B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in accordance with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of admitted assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses for each reporting period. Actual results could differ from those estimates.

C. Accounting Policy

Dental premiums are earned ratably over the terms of the related insurance policies.

In addition, the Company uses the following accounting policies:

- Short-term investments are stated at amortized cost.
- The Company's investments in fixed maturity securities are valued using prices provided by third party pricing vendors. The pricing vendors determine the prices using market inputs, including benchmark yields, reported trades, broker-dealer quotes, issuer spreads, two-sided markets, benchmark securities, bids, offers and reference data. Bonds are stated at amortized cost using the interest method.

- The estimate for incurred but not reported dental claims is based on actuarial projections of costs using historical claims paid data. Estimates are continually monitored and reviewed and, as settlements are made or estimates adjusted, differences are reflected in current operations. Such estimates are subject to the impact of changes in the regulatory environment and economic conditions. Given the inherent nature of such estimates, the actual liability could differ significantly from the amounts provided. Actual future experience will generally differ from assumptions used to determine claim liabilities.

- Premium revenue is recognized in the period in which the member is entitled to receive dental services.
- Other Professional Services for Benefits include claims incurred and capitation expense to dental network providers.
- The provision for federal income taxes is based on income from operations currently taxable. In accordance with the Company’s state of domicile, the Company recognizes deferred income taxes for temporary differences between financial statement carrying amounts of assets and liabilities and their related tax basis. Realized gains and losses are reported net of applicable federal income taxes. Increases or decreases in certain federal income tax assets and liabilities established in prior years are reflected as adjustments to surplus.
- Net investment income includes interest and dividends received or accrued on investments. It also includes amortization of any purchase premium or discount using the interest method, adjusted retrospectively for any change in estimated yield to maturity. Investment income due and accrued that is deemed uncollectible is charged against net investment income in the period such determination is made.
