NOTES TO FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies and Going Concern

A. The accompanying financial statements of Permanent General Assurance Corporation have been prepared in accordance with the NAIC Accounting Practices and Procedures Manual except to the extent that Ohio law differs. However, as of this Statement date, there have been no requests from the State of Ohio to depart from the prescribed NAIC guidelines.

A reconciliation of the Company's net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the state of Ohio is shown below:

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policy

Premiums are earned over the terms of the related insurance policies. Unearned premium reserves are established to cover the unexpired portion of premiums written. Such reserves are computed by pro rata methods for direct business.

Expenses incurred in connection with acquiring new insurance business, including such acquisition costs as sales commissions, are charged to operations as incurred. Expenses incurred are reduced for ceding allowances received or receivable.

(1) Investments in short-term bonds rated "1" (highest quality), or "2" (high quality) by the Securities Valuation Office ("SVO") of the NAIC are reported in the financial statements at amortized cost. Bonds rated "3" (medium quality), "4" (low quality), "5" (lower quality), or "6" (lowest quality) by the SVO are reported at the lower of amortized cost or fair value. The interest method is used to amortize any purchase premium or discount, including estimates of future prepayments obtained from independent sources. Money market mutual funds are recorded at amortized cost, which approximates fair market value.

(2) Investments in bonds rated "1" (highest quality), or "2" (high quality) by the Securities Valuation Office ("SVO") of the NAIC are reported in the financial statements at amortized cost. Bonds rated "3" (medium quality), "4" (low quality), "5" (lower quality), or "6" (lowest quality) by the SVO are reported at the lower of amortized cost or fair value. Investments in commercial mortgage backed securities (CMBS) and non-agency residential mortgage backed securities (RMBS) utilize a two step process to obtain a valuation and rating in accordance with SSAP 43R, Loan Backed and Structured Securities. The first step derives a rating for valuation by comparing the current amortized cost to the modeled range of values assigned to the six NAIC designations for each security. This determines whether the securities are stated at the lower of amortized cost or fair value per the above rules. The second step utilizes the same modeled range of values to derive a rating for reporting using the current carrying value as determined in the first step.

Ratings and valuations for investments in asset backed securities, loan backed securities, and structured securities (other than Equipment Trust Certificates and Credit Tenant Leases) that are otherwise rated by a credit rating provider (CRP) are calculated using a two step process. The first step derives a rating for valuation based on the CRP rating and the NAIC model valuation table. The second step utilizes the model valuation table to derive a rating for reporting using the current carrying value as determined in the first step. Securities whose initial rating is NAIC 1 or NAIC 6 in step one are not further modified by step two. The interest method is used to amortize any purchase premium or discount, including estimates of future prepayments obtained from independent sources.

(3) Common stocks, if owned are stated at market with exception to the stock of PGAC's wholly owned subsidiary (which is valued as described in the NAIC Valuation of Securities Manual).

(4) The Company holds no preferred stock as of the statement date.

(5) The Company holds no mortgage loans.

(6) Loan-backed securities are valued at amortized cost using the interest method, including anticipated prepayments at the date of purchase. These values are adjusted for updated prepayment information using the retrospective method.

(7) The Company values PGA Service Corporation (a wholly owned subsidiary) in accordance with the NAIC policies and procedures manual.

(8) The company has no investments in joint ventures, partnerships or limited liability companies.

(9) The company has no investments in derivatives.

(10) The Company does not anticipate investment income as a factor in the premium deficiency calculation.

(11) Reserve for losses represents the estimated liability for claims reported to the Company and an amount, based on actuarially determined reserves for losses incurred but not reported. Such liabilities are necessarily based on assumptions and estimates and while management believes the

NOTES TO FINANCIAL STATEMENTS

amount is adequate, the ultimate liability may be in excess of or less than the amount provided. The methods for making such estimates and for establishing the resulting liability is continually reviewed and any adjustments are reflected in the period determined.

(12) The Company has not modified its capitalization policy from the prior year.
 (13) The Company has no pharmaceutical rebate receivables.

20. Fair Value Measurements.

A. (1) The following summarizes the Company's financial assets carried at fair value as of June 30, 2017.

Description for each class of asset or liability	(Level 1)	(Level 2)	(Level 3)	Total
Assets at fair value				
Bonds Corporates	0	1,042,278	0	1,042,278
Short-Term Investments	13,337,489	0	0	13,337,489
Total assets at fair value	13,337,489	1,042,278	0	14,379,767

There were no material transfers between Levels 1 and 2 during the second quarter of 2017.

(2) The Company held no Level 3 assets carried at fair value as of June 30, 2017.

(3) There were no material transfers into or out of Level 3 during the second quarter of 2017.

(4) The Financial assets and financial liabilities recorded on the Balance Sheet at fair value are categorized based on the reliability of inputs to the valuation techniques as follows:

NOTES TO FINANCIAL STATEMENTS

Level 1 Financial assets and financial liabilities whose values are based on unadjusted quoted prices for identical assets or liabilities in an active market that the Company can access.

Level 2 Financial assets and financial liabilities whose values are based on the following:

Quoted prices for similar assets or liabilities in active markets;

Quoted Prices for identical or similar assets or liabilities in non-active markets; or

Valuation models whose inputs are observable, directly or indirectly, for substantially the full term of the asset or liability.

Level 3 Financial assets and financial liabilities whose values are based on prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement. These inputs may reflect the Company's estimates of the assumptions that market participants would use in valuing the financial assets and financial liabilities.

