## NOTES TO FINANCIAL STATEMENTS

### 1. Summary of Significant Accounting Policies

#### A. Accounting Practices

The accompanying financial statements of U.S. Financial Life Insurance Company ("the Company") are presented on the basis of accounting practices prescribed or permitted by the Ohio Insurance Department ("SAP").

The Ohio Insurance Department recognizes only SAP for determining and reporting the financial condition and results of operations of an insurance company, in order to determine its solvency under the Ohio Insurance law. The National Association of Insurance Commissioners' ("NAIC SAP") *Accounting and Procedures* manual has been adopted as a component of prescribed or permitted practices by the State of Ohio. There are no differences in Net income and Capital and Surplus between NAIC SAP and SAP for the Company. See table below:

	SSAP #	F/S Page	F/S Line #	2017	2016

#### B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with SAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

#### C. Accounting Policy

Life premiums are recognized as income over the premium paying period of the related policies. On universal life-type insurance policies and annuities with life contingencies, premiums and considerations are generally recognized as income when received. Payments on deposit type contracts are recorded to the policy reserve. Policy acquisition costs incurred in connection with acquiring new insurance business, such as commissions, underwriting, agency and policy issuance expenses, are charged to operations as incurred.

In addition, the company uses the following accounting policies:

Bonds are stated principally at amortized cost, the value of which is based on the effective interest rate method, and are adjusted to regulatory mandated values through the establishment of a valuation allowance, and for impairments in value deemed to be other than temporary through write-downs recorded as realized capital losses.

Mortgage backed and asset backed bonds are amortized using the effective interest method, including anticipated prepayments from the date of purchase; significant changes in the estimated cash flows from original purchase assumptions are accounted for using the retrospective method. Mortgage backed and asset backed bond carrying values are adjusted for impairments deemed to be other than temporary through write-downs recorded as realized capital losses.

---

## **NOTES TO FINANCIAL STATEMENTS**

---

Prepayment assumptions for loan-backed bonds and structured securities were obtained from broker-dealer survey values or internal estimates. These assumptions are consistent with the current interest rate and economic environment. The retrospective adjustment method is predominately used for all securities except issues in default; the prospective adjustment method was for value issues in default and issues that have a variable interest rate.

Publicly traded unaffiliated common stocks are stated at market value; common stocks not publicly traded are stated at fair value. Common stock values are adjusted for impairments in value deemed to be other than temporary through write-downs recorded as realized capital losses.

Preferred stocks are stated principally at amortized cost and are adjusted to regulatory mandated values through the establishment of a valuation allowance, and for impairments in value deemed to be other than temporary through write-downs recorded as realized capital losses. The preferred stock investments include real estate investment trusts ("REIT") non redeemable and redeemable preferred stock. Preferred stock investments may not have a stated maturity, may not be cumulative and do not provide for mandatory redemption by the issuer.

Short-term investments are stated at cost or amortized cost, which approximates market value.

Cash and cash equivalents includes cash on hand, money market funds, amounts due from banks, highly liquid debt instruments purchased with a maturity of three months or less, and certificates of deposit with a maturity of one year or less.

Policy loans are stated at unpaid principal balances.

Mortgage loans on real estate are stated at unpaid principal balances net of unamortized discounts or premium and valuation allowances. Valuation allowances are established for mortgage loans that are considered impaired by management and recorded based on the difference between collateral value less estimated sales costs and the amortized cost of the mortgage loan. A mortgage loan that is considered permanently impaired by management is written down to collateral value less estimated sales costs with the write-down recorded as a realized capital loss. Mortgage loans for which foreclosure is probable are considered permanently impaired by management.

Real estate acquired in satisfaction of debt is valued at the lower of unpaid principal balance or estimated fair value at the date of acquisition. Real estate held for investment is reviewed for impairment whenever events or changes in circumstances indicate the carrying value of such assets may not be recoverable. Impaired real estate is written down to fair value with the impairment loss being included in net realized capital losses. Real estate which management has committed to disposing of by sale or abandonment is carried at the lower of estimated fair value less disposition costs or depreciated cost, the shortfall recorded as an impairment with a corresponding charge to net realized capital losses. Real estate joint ventures are reported principally on the equity method of accounting. The results of real estate joint ventures are adjusted for depreciation, write-downs and valuation allowances.

Depreciation on directly owned real estate and real estate owned by joint ventures is computed on a straight-line method, generally ranging from 40 to 50 years.

The Company does not have any investments in subsidiaries, controlled and affiliated companies.

The Company does not have any investments in real estate joint ventures and other limited partnership interests.

The Company does not have any derivatives.

The Company does not hold premium deficiency reserves on Accident & Health contracts.

The Company estimates the liabilities for losses and loss adjustment expenses in accordance with SSAP No. 51.

The Company has not modified its capitalization policy from the prior period.

Total deferred tax assets	\$27,970,000	\$52,162,000	(\$24,192,000)

Change in net deferred income tax [(charge)/benefit]			(\$23,875,000)

The Tax Cuts and Jobs Act of 2017 enacted on December 22, 2017 reduces the U.S. federal corporate tax rate from 35% to 21% beginning on January 1, 2018. Due to the need for further analysis of the Tax Act and collection, preparation and analysis of additional data necessary to complete the accounting, the company has not fully completed its analysis of the accounting impacts for the tax effects of the Tax Act of 2017, but has recorded reasonable estimates, including the revaluation of deferred inventory. Consequently the company recorded no increase or decrease in net admitted DTA due to tax reform.

D. The provision for federal and foreign income taxes incurred is different from that which would be obtained by applying the statutory federal income tax rate to income before income taxes.

The significant items causing this difference are as follows:

<b>Description</b>	<b>Amount</b>	<b>Statutory Rate 35% Tax Effect</b>	<b>Effective Tax Rate</b>
Income Before Taxes (including all realized capital gains / (losses))	\$5,436,232	\$1,902,681	35.00 %
