- (3) The Company's policy is to recognize transfers between Levels, if any, as of the beginning of the reporting period.
- (4) Fair values of bonds are based on quoted market prices, where available. These fair values are obtained primarily from third party pricing services, which generally use Level 1 or Level 2 inputs, for the determination of fair value to facilitate fair value measurements and disclosures. Level 2 securities primarily include United States government securities, corporate securities, securities from states, municipalities and political subdivisions, residential mortgage-backed securities and certain other asset-backed securities. For securities not actively traded, the pricing services may use quoted market prices of comparable instruments or discounted cash flow analyses, incorporating inputs that are

STATEMENT AS OF JUNE 30, 2018 OF THE Community Insurance Company

NOTES TO FINANCIAL STATEMENTS

currently observable in the markets for similar securities. Inputs that are often used in the valuation methodologies include, but are not limited to, broker quotes, benchmark yields, credit spreads, default rates and prepayment speeds. The Company has controls in place to review the pricing services' qualifications and procedures used to determine fair values. In addition, the Company periodically reviews the pricing services' pricing methodologies, data sources and pricing inputs to ensure the fair values obtained are reasonable.

Certain financial assets are measured at fair value using Level 3 inputs, such as certain non-investment grade bonds and loan-backed securities or investments that are impaired during the year and recorded at fair value.

Fair values of common and preferred stock are generally designated as Level 1 and are based on quoted market prices. For certain common and preferred stock, quoted market prices for the identical security are not always available and the fair value is estimated by reference to similar securities for which quoted prices are available. These securities are designated as Level 2. The Company also has certain equity securities, including private equity securities, for which the fair value is estimated based on each securities current condition and future cash flow projections. Such securities are designated as Level 3. The fair values of these private equity securities are generally based on either broker quotes, or discounted cash flow projections using assumptions for inputs such as the weighted-average cost of capital, long-term revenue growth rates and earnings before interest, taxes, depreciation and amortization, and/or revenue multiples that are not observable in the markets.

Cash equivalents primarily consist of highly rated money market funds or bonds with original maturities of three months or less. Due to the high ratings and short-term nature of these investments, cash equivalents are primarily designated as Level 1.

There have been no significant changes in the valuation techniques during the current period.

25. Change in Incurred Claims and Claim Adjustment Expenses

- A. The estimated cost of claims and claim adjustment expense attributable to insured events of prior years decreased by \$94,711,522 during 2018. This is approximately 17.0% of unpaid claims and claim adjustment expenses of \$558,076,733 as of December 31, 2017. The redundancy reflects the decreases in estimated claims and claims adjustment expenses as a result of claims payment during the year, and as additional information is received regarding claims incurred prior to 2018. Recent claim development trends are also taken into account in evaluating the overall adequacy of unpaid claims and unpaid claim adjustment expense.
- B. There were no significant changes in methodologies and assumptions used in calculating the liability for unpaid losses and loss adjustment expenses.
