1. Summary of Significant Accounting Policies

A. Accounting Practices

The financial statements of Lightning Rod Mutual Insurance Company (LRMIC) are presented on the basis of accounting principles prescribed or permitted by the Ohio Department of Insurance.

The Ohio Department of Insurance recognizes only statutory accounting practices prescribed or permitted by the State of Ohio for determining and reporting the financial condition and results of operations of an insurance company for determining its solvency under Ohio Insurance Law. The National Association of Insurance Commissioners' (NAIC) *Accounting Practices and Procedures Manual* (NAIC SAP) has been adopted as a component of prescribed or permitted practices by the State of Ohio.

The financial statements of the Company are presented solely on the basis of accounting principles prescribed by the Ohio Department of Insurance. As such, there are no increases or decreases to net income or surplus on a statutory accounting basis as shown by the reconciliation below:

NOTES TO FINANCIAL STATEMENTS

D. Loan—Backed Securities

1. Prepayment assumptions are generally obtained using a model provided by a third-party vendor.
2. None.
3. None.
4. All impaired securities (fair value is less than cost or amortized cost) for which an other-than-temporary impairment has not been recognized in earnings as a realized loss (including securities with a recognized other-than temporary impairment for non-interest related declines when a non-recognized interest related impairment remains):

a. The aggregate amount of unrealized losses:

1. Less than 12 months	\$ (23,363)
2. 12 months or Longer	\$ (19,981)

b. The aggregate related fair value of securities with unrealized losses:

1. Less than 12 months	\$ (2,373,182)
2. 12 months or longer	\$ (905,129)

5. The Company reviews all loan-backed and structured securities in which the fair value of a given security is less than the amortized cost to determine if a given security is other-than-temporarily impaired. The Company examines characteristics of the underlying collateral, such as delinquency and default rates, the quality of the underlying borrower, the type of collateral in the pool, the vintage year of the collateral, subordination levels within the structure of the collateral pool, and the quality of any credit guarantors, to determine the cash flows expected to be received for the security.

If the severity and duration of the security's unrealized loss indicates a risk of other-than-temporary impairment, then the Company will evaluate if the amortized cost basis of the security will be recovered by comparing the present value of the cash flows expected to be received for the given security with the amortized basis of the security. If the present value of cash flows is greater than the amortized cost basis of a security then the security is deemed not to be other-than-temporarily impaired.

NOTES TO FINANCIAL STATEMENTS

20. Fair Value Measurements

A. The Company's financial assets and liabilities carried at fair value have been classified, for disclosure purposes, based on a hierarchy defined by FASB ASC 820 (SFAS No. 157), *Fair Value Measurements*. The hierarchy gives the highest ranking to fair values determined using unadjusted quoted prices in active markets for identical assets and liabilities (Level 1) and the lowest ranking to fair values determined using methodologies and models with unobservable inputs (Level 3). An asset's or a liability's classification is based on the lowest level input that is significant to its measurement. For example, a Level 3 fair value measurement may include inputs that are both observable (Levels 1 and 2) and unobservable (Level 3). The levels of the fair value hierarchy are as follows:

Level 1:

Values are unadjusted quoted prices for identical assets and liabilities in active markets accessible at the measurement date.

Level 2:

Inputs include quoted prices for similar assets or liabilities in active markets, quoted prices from those willing to trade in markets that are not active, or other inputs that are observable or can be corroborated by market data for the term of the instrument. Such inputs include market interest rates and volatilities, spreads and yield curves.

Level 3:

Certain inputs are unobservable (supported by little or no market activity) and significant to the fair value measurement. Unobservable inputs reflect the Company's best estimate of what hypothetical market participants would use to determine a transaction price for the asset or liability at the reporting date.

25. Changes in Incurred Losses and Loss Adjustment Expense

Reserves as of December 31, 2016 were \$48.1 million. During 2017, \$18.6 million has been paid for incurred losses and loss adjustment expenses attributable to insured events of prior years. Reserves remaining for prior years are now \$25.5 million as a result of re-estimation of unpaid claims and claim adjusting expenses. Therefore, there has been a \$4.0 million favorable prior year development from December 31, 2016 to September 30, 2017. Favorable development in auto physical damage, homeowner, farmowner, other property and other liability lines of insurance were offset, in part, by unfavorable development in commercial auto liability and commercial multi-peril lines of insurance. The re-estimation is generally the result of ongoing analysis of recent loss development trends. Original estimates are increased or decreased as additional information becomes known regarding individual claims. The estimates are not affected by prior year loss development on retrospectively rated policies, as the Company does not write this type of policy.
