B. Use of Estimates

The preparation of financial statements in conformity with statutory accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policy

The Company uses the following accounting policies:

- 1) Short-term investments are stated at cost which approximates fair value.
- 2) Bonds are valued as prescribed by the NAIC. Bonds not backed by other loans are generally carried at cost, adjusted for the amortization of premiums, accretion of discounts, and any impairment. Premiums and discounts are amortized and accreted over the estimated lives of the related bonds based on the interest-yield method. The Company's bond portfolio is reviewed quarterly and as a result the carrying value of a bond may be reduced to reflect changes in valuation resulting from asset impairment. Bonds that have been assigned the NAIC category 6 are written down to the appropriate NAIC carrying value.
- 3) The Company has no common stocks.
- 4) The Company has no preferred stocks.
- 5) The Company has no mortgage loans.
- 6) The Company has no loan-backed securities.
- 7) The Company has no investments in subsidiaries, controlled and affiliated entities.
- 8) The Company has no investments in joint ventures, partnerships, or limited entities.
- 9) The Company has no derivatives.
- 10) The Company does not have anticipated investment income as a factor in the premium deficiency calculation.
- 11) Unpaid losses and loss adjustment expenses include an amount determined from individual case estimates and loss reports and an amount, based on past experience, for losses incurred but not reported. Such liabilities are necessarily based on assumptions and estimates and while management believes the amount is adequate, the ultimate liability may be in excess of or less than the amount provided. The methods for making such estimates and for establishing the resulting liability are continually reviewed and any adjustments are reflected in the period determined.
- 12) The Company has not modified its capitalization policy from the prior period.
- 13) The Company does not have pharmaceutical rebate receivables.

20. Fair Value Measurements

SSAP 100, Fair Value Measurements, establishes a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The three levels of the fair value hierarchy are described as follows:

- Level 1 – Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Company has the ability to access.

Notes to Financial Statement

- Level 2 – Inputs to the valuation methodology include quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in inactive markets; inputs other than quoted prices that are observable; or inputs that are derived principally from or corroborated by observable market data by correlation or other means.
- Level 3 – Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. The Company believes its valuation methods are appropriate and consistent with other market participants. The use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.
