NOTES TO FINANCIAL STATEMENTS

Note 1 – Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The accompanying statutory-basis financial statements of Progressive Advanced Insurance Company (the "Company") were prepared on the basis of accounting practices prescribed or permitted by the Ohio Department of Insurance ("DOI").

The Ohio DOI requires insurance companies domiciled in the state of Ohio to prepare their statutory-basis financial statements in accordance with the National Association of Insurance Commissioners' ("NAIC") *Accounting Practices and Procedures Manual* subject to any deviations prescribed or permitted by the Ohio DOI. No deviations from NAIC statutory accounting practices ("NAIC SAP") were used in preparing these statutory-basis financial statements as illustrated in the table below:

B. Use of Estimates in the Preparation of the Financial Statement

The Company is required to make estimates and assumptions when preparing its financial statements and accompanying notes in conformity with NAIC SAP. Actual results may differ from those estimates. Material estimates that are susceptible to significant changes in the near term include the loss and loss adjustment expense ("LAE") reserves.

C. Accounting Policy

Insurance premiums written are being earned into income on a pro-rata basis over the period of risk based on a daily earnings convention. Unearned premiums are established to cover the unexpired portion of premiums written. The Company offers a variety of payment plans to meet individual customer needs. Generally, insurance premiums are collected in advance of providing risk coverage, minimizing the Company's exposure to credit risk.

Acquisition costs, such as agents' commissions, premium taxes, and other policy initiation costs, are charged to operations as incurred. Advertising costs are expensed as incurred.

Certain assets designated as "nonadmitted assets", in accordance with Statement of Statutory Accounting Principles ("SSAP") No. 4, Assets and Nonadmitted Assets, are reported on page 13, Exhibit of Nonadmitted Assets. The change in nonadmitted assets is charged directly against surplus as regards policyholders on page 4, Statement of Income, capital and surplus section.

In addition, the Company uses the following accounting policies:

Investments

- Cash and cash equivalents include bank accounts and certificates of deposit as well as short-term investments with original maturities of three months or less and securities acquired with remaining maturities of three months or less that are reported at amortized cost which approximates market value. Also includes money market mutual funds valued at fair value or net asset value (NAV) as a practical expedient.
- Short-term investments include securities acquired within one year of maturity, excluding those with maturities of three months or less (see cash and cash equivalents above) and are reported at amortized cost which approximates market value.
- Investment grade bond valuations are based on NAIC designations or NAIC Credit Rating Provider ("CRP") designations from the Acceptable Rating Organization ("ARO") list and are reported at amortized cost using the scientific method which closely approximates the effective interest method. Non-investment grade bond valuations are also based on NAIC designations or NAIC CRP-ARO designations and are reported at the lower of amortized cost or fair market value. Loan-backed and structured securities follow the guidance prescribed by SSAP No. 43R for the determination of the bond valuation and reporting designation. The difference between the original cost and redemption value of these securities is recognized over the lives of the respective issues and included in net investment gain.
- Common stocks, other than investments in stocks of subsidiaries and affiliates, are reported at fair market values based on active market closing quotations from a regulated exchange. Changes in the fair market values of these securities are reflected directly as unrealized gains or losses in statutory surplus, net of deferred income taxes.
- Non-redeemable preferred stocks are reported at fair market values. Changes in the fair market values of these securities are reflected directly as unrealized gains or losses in statutory surplus, net of deferred income taxes. Investment grade redeemable preferred stocks are reported at amortized cost, while non-investment grade redeemable preferred stocks are reported at the lower of amortized cost or fair market value. The difference between the original cost and redemption value of the redeemable preferred securities is recognized using the scientific method, which closely approximates the effective interest method, over the lives of the respective issues and included in net investment gain.
- The fair market values reported are derived from independent and observable market input evaluations provided by reputable pricing services, independent broker/dealer bid lists, independent broker/dealer quotations, independent broker/dealer pricing services, or active market closing quotations from a regulated exchange. In very rare cases, if none of the aforementioned primary sources are available, matrix pricing using the reporting entity's own market based assumptions may be utilized. The approved methods for computation of fair market value are prescribed in Part Five of the Securities Valuation Office *Purposes and Procedures Manual*.
- The Company has no investments in mortgage loans.
- Loan-backed and structured securities are accounted for as prescribed by SSAP No. 43R. These securities are generally stated at amortized cost as determined by the estimated value of future cash flows. Prepayment assumptions for loan-backed and structured debt securities are obtained from available market data, broker/dealers, and/or internal estimates, and are consistent with current interest rate and economic trends.
- The Company has no investments in joint ventures, partnerships, or limited liability companies.
- The Company has no investments in derivatives.

