The Insurance Commissioner has the right to permit other specific practices that deviate from prescribed practices.

A reconciliation of the Company's net income and policyholders' surplus between NAIC SAP and practices prescribed and permitted by the state of Ohio is shown below:

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with NAIC SAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policy

Premiums are earned over the terms of the related insurance policies and reinsurance contracts. Unearned premium reserves are established to cover the unexpired portion of premiums written. Such reserves are computed by pro rata methods for direct and ceded business and are based on reports received from ceding companies for assumed reinsurance.

Expenses incurred in connection with acquiring new business, including such acquisition costs as sales commissions, are charged to operations as incurred. Expenses incurred are reduced for ceding allowances received or receivable.

In addition, the Company uses the following accounting policies:

- Short-term investments are stated at amortized cost.
- Bonds not backed by other loans are stated at amortized cost using the interest method.
- Common stocks are stated at market except that investments in stocks of uncombined subsidiaries and affiliates in which the Company has an interest of 20% or more are carried on the equity basis.
- Preferred stocks are stated in accordance with guidance provided in SSAP No. 32.
- The Company has no mortgage loans.
- Loan-backed securities are stated at either amortized cost or the lower of amortized cost or fair market value. The retrospective adjustment method is used to value all securities except for interest only securities or securities where the yield had become negative, that are valued using the prospective method.
- The Company does not have any investments in subsidiaries.
- The Company has no minority ownership interests in joint ventures.
- The Company does not have any investments in derivatives.
- The Company anticipates investment income, if applicable, as a factor in the premium deficiency calculation, in accordance with SSAP No. 53, Property-Casualty Contracts-Premiums.

Notes to Financial Statement

- 11. Unpaid losses and loss adjustment expenses include an amount determined from individual case estimates and loss reports and an amount, based on past experience, for losses incurred but not reported. Such liabilities are necessarily based on assumptions and estimates and while management believes the amount is adequate, the ultimate liability may be in excess of or less than the amount provided. The methods for making such estimates and for establishing the resulting liabilities are continually reviewed and any adjustments are reflected in the period determined.
- 12. The Company has not modified its capitalization policy from the prior period.

20 Fair Value Measurements

A. The Company has used the following methods and assumptions to estimate the fair value of each class of financial instruments for which it is practicable to estimate:

- Investments – The fair value of stocks are primarily based upon quoted market prices. The fair value of bonds are primarily based upon either quoted market prices or inputs derived principally from or corroborated from observable market information.
- Cash and short-term investments - The carrying amounts reported in the statements of admitted assets, liabilities and policyholders’ surplus for these instruments approximate their fair values.

The Company ranks the quality and reliability of inputs, or assumptions, used in the determination of fair value and requires financial assets and liabilities carried or disclosed at fair value to be classified and disclosed in one of the following three categories:

- Level 1 - Represents quoted prices in active markets for identical assets and liabilities. The Company considers U.S. treasury securities, covered call options and exchange-traded stocks to be Level 1 assets.
- Level 2 - Represents financial assets whose fair value is determined based upon: quoted market prices for similar assets in active markets; quoted market prices for identical assets in inactive markets; inputs other than quoted market prices that are observable for the asset, such as interest rates or yield curves or other inputs derived principally from or corroborated from other observable market information. The Company considers all bonds, except U.S. treasury securities, to be Level 2 assets.
- Level 3 - Represents financial assets whose fair value is determined based upon inputs that are unobservable.

1. The following table presents the fair value measurements for financial instruments measured and reported at fair value as of September 30, 2017.
