C. Accounting Policy**6. Loan-backed securities**

Loan-backed and structured securities are accounted for as prescribed by Statement of Statutory Accounting Principles No. 43R, *Loan-backed and Structured Securities*. These securities are generally stated at amortized cost as determined by the estimated value of future cash flows. Prepayment assumptions for loan-backed and structured debt securities are obtained from available market data, broker/dealers, and/or internal estimates, and are consistent with current interest rate and economic trends. See Note 5.D.

D. Going Concern

Management continuously monitors the Company's financial results and compliance with regulatory requirements and found no reason to expect the Company to not continue as a going concern.

Note 5 – Investments**D. Loan-Backed Securities**

1. The sources used to determine prepayment assumptions are derived from updated cash flows from widely utilized reputable industry sources. The Company's portfolio managers review the available cash flow data and prepayment assumptions and make adjustments based on current performance indicators on the underlying assets (e.g., delinquency rates, foreclosure rates, and default rates), credit support (via current levels of subordination), and historical credit ratings.
2. Intent to Sell or Inability to Hold Securities with a Recognized Other-Than-Temporary Impairment
Not applicable
3. The Company has not recorded an other-than-temporary impairment for loan-backed and structured debt securities during the current year.
4. At the end of the reporting period, the composition of fair value and gross unrealized losses on loan-backed and structured debt securities by the length of time that individual securities have been in a continuous unrealized loss position is as follows:

a. The aggregate amount of unrealized losses:	1. Less than 12 Months	\$ 6,179
	2. 12 Months or Longer	\$ 124,120
b. The aggregate related fair value of securities with unrealized losses:	1. Less than 12 Months	\$ 3,556,017
	2. 12 Months or Longer	\$ 3,879,505

5. Additional information

Under SSAP No. 43R, the Company analyzes its structured debt securities to determine if the Company intends to sell, or if it is more likely than not that the Company will be required to sell, the security prior to recovery and, if so, the Company writes down the security to its current fair market value with the entire amount of the write-down recorded as a realized loss. To the extent that it is more likely than not that the Company will hold the debt security until recovery (which could be maturity), the Company determines if any of the decline in value is due to a credit loss (i.e., where the present value of cash flows expected to be collected is lower than the amortized cost basis of the security) and, if so, the Company recognizes that portion of the impairment as a realized loss.

Note 20 – Fair Value Measurements

A. Inputs Used for Assets and Liabilities Measured at Fair Value in the Company's Financial Statements

1. Fair Value Measurements by Levels 1, 2 and 3

The Company categorizes its financial instruments, based on the degree of subjectivity inherent in the method by which they are valued, into a fair value hierarchy of three levels, as follows:

Level 1 - Inputs are unadjusted, quoted prices in active markets for identical instruments at the measurement date (e.g., active exchange-traded equity securities).

Level 2 - Inputs (other than quoted prices included within Level 1) that are observable for the instrument either directly or indirectly. This includes: (i) quoted prices for similar instruments in active markets, (ii) quoted prices for identical or similar instruments in markets that are not active, (iii) inputs other than quoted prices that are observable for the instruments, and (iv) inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3 - Inputs that are unobservable. Unobservable inputs reflect the Company's subjective evaluation about the assumptions market participants would use in pricing the financial instrument.

The Company's management evaluated whether the market was distressed or inactive in determining the fair value of the Company's securities and reviewed certain market level inputs to evaluate whether sufficient activity, volume, and new issuances existed to create an active market. Based on this evaluation, management concluded that there was sufficient activity in determining the fair market value of the Company's securities.

As of the reporting date, the Company did not measure and report any securities at fair value on the balance sheet. All bonds were carried at amortized cost.

2. Roll forward of Level 3 Items

Not applicable

3. Policy on Transfers Into and Out of Level 3

At the end of each reporting period, the Company evaluates whether or not any event has occurred or circumstances have changed that would cause an instrument to be transferred into or out of Level 3.

Note 25 – Change in Incurred Losses and Loss Adjustment Expenses

A. Change in Incurred Losses and Loss Adjustment Expenses

Incurred losses and LAE attributable to insured events of prior accident years increased by \$2,897,633 in 2018, which is 4.0% of the total prior year net unpaid losses and LAE of \$72,506,487. The unfavorable development is primarily due to private passenger auto liability originally anticipated severity for accident year 2017 increasing by 3.2% and commercial auto liability originally anticipated severity for accident year 2017 increasing by 6.9%. LAE reserves developed unfavorably in total. Defense and cost containment reserves developed favorably, while adjusting and other reserves developed unfavorably due to higher than anticipated claims costs.