NOTES TO FINANCIAL STATEMENTS

- The Company may enter into repurchase agreements in which it borrows cash by providing certain underlying securities as collateral for the arrangement. The cash borrowed is invested in cash equivalents and an offsetting liability is established. The cash equivalent investment maturities and the term of the borrowing arrangement on the collateralized securities match, eliminating duration risk exposure to the Company. The Company did not have any open repurchase agreements at December 31, 2018 and December 31, 2017.
- Realized gains and losses on sales of securities are computed based on the first-in, first-out method.
- The Company's management routinely monitors individual securities in its investment portfolio for pricing changes that might indicate potential impairments and performs detailed reviews of securities with unrealized losses based on predetermined guidelines to determine whether a decline in the value of a security is other-than-temporary. A review for OTTI requires making certain judgments regarding the materiality of the decline, its effect on the financial statements, the probability, extent, and timing of a valuation recovery, and the Company's ability and intent to hold the security. The scope of this review is broad and requires a forward-looking assessment of the fundamental characteristics of a security, as well as the market-related prospects of the issuer and its industry.

Management assesses valuation declines to determine the extent to which such changes are attributable to (i) fundamental factors specific to the issuer, such as financial conditions, business prospects or other factors, or (i) market-related factors such as interest rates or equity market declines (i.e., negative returns at either a sector index level or the broader market level), or (ii) credit-related losses where the present value of cash flows expected to be collected are lower than the amortized cost basis of the security (includes only those securities covered under SSAP No. 43R). This evaluation reflects management's assessment of current conditions, as well as predictions of uncertain future events that may have a material effect on the financial statements related to security valuation.

When persuasive evidence exists that causes management to conclude that a decline in fair value is other-than-temporary, the book value of such security is written down and recognized as a realized loss. All other unrealized gains or losses are reflected in statutory surplus.

Loss, Loss Adjustment Expense, and Premium Deficiency Reserves

- Loss reserves represent the estimated liability on claims reported to the Company, plus reserves for losses incurred but not yet reported ("IBNR"). These estimates are reported net of amounts recoverable from salvage and subrogation. LAE reserves represent the estimated expenses required to settle reported claims and IBNR losses. Such loss and LAE reserves could be susceptible to significant change in the near term. The Company conducts extensive reviews each month on portions of its business to help ensure that the Company is meeting its objective of always having reserves that are adequate with minimal variation. Results would differ if different assumptions were made (see Notes 25) .
- The Company does anticipate investment income when evaluating the need for premium deficiency reserves (see Note 30).

Capitalization of Assets

- The Company has written capitalization policies for its various asset classes. There have been no changes to the predefined capitalization thresholds from the prior year. The Prepaid assets above a \$100,000 threshold are capitalized. Under certain circumstances, the Company may decide to establish a prepaid expense for amounts less than the threshold. Prepaid assets are nonadmitted.

Pharmaceutical Rebate Receivables

- The Company does not write medical insurance or prescription drug coverage.

D. Going Concern

Management continuously monitors the Company's financial results and compliance with regulatory requirements and found no reason to expect the Company to not continue as a going concern.

D. Loan-Backed Securities

1. The sources used to determine prepayment assumptions are derived from updated cash flows from widely utilized reputable industry sources. The Company's portfolio managers review the available cash flow data and prepayment assumptions and make adjustments based on current performance indicators on the underlying assets (e.g., delinquency rates, foreclosure rates, and default rates), credit support (via current levels of subordination), and historical credit ratings.
2. Intent to Sell or Inability to Hold Securities with a Recognized Other-Than-Temporary Impairment

Not Applicable
3. The Company has not recorded an other-than-temporary impairment for loan-backed and structured debt securities during the current year.

NOTES TO FINANCIAL STATEMENTS

4.

At the end of the reporting period, the composition of fair value and gross unrealized losses on loan-backed and structured debt securities by the length of time that individual securities have been in a continuous unrealized loss position is as follows:

a.	The aggregate amount of unrealized losses:	1. Less than 12 Months	\$	16,683
		2. 12 Months or Longer	\$	
b.	The aggregate related fair value of securities with unrealized losses:	1. Less than 12 Months	\$	17,191,408
		2. 12 Months or Longer	\$	

5.

Additional information

Under SSAP No. 43R, the Company analyzes its structured debt securities to determine if the Company intends to sell, or if it is more likely than not that the Company will be required to sell, the security prior to recovery and, if so, the Company writes down the security to its current fair market value with the entire amount of the write-down recorded as a realized loss. To the extent that it is more likely than not that the Company will hold the debt security until recovery (which could be maturity), the Company determines if any of the decline in value is due to a credit loss (i.e., where the present value of cash flows expected to be collected is lower than the amortized cost basis of the security) and, if so, the Company recognizes that portion of the impairment as a realized loss.