The availability of observable inputs varies by instrument. In situations where fair value is based on internally developed pricing models or inputs that are unobservable in the market, the determination of fair value requires more judgment. In many instances, inputs used to measure fair value fall into different levels of the fair value hierarchy. In those instances, for disclosure purposes, the level in the fair value hierarchy within which the fair value measurement is categorized is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

The fair value guidance establishes a hierarchy for inputs used in determining fair value that maximize the use of observable inputs and minimizes the use of unobservable inputs by requiring that observable inputs be used when available.

Fair value is a market-based measure considered from the perspective of a market participant who owns an asset or owes a liability. Accordingly, when market observable data is not readily available, the Company's own assumptions are set to reflect those that market participants would be presumed to use in pricing the asset at the measurement date. The Company uses prices and inputs that are current as of the measurement date, including during periods of market disruption. In periods of market disruption, the ability to observe prices and inputs may be reduced for many instruments. This condition could cause an instrument to be reclassified from Level 1 to Level 2 or from Level 2 to Level 3.

When available, the Company uses the market approach to estimate the fair value of its financial instruments, which is based on quoted prices in active markets that are readily and regularly available. Generally, these are the most liquid of the Company's holdings and valuation of these securities does not involve management judgment. Matrix pricing and other similar techniques are other examples of the market approach.

When quoted prices in active markets are not available, the Company uses the income approach, or a combination of the market and income approaches, to estimate the fair value of its financial instruments. The income approach involves using discounted cash flow and other standard valuation methodologies. The inputs in applying these market standard valuation methodologies include, but are not limited to interest rates, benchmark yields, bid/ask spreads, dealer quotes, liquidity, term to maturity, estimated future cash flows, credit risk and default projections, collateral performance, deal and tranche attributes, and general market data.

The following valuation techniques and inputs were used to estimate the fair value of each class of significant financial instruments:

Level 1 Measurements

Short-term Investments: Comprised of actively traded money market funds that have daily quoted net asset values for identical assets that the Company can access.

The Company held no Level 2 or Level 3 securities carried at fair value as of June 30, 2017.

B. Not applicable.

C. Valuation, Methods, and Assumptions.

(1) The following table summarizes the fair value of the Company's financial assets as of June 30, 2017.

Type of Financial Instrument	Aggregate Fair Value	Admitted Assets (Level 1)	(Level 2)	(Level 3)	Not Practicable (Carrying Value)
Bonds265,440,528	..264,807,183 2,858,029	..262,582,4990
Short-Term Investments13,337,489	...13,337,489	...13,337,489	00

(2) The following valuation methods and assumptions were used to measure the fair values of each type of financial asset and liability:

Bonds: The fair value of Level 1 bonds, consisting of U.S. Treasury Notes, is determined using unadjusted quoted prices in an active market. The majority of the Company's Level 2 bonds are valued using the market and income approaches by leading, nationally recognized providers of market data and analytics. When available, recent trades of identical or similar assets are used to price these securities. However because many fixed income securities do not actively trade on a daily basis, pricing models are often used to determine security prices. The pricing models discount future cash flows at estimated market interest rates. These rates are derived by calculating the appropriate spreads over comparable U.S. Treasury securities based on credit quality, industry, and structure of the asset. Observable inputs used by the models include benchmark yields, bid/ask spreads, dealer quotes, liquidity, term to maturity, credit risk and default projections, collateral performance, deal and tranche attributes, and general market data. Inputs may vary depending on type of security.

Short-term Investments: Valuation methods and assumptions for Level 1 short-term money market investments are discussed in Note 20.A.4. Valuation methods and assumptions for Level 1 and Level 2 short-term bonds are the same as the methods and assumptions used to value U.S. Treasury Notes and long-term bonds as discussed in Note 20.C.2.

25. Change in Incurred Losses and Loss Adjustment Expenses

Loss & lae reserves as of December 31, 2016 were \$121,825,000. As of June 30, 2017, \$65,550,000 has been paid for incurred loss & lae expenses attributable to insured events or prior years. Reserves remaining for prior years are now \$59,851,000 as a result of re-estimation of unpaid claims and lae expenses. Therefore, there has been a \$3,576,000 unfavorable prior year development from 12/31/2016 to 06/30/2017 principally on liability lines of business.

During the 2nd quarter 2017 review, all coverages combined, excluding bodily injury liability developed favorably from the prior quarter. Bodily injury severity trends were higher than projected, however we have increased our reserves to anticipate continued severity increases at the higher rate. Evidence of case reserve weakening led us to base our projections more on paid development methods, especially taking into account changing claim closing patterns, current and expected case reserve levels, and the higher paid severity trends mentioned.

NOTES TO FINANCIAL STATEMENTS

The development is generally the result of an ongoing analysis of recent loss development trends and are increased or decreased as additional information becomes known regarding individual claims. The Company has no retrospectively rated policies that are subject to premium adjustments.

26. Intercompany Pooling Arrangements

Effective January 1, 2010, the Company entered into a reinsurance pooling agreement with PGAC of Ohio (NAIC company code - 22906) and The General Automobile Insurance Company, Inc. (GAIC) (NAIC company code - 13703), both of which are affiliated property and casualty insurance companies domiciled in Ohio. The business includes private passenger auto liability & auto physical damage with PGAC receiving 58%, PGAC-Ohio receiving 25%, & GAIC receiving 17%. This Agreement applies only to that portion of any insurance or reinsurance which the parties hereto retain net for their own account and in calculating the amount of any loss hereunder, only loss or losses in respect of that portion of any insurance or reinsurance which the parties hereto retain net for their own account shall be included. The Company has a net payable balance of \$3,513,535 at 06/30/2017.
