(2) Fair Value Measurement in (Level 3) of the Fair Value Hierarchy

(3) The Company's policy is to recognize transfers between Levels, if any, as of the beginning of the reporting period.

(4) Fair values of fixed maturity securities are based on quoted market prices, where available. These fair values are obtained primarily from third party pricing services, which generally use Level 1 or Level 2 inputs, for the determination of fair value to facilitate fair value measurements and disclosures. United States government securities represent Level 1 securities, while Level 2 securities primarily include corporate securities, securities from states, municipalities and political subdivisions and residential mortgage-backed securities. For Securities not actively traded, the third party pricing services may use quoted market prices of comparable instruments or discounted cash flow analyses, incorporating inputs that are currently observable in the markets for similar securities. Inputs that are often used in the valuation methodologies include, but are not limited to, broker quotes, benchmark yields, credit spreads, default rates and prepayment speeds.

NOTES TO FINANCIAL STATEMENTS

Fair values of equity securities are generally designated as Level 1 and are based on quoted market prices. For certain equity securities, quoted market prices for the identical security are not always available and the fair value is estimated by reference to similar securities for which quoted prices are available. These securities are designated Level 2. The Company has certain equity securities, including private equity securities, for which the fair value is estimated based on each security's current condition and future cash flow projections. Such securities are designated Level 3. The fair values of these private equity securities are generally based on either broker quotes or discounted cash flow projections using assumptions for inputs such as the weighted-average cost of capital, long-term revenue growth rates and earnings before interest, taxes, depreciation and amortization, or revenue multiples that are not observable in the markets.

Certain financial assets are measured at fair value using Level 3 inputs, such as certain non-investment grade bonds and loan-backed securities or investments that are impaired during the year and recorded at fair value.

There have been no significant changes in the valuation techniques during the current period.

B. Fair Value Measurements Under Other Accounting Pronouncements

Not applicable.

C. Financial Instruments
