The Ohio Department of Insurance recognizes only statutory accounting practices (SAP) prescribed or permitted by the State of Ohio for determining and reporting the financial condition and results of operations of an insurance company, for determining its solvency under the Ohio Insurance law. The National Association of Insurance Commissioners' (NAIC) *Accounting Practices and Procedures Manual* (NAIC SAP) has been adopted as a component of prescribed or permitted practices by the State of Ohio.

The Company has not implemented any prescribed or permitted accounting practices by the State of Ohio that differ from those found in NAIC SAP.

**B. Use of Estimates in the Preparation of the Financial Statement - No significant changes****C. Accounting Policy**

Premiums are earned over the terms of the related insurance policies and reinsurance contracts. Unearned premium reserves are established to cover the unexpired portion of premiums written. Such reserves are computed by pro rata methods for direct business and are based on reports received from ceding companies for reinsurance.

Expenses incurred in connection with acquiring new insurance business, including such acquisition costs as sales commissions, are charged to operations as incurred. Expenses incurred are reduced for ceding allowances received or receivable.

In addition, the Company uses the following accounting policies:

- (1-5) No significant changes
- (6) Loan-backed securities are stated at either amortized cost or the lower of amortized cost or fair market value. The retrospective adjustment method is used to value all securities. If a security has been written down due to an other-than-temporary impairment, the prospective adjustment method is used subsequent to the loss recognition in accordance with SSAP No.43R.
- (7-13) No significant changes

**D. Going Concern**

Management continuously monitors the Company's financial results and compliance with regulatory requirements and finds no reason to expect the Company to not continue as a going concern.

(2-3) No other-than-temporary impairments have been recognized on loan-backed securities.

(4) All impaired securities (fair value is less than cost or amortized cost) for which an other-than-temporary impairment has not been recognized in earnings as a realized loss (including securities with a recognized other-than-temporary impairment for non-interest related declines when a non-recognized interest related impairment remains):

**Note 20 – Fair Value Measurements****A. Fair Value Measurements**

For assets that are measured and reported at fair value in the statement of financial position after initial recognition, the valuation techniques and the inputs used to develop those measurements are as follows:

Level 1 - Values are unadjusted quoted prices for identical assets and liabilities in active markets accessible at the measurement date.

Level 2 - Inputs include quoted prices for similar assets or liabilities in active markets, quoted prices from those willing to trade in markets that are not active, or other inputs that are observable or can be corroborated by market data for the term of the instrument. Such inputs include market interest rates and volatilities, spreads and yield curves.

Level 3 - Certain inputs are unobservable (supported by little or no market activity) and significant to the fair value measurement. Unobservable inputs reflect the Company's best estimate of what hypothetical market participants would use to determine a transaction price for the asset or liability at the reporting date.

The Company has no liabilities that are measured at fair value in the statement of financial position.

(2) At June 30, 2018, the Company held no investments in assets or liabilities measured and reported at fair value that were classified as Level 3.

(3) The Company's policy for determining when transfers between levels is required is based upon change in the inputs used to determine fair value measurement. If an input changes, the Company evaluates the new input(s) and makes the determination whether or not a transfer between levels is appropriate. If an asset or liability is transferred between levels, it is the Company's policy to record the transfer as of the beginning of the quarter in which the transfer occurs. The Company held no assets or liabilities categorized as Level 1, 2 or 3 during the reporting period that were transferred into or out of the level categorization held at January 1, 2018.

(4) As of June 30, 2018, the Company held money market mutual funds, which were reported at fair value using the net asset value (NAV) as a practical expedient and were classified as Level 2. As of June 30, 2018, the Company held no investments in assets or liabilities measured and reported at fair value that were classified as Level 3. Historically, fair values in the Level 2 category are provided by independent pricing services. Where independent pricing services provide fair values, the Company has obtained an understanding of the methods, models and inputs used in pricing and has controls in place to validate that amounts provided represent current fair values. Estimated fair values of investments categorized as Level 3 generally include inputs for which no readily observable inputs are available and require management judgment.

**NOTES TO FINANCIAL STATEMENTS**

(5) As of June 30, 2018, the Company had no holdings classified as either a derivative asset or liability.

B. Fair Value Reporting under SSAP 100 and Other Accounting Pronouncements - Not required

C. Fair Value Level

The method(s) and significant assumptions used to estimate the fair value of financial instruments are as follows:

*Investment Securities* - Fair values for bonds, including the aggregate write-ins for invested assets are based on the values prescribed by an independent pricing service or from brokers. For bonds that are not actively traded, estimated fair values are based on values of bonds of comparable yield and credit quality. The fair values for common stocks are based on quoted market prices, where available, which are provided to the Company by an independent pricing service.

*Cash equivalents* - Cash equivalents include money market mutual funds, which are reported at net asset value (NAV) as a practical expedient. Such money market mutual funds are captured within the fair value hierarchy (Level 2) and are separately identified in a NAV column. NAV is defined as the amount of net assets attributable to each share outstanding at the close of the period.

*Receivables for securities, Uncollected premiums and agents' balances in the course of collection, Deferred premiums, agents' balances and installments booked but deferred and not yet due, Amounts recoverable from reinsurers, and Funds held by or deposited with reinsured companies* - The carrying amounts reported as admitted assets or liabilities for these financial instruments approximate their fair values due to the short-term nature of these financial instruments.

*Other Invested Assets* - The estimated fair value of publicly traded limited partnerships and trusts is based on the values prescribed by an independent pricing service.

Reserves as of December 31, 2017 were \$334.3 million. In calendar year 2018, \$68.9 million has been paid for incurred claims and claim adjustment expenses attributable to insured events of prior years. Reserves remaining for prior years are now \$261.4 million. Therefore, there has been a \$4.0 million favorable prior-year development from December 31, 2017 to June 30, 2018. The favorable development is principally from decreases in the estimates of loss and loss adjustment expenses for the following lines of business: Workers' Compensation, Other Liability and Commercial Multi-Peril. This change is generally the result of ongoing analysis of recent loss development trends. Original estimates are increased or decreased, as additional information becomes known regarding individual claims. The estimates are not affected by prior year loss development on retrospectively rated policies, as the Company does not write this type of policy.
