B. Use of Estimates in the Preparation of the Financial Statement.

The preparation of financial statements in conformity with NAIC SAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policy

No significant changes for 1-5 and 7-9

(6) Federal Income Taxes – The Company files a Federal income tax return separate from its Parent. The total income taxes of \$129,232 and \$284,638 were paid during 2018 and 2017, respectively.

The Company accounts for deferred income taxes using the asset and liability method, which requires the recognition of deferred tax assets and liabilities for the expected future tax consequences of events that have been included in the financial statements. Deferred tax assets that are not anticipated to be realized within three years are treated as non-admitted assets in the accompanying statutory-basis financial statements. All of the Company's deferred tax assets (\$498,000 and \$491,500 at June 30, 2018 and December 31, 2017, respectively, relating primarily to its reserve for guaranty losses) are treated as non-admitted assets.

D. Going Concern

Based upon its evaluation of relevant conditions and events, management does not have substantial doubt about the Company's ability to continue as a going concern.

A. Deferred Tax Assets/(Liabilities)
 The application of SSAP No. 101 requires a company to evaluate the recoverability of deferred tax assets and to establish a valuation allowance if necessary to reduce the deferred tax asset to an amount which is more likely than not to be realized. We believe it is more likely than not that our deferred tax assets will be realized and have therefore recorded no valuation allowance as of June 30, 2018. Significant factors we considered in determining the probability of realizing the deferred tax benefits include our historical operating results, the amount of our loss carryback potentials, and the expectations of future earnings. On December 22, 2017 the President of the United States signed the Tax Cuts and Jobs Act, which enacted various tax law changes, including a reduction of the corporate tax rate from 35% (34% for the Company) to 21% effective January 1, 2018. While this will reduce future current federal income taxes beginning in 2018, the tax law change also reduces corporate gross deferred tax assets (DTAs) and deferred tax liabilities (DTLs) effective December 31, 2017 since SSAP No. 101—Income Taxes requires that DTAs and DTLs be computed using enacted tax rates expected to apply to taxable income in the periods in which the DTA or DTL is expected to be settled or realized. As a result, the Company's DTAs were reduced by \$280,800 (net) at December 31, 2017 to reflect the new 21% corporate tax rate. Had the tax law not been enacted, the Company would have reported a \$23,400 increase in DTAs using the 34% corporate tax rate in effect. The Company has no DTLs.

Note 20 – Fair Value Measurements**A. Fair Value Measurements****(1) Fair Value Measurements at Reporting Date**

With regard to the Company's financial assets that are disclosed at fair value, which is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, the Company uses various valuation approaches, including quoted market prices and discounted cash flows. The Accounting Standards Codification ("ASC") and SSAP No. 100 "Fair Value Measurement" establishes a hierarchy for inputs used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the most observable inputs be used when available. Observable inputs are obtained from independent sources and can be validated by a third party, whereas, unobservable inputs reflect assumptions regarding what a third party would use in pricing an asset or liability. The fair value hierarchy is broken down into three levels based on the reliability of inputs as follows:

Level 1 - Valuations based on quoted prices in active markets for identical instruments that the Company is able to access. Since valuations are based on quoted prices that are readily and regularly available in an active market, valuation of these products does not entail a significant degree of judgment.

Level 2 - Valuations based on quoted prices in active markets for instruments that are similar, or quoted prices in markets that are not active for identical or similar instruments, and model-derived valuations in which all significant inputs and significant value drivers are observable in active markets.

Level 3 - Valuations based on inputs that are unobservable and significant to the overall fair value measurement.

Reclassification of certain financial instruments may occur when observability of inputs change. There were no transfers between assets carried at fair value classified within Level 1 and Level 2 of the fair value hierarchy during the periods ended June 30, 2018 and December 31, 2017.

There were no purchases, sales, transfers into, or transfers out of assets carried at fair value and classified within Level 3 of the fair value hierarchy during the periods ended June 30, 2018 and December 31, 2017.

The Company does not have any material financial assets or liabilities carried at fair value.

There were no assets or liabilities measured and reported at fair value on a non-recurring basis in 2018 or 2017.

Fair Value of Financial Instruments:

The following methods and assumptions were used to estimate the fair value of financial instruments.

Level 1 - Financial assets include cash and cash equivalents. Unadjusted quoted prices for these securities are provided by an independent pricing service.

Level 2 - Financial assets include US Treasury and US Government agency bonds. Prices are provided using third-party pricing services, such as model-based pricing methods that utilize observable market data as inputs. Broker-dealer bids or quotes of securities with similar characteristics may also be used.

Note 25 – Change in Incurred Losses and Loss Adjustment Expenses

The Company writes only one line of business, "Other" (excess share insurance) and sets loss reserves on a prudent basis for potential claims events. Excess insurance claims events are infrequent (rare) but potentially severe and as a result, upon consultation with the Company's independent actuary, the Company provides annual loss reserve additions so that cumulative loss reserves are within an actuarially accepted range. Further, since the Company has no specific loss events identified, for which a loss reserve would normally be established, all of the Company's loss reserves are unallocated IBNR loss reserves. As a result, for purposes of Schedule P, in any given year the cumulative loss reserves held are considered to have occurred as follows: (1) 60% in current year; (2) 30% in the previous year; and (3) 10% in the second previous year and have been allocated as such in Schedule P, which is comparable to methods used by other insurance companies with infrequent claims events. Since claims events are rare (infrequent but potentially severe), the typical year shows favorable development. A summary of the favorable loss development for the Company's single line of business ("Other") follows (dollars in thousands):

Note 30 – Premium Deficiency Reserves

The Company provides deposit insurance to participating credit unions generally for up to \$250,000 in excess of the insurance limit imposed by the credit union's primary insurer. Credit unions insured under the Company's excess insurance contract are required to maintain a premium deposit with the Company equal to 1% of the aggregate limits of liability. The premium deposits are recorded as a liability by the Company and are non-interest bearing. The investment earnings therefrom in addition to a monthly risk-based premium charge are used to fund the Company's deposit insurance program. The premium deposits are at-risk to the insured credit unions and ultimately can act as a reserve that is available to pay claims if needed. The aggregate of premium deposits that are available to pay claims are \$29,485,000 at June 30, 2018. Therefore the Company has determined there is not a need for a premium deficiency reserve and none has been recorded at June 30, 2018. This evaluation was completed on July 31, 2018. The Company considers investment income when evaluating the need for premium deficiency reserves.
