than the amount provided. The methods of making such estimates and for establishing the resulting liabilities are continually reviewed and any adjustments are reflected in the period determined.
6. The Company has a written capitalization policy for prepaid expenses and purchases of items such as electronic data processing equipment, software, furniture, vehicles, other equipment and leasehold improvements.

Note 20 Fair Value Measurements

## A. Inputs Used for Assets and Liabilities Measured at Fair Value

## 1. Fair Value Measurements by Level 1, 2, and 3

The Company has categorized its assets and liabilities that are measured at fair value into the three-level fair value hierarchy as reflected in the table below. The three-level value hierarchy is based on the degree of subjectivity inherent in the valuation method by which fair value was determined. The three levels are defined as follows.

**Level 1- Quoted Prices in Active Markets for Identical Assets and Liabilities:** This category, for items measured at fair value on a recurring basis, including exchange-traded preferred and common stocks. It also includes derivative liabilities for written call options on common stock which are also exchange traded. The estimated fair value of the equity securities and derivatives within this category are based on quoted prices in active markets and are thus classified as Level 1.

**Level 2- Significant Other Observable Inputs:** This category for items measured at fair value on a recurring basis includes bonds, preferred stocks and common stocks which are not exchange-traded. The estimated fair values of some of these items were determined by independent pricing services using observable inputs. Other were based on quotes from markets which were not considered actively traded.

**Level 3 – Significant Unobservable Inputs:** The Company has no assets or liabilities measured at fair value in this category.

The following table provides information as of June 30, 2017 about the Company's financial assets measured at fair value on a recurring basis:

	Quoted prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level II)	Significant Unobservable Inputs (Level III)	Total at June 30, 2017
Bonds	\$50,531,635	\$	\$	\$50,531,635
Common stocks	10,221,931	147,937		10,369,868
Preferred stocks	73,444			73,444
<b>Total</b>	<b>\$60,827,010</b>	<b>\$ 147,937</b>	<b>\$</b>	<b>\$60,974,947</b>

At the end of each reporting period, the Company evaluates whether or not any event has occurred or circumstances have changed that would cause an instrument to be transferred between Levels 1 and 2. This policy also applies to transfers into or out of Level 3 as stated in paragraph 3 below.

## 2. Rollforward of Level 3 Items

The Company has no assets or liabilities measured at fair value in the Level 3 category.

## 3. Policy on Transfers Into and Out of Level 3

At the end of each reporting period, the Company evaluates whether or not any event has occurred or circumstances have changed that would cause an instrument to be transferred into or out of Level 3. During the current year, no transfers into or out of Level 3 were required.

## 4. Inputs and Techniques Used for Level 2 and Level 3 Fair Values

The Company has no assets or liabilities measured at fair value in the Level 3 category.

Common stock carried at fair value categorized as Level 2 were valued using a market approach. These valuations were determined to be Level 2 valuations because quoted market prices for identical instruments trading in an inactive market were utilized. When an equity instrument is illiquid due to limited trading activity, the use of quoted markets for identical instruments was determined by the Company to be the most reliable method to determine fair value.

## 5. Derivative Fair Values

Not applicable

## B Other Fair Value Disclosure

Not applicable

## C. Fair Values for All Financial Instruments by Levels 1, 2, and 3

The table below reflects the fair value and admitted values of all admitted assets and liabilities that are financial instruments excluding those accounted for under the equity method (subsidiaries, joint ventures and ventures). The fair values are also categorized into the three-level fair value hierarchy as described above in Note 20A. This was not practicable for mortgage loans as described below in Note 20D.

Type of Financial Instrument	Fair Value in Investment Schedule	Admitted Value in Investment Schedule	Level 1	Level 2	Level 3
Financial instruments - assets					
Bonds	50,531,635	50,511,486	50,531,635		
Preferred Stocks	73,444	40,853	73,444		
Common Stock	10,369,868	10,369,868	10,221,931	147,937	
Cash	1,725,597	1,725,597	1,725,597		
Short-term investments	3,845	3,845	3,845		
Mortgage Loan		12,173			
Total Assets	62,704,389	62,663,822	62,556,452	147,937	

## D. Items for which Not Practicable to Estimate Fair Values

It's not practical to determine the fair value of mortgage loans for the purpose of the above disclosure of Note 20C due to the fact that these items are not traded and therefore quoted market prices are not available. Also, the cost of obtaining estimates of fair values from other sources is considered excessive given the immateriality of the mortgage loans.

## F. Subprime Mortgage Related Risk Exposure

The Company invests in several asset classes that could potentially be adversely affected by subprime mortgage exposure. These investments include bond, mortgage loans, mortgage-backed securities and equity investments in financial institutions. The company believes that its greatest exposure is to unrealized losses from declines in asset values versus realized losses resulting from defaults or foreclosures. Conservative lending and investment practices limit the company's exposure to such losses.
