NOTES TO THE FINANCIAL STATEMENTS

4. All impaired securities (fair value is less than cost or amortized cost) for which an other-than-temporary impairment has not been recognized in earnings as a realized loss (including securities with a recognized other-than-temporary impairment for non-interest related declines when a non-recognized interest related impairment remains):

   a. The aggregate amount of unrealized losses:

1.	Less than 12 Months	$ (256,788)
2.	12 Months or Longer	$ (169,971)

   b. The aggregate related fair value of securities with unrealized losses:

1.	Less than 12 Months	$ 19,470,629
2.	12 Months or Longer	$ 4,061,953

5. The Company reviews all loan-backed and structured securities in which the fair value of the given security is less than the amortized cost to determine if a given security is other-than-temporarily impaired. The Company examines characteristics of the underlying collateral, such as delinquency and default rates, the quality of the underlying borrower, the type of collateral in the pool, the vintage year of the collateral, subordination levels within the structure of the collateral pool, and the quality of any credit guarantors, to determine the cash flows expected to be received for the security.

   If the severity and duration of the security's unrealized loss indicates a risk of an other-than-temporary impairment, then the Company will evaluate if the amortized cost basis of the security will be recovered by comparing the present value of the cash flows expected to be received for the given security with the amortized cost basis of the security. If the present value of cash flows is greater than the amortized cost basis of a security then the security is deemed not to be other-than-temporarily impaired.

NOTES TO THE FINANCIAL STATEMENTS

Note 20 – Fair Value Measurements

A. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair value measurements are based upon observable and unobservable inputs. Observable inputs reflect market data obtained from independent sources while unobservable inputs reflect the Company's view of market assumptions in the absence of observable market information. The Company utilizes valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs. In determining fair value, the Company uses various methods including market, income and cost approaches.

The Company categorizes its financial instruments into a three-level hierarchy based on the priority of the inputs to the valuation technique. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). If the inputs used to measure fair value fall within different levels of the hierarchy, the category level is based on the lowest priority level input that is significant to the fair value measurement of the instrument in its entirety.

The Company categorizes assets and liabilities held at fair value in the statutory statements of assets and liabilities, surplus and other funds as follows:

Level 1. Unadjusted quoted prices accessible in active markets for identical assets or liabilities at the measurement date and mutual funds where the value per share (unit) is determined and published daily and is the basis for current transactions.

Level 2. Unadjusted quoted prices for similar assets or liabilities in active markets or inputs (other than quoted prices) that are observable or that are derived principally from or corroborated by observable market data through correlation or other means. Primary inputs to this valuation technique may include comparative trades, bid/asks, interest rate movements, U.S. Treasury rates, London Interbank Offered Rate, prime rates, cash flows, maturity dates, call ability, estimated prepayments and/or underlying collateral values.

Level 3. Prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement. Inputs reflect management's best estimates of the assumptions market participants would use at the measurement date in pricing the asset or liability. Consideration is given to the risk inherent in both the method of valuation and the valuation inputs. Primary inputs to this valuation technique include broker quotes and comparative trades.

The Company reviews its fair value hierarchy classifications for assets and liabilities quarterly. Changes in observability of significant valuation inputs identified during these reviews may trigger reclassifications. Reclassifications are reported as transfers at the beginning of the period in which the change occurs.

Independent pricing services are most often utilized to determine the fair value of bonds and stocks for which market quotations or quotations on comparable securities are available. For these bonds and stocks, the Company obtains the pricing services' methodologies, pricing from additional sources, inputs and assumptions and classifies the investments accordingly in the fair value hierarchy.

A corporate pricing matrix is used in valuing certain corporate bonds. The corporate pricing matrix was developed using publicly available spreads for privately placed corporate securities with varying weighted average lives and credit quality ratings. The weighted average life and credit quality rating of a particular bond to be priced using the corporate pricing matrix are important inputs into the model and are used to determine a corresponding spread that is added to the appropriate U.S. Treasury yield to create an estimated market yield for that bond. The estimated market yield and other relevant factors are then used to estimate the fair value of the particular bond.

Non-binding broker quotes are also utilized to determine the fair value of certain bonds when deemed appropriate or when quotes are not available from independent pricing services or a corporate pricing matrix. These bonds are classified with the lowest priority in the fair value hierarchy as only one broker quote is ordinarily obtained, the investment is not traded on an exchange, the pricing is not available to other entities and/or the transaction volume in the same or similar investments has decreased. Inputs used in the development of prices are not provided to the Company by the brokers as the brokers often do not provide the necessary transparency into their quotes and methodologies. At least annually, the Company performs reviews and tests to ensure that quotes are a reasonable estimate of the investments' fair value. Price movements of broker quotes are subject to validation and require approval from the Company's management. Management uses its knowledge of the investment and current market conditions to determine if the price is indicative of the investment's fair value.

The Company carries short-term investments at amortized cost, which approximates fair value.

No assets or liabilities were held at fair value as of March 31, 2018.

B. & C. The following table summarizes the carrying value and fair value of the Company's assets not held at fair value as of March 31, 2018:
