B. Use of Estimates in the Preparation of the Financial Statement

The preparation of financial statements in conformity with NAIC SAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policy

Premiums are earned over the terms of the related insurance policies and reinsurance contracts. Unearned premium reserves are established to cover the unexpired portion of premiums written. Such reserves are computed by pro rata methods for direct business and are based on reports received from ceding companies for reinsurance.

Expenses incurred in connection with acquiring new business, including such acquisition costs as sales commissions, are charged to operations as incurred. Expenses incurred are reduced for ceding allowances received or receivable.

NOTES TO FINANCIAL STATEMENTS

(11) Management's Policies and Methodologies for Estimating Liabilities for Losses and Loss/Claim Adjustment Expenses for A&H Contracts
 Unpaid losses and loss adjustment expenses include net liabilities stated for unpaid claims and for expenses of investigation and adjustment of unpaid claims and are based upon (a) the accumulation of case estimates for losses reported prior to the close of the accounting period on the direct business written; (b) estimates received from ceding reinsurers and insurance pools and associations; (c) estimates of unreported losses and development on reported losses based on past experience net of salvage and subrogation recoveries; and (d) estimates based on experience of expenses for investigating and adjusting claims. The total of these factors is reduced for portions ceded to other insurers. These liabilities are subject to the impact of changes in claim amounts, frequency and other factors. In spite of the variability inherent in such estimates, management believes that the liabilities for unpaid losses and loss adjustment expenses ("LAE") are adequate. Changes in estimates of the liabilities for losses and LAE are reflected in the statement of income in the period in which determined.

(5) Information Considered in Reaching Conclusion that Impairments are Not Other-Than-Temporary

The Company's management regularly reviews the value of investments. If the value of an investment falls below its cost basis, the decline is analyzed to determine whether it is an other-than-temporary decline in value. To make this determination, the following are considered:

(a) How long and by how much the fair value has been below its cost;
 (b) The financial condition and near-term prospects of the issuer of the security, including any specific events that may affect its operations;
 (c) Management's intent to hold the security long enough for it to recover its value;

NOTES TO FINANCIAL STATEMENTS

- (d) Any downgrades of the security by a rating agency; and
- (e) Any nonpayment of scheduled interest payments.

Based on that analysis, management makes a judgment as to whether the loss is other-than-temporary. If the loss is other-than-temporary, the impairment is recognized as a realized capital loss in the Statement of Income in the period the determination is made.

NOTES TO FINANCIAL STATEMENTS**Note 20 – Fair Value Measurements**

A. Fair value measurements for fixed income and equity securities are based on values either published by the NAIC's Security Valuation Office (SVO) or from an independent pricing service vendor. Under certain circumstances, if neither an SVO price nor vendor price is available, a price may be obtained from a broker. Short term securities and cash equivalents are valued at amortized cost.

When published prices from the SVO are not available, the Company's investment manager relies predominantly on independent pricing service vendors that have been evaluated and approved by the investment manager's internal pricing policy committee. Generally, pricing service vendors use a pricing methodology involving the market approach, including pricing models, which use prices and relevant market information regarding a particular security or securities with similar characteristics to establish a valuation.

For statutory accounting, certain investments are carried at fair value, while others may periodically be carried at fair value based on certain factors such as the NAIC's lower of cost or market rule or an impairment. Assets recorded at fair value are categorized based on an evaluation of the various inputs used to measure the fair value. Supporting documentation received from pricing vendors detailing the inputs, models and processes used in the vendor's evaluation process is used to determine the appropriate fair value hierarchy. Documentation from each pricing vendor is reviewed and monitored periodically to ensure they are consistent with the investment manager's pricing policy procedures. Market information obtained from brokers with respect to security valuations is also considered in the pricing hierarchy.

The Company attempts to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. There are three levels of inputs that may be used to measure fair value: (1) Level 1: quoted price (unadjusted) in active markets for identical assets, (2) Level 2: inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets, and inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the instrument, and (3) Level 3: inputs to the valuation methodology are unobservable for the asset or liability.

Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date.

To measure fair value, the Company obtains quoted market prices for its investment securities. If a quoted market price is not available, the Company uses prices of similar securities. Values for U.S. Treasury and publicly traded equity securities are generally based on Level 1 inputs which use the market approach valuation technique. The values for all other bonds and preferred securities (including state and municipal securities and obligations of U.S. government corporations and agencies) generally incorporate significant Level 2 inputs using the market approach and income approach valuation techniques. There have been no changes in the Company's use of valuation techniques during 2017 and 2016. There were no transfers between Level 1 and Level 2 or between Level 2 and Level 3 during 2017.

Reserves for incurred losses and LAE attributable to insured events of prior years, decreased by approximately \$629,000 in 2017, resulting primarily from the other liability line of business. This change is the result of an ongoing analysis of recent development trends and additional information regarding individual claims. These results are attributable to the business retained from the intercompany reinsurance pooling agreement.

Note 26 – Intercompany Pooling Arrangements

A.-D.

The insurance entities within the James River Group are participants in an intercompany reinsurance pooling agreement (the pooling) which was effective January 1, 2013 and included business in-force and subsequent to that date. The pooling is net of all other reinsurance coverage carried by the participants. The pooling provides proportionate sharing of premiums earned, losses and loss adjustment expenses incurred and underwriting expenses incurred.

On August 1, 2016 Falls Lake Fire and Casualty Company received approval from the California Department of Insurance to be a party to the pooling agreement, effective January 1, 2016 on an in-force, new and renewal basis. The current participating companies have received approval of the revised agreement with their States of domicile (OH, NC and VA).

Current and prior participants and their percentages of the pool are as follows:

Company	NAIC #	Current Participation
Falls Lake National Insurance Company (Lead Company)	31925	7%
James River Insurance Company	12203	61%
Stonewood Insurance Company	11828	14%
James River Casualty Company	13685	9%
Falls Lake General Insurance Company	35211	3%
Falls Lake Fire and Casualty Company	15884	6%

Effective January 1, 2017, the intercompany reinsurance pooling agreement was revised to exclude the James River Insurance Company's commercial auto line of business. The current participating companies have received approval of the revised agreement with their States of domicile (NC, OH, VA, and CA). This agreement supercedes the previous pooling agreement effective January 1, 2016. There were no other changes made to the pooling agreement, and all participation percentages remain as reported as of December 31, 2016.