The change in net deferred income tax is comprised of the following (this analysis excludes nonadmitted assets; the change in nonadmitted assets is reported separately from the change in net deferred income tax in the Statement of Income, Surplus section):

Description	December 31, 2018	December 31, 2017	Change
Total deferred tax assets	\$ 11,962,625	\$ 9,328,615	\$ 2,634,010
Total deferred tax liabilities	887,422	70,293	817,129

Tax effect of unrealized gains (losses)			(5,461)
Change in net deferred income tax			\$ 1,822,342

On December 22, 2017, legislation commonly known as the Tax Cuts and Jobs Act of 2017 (the "Tax Act"), was signed into law and was generally effective beginning January 1, 2018. The Tax Act made several changes to the loss discounting rules that insurance companies must apply to their loss and loss adjustment expense reserves for tax purposes. At December 31, 2017, the Company did not record any amounts related to these changes because the IRS had not yet determined the interest rate or the loss payment patterns that must be applied to make these calculations and the Company was unable to make a reasonable estimate of such amounts. In December 2018, the IRS published the loss payment patterns, interest rate, and discount factors which enabled us to compute the adjustments. As a result, the Company recorded an increase to the deferred tax asset for discounting of unpaid losses of \$892,111 and an increase to the deferred tax liability for salvage and subrogation of \$44,566. The net increase of \$847,544 was offset by a deferred tax liability in the same amount for the transition adjustment required by the Tax Act, and therefore there was no net impact on deferred taxes.

D. Reconciliation of Federal Income Tax Rate to Actual Effective Rate Among the more significant book to tax adjustments were the following:

Description	Tax Effect Amount	Effective Tax Rate
Provision computed at statutory rate	\$ 7,457,091	21%
Exempt interest income	(12,402)	0%
Impact of nonadmitted assets	(472,915)	-1%
Other	10,618	0%
Total	\$ 6,982,392	20%
Federal and foreign income taxes incurred	\$ 8,804,734	
Change in net deferred income tax	(1,822,342)	
Total statutory income taxes	\$ 6,982,392	

E. Operating Loss Carryforwards and Income Taxes Available for Recoupment

1. During the reporting period, the Company did not have any unused operating loss carryforwards available to offset against future taxable income.
2. The following is income tax expense for current year and proceeding years that is available for recoupment in the event of future net losses:

Period	Amount
Current tax year:	\$ 8,783,541
First preceding tax year:	\$ 9,882,846

The amounts that can be recouped may be subject to the alternative minimum tax rules, and therefore may be limited.

The Company did not have any protective tax deposits under Section 6603 of the Internal Revenue Code.

These accruals are based on information received from the states in which the Company writes business and may change due to many factors including the Company's share of the ultimate cost of current insolvencies.

As of December 31, 2018 and 2017, the Company's estimated liability for state guaranty fund and other assessments was \$4,747,455 and \$3,519,910, respectively. The Company did not recognize any premium tax benefit associated with its various assessments.

As of December 31, 2018 and 2017, the Company's estimated liability for various surcharges was \$429,364 and \$372,425, respectively.

The Company routinely assesses the collectibility of premiums and agents' balances receivable and records a bad debt reserve for amounts exceeding the nonadmitted balance that the Company believes are uncollectible.

The Company is named as defendant in various lawsuits arising out of its insurance operations. All legal actions relating to claims made under insurance policies are considered by the Company in establishing its loss and LAE reserves. The Company also has, on a net basis, potential exposure relating to lawsuits due to its participation in a 100% pooling reinsurance agreement for which it is allocated litigation expenses (see Note 26).

The following is a discussion of potentially significant pending cases at the reporting date. Unless specifically noted, the Company does not consider a loss from these cases to be probable and is unable to estimate a range of loss, if any, at this time.

There were three cases consolidated into multi-district proceedings alleging that the Company improperly steers automobile repair work to certain auto body repair shops and challenging the labor rates the Company pays to auto body repair shops.

There was a putative class action lawsuit alleging that the Company's uninsured motorist coverage is illusory.

Note 20 – Fair Value Measurements

A. Inputs Used for Assets and Liabilities Measured at Fair Value

1. Fair Value Measurements by Levels 1, 2 and 3

The Company categorizes its financial instruments, based on the degree of subjectivity inherent in the method by which they are valued, into a fair value hierarchy of three levels, as follows:

Level 1 - Inputs are unadjusted, quoted prices in active markets for identical instruments at the measurement date (e.g., U.S. government obligations, which are continually priced on a daily basis, active exchange-traded equity securities, and certain short-term securities).

Level 2 - Inputs (other than quoted prices included within Level 1) that are observable for the instrument either directly or indirectly (e.g., certain corporate and municipal bonds and certain preferred stocks). This includes: (i) quoted prices for similar instruments in active markets, (ii) quoted prices for identical or similar instruments in markets that are not active, (iii) inputs other than quoted prices that are observable for the instruments, and (iv) inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3 - Inputs that are unobservable. Unobservable inputs reflect our subjective evaluation about the assumptions market participants would use in pricing the financial instrument (e.g., certain structured securities and privately held investments).

See Note 1, Investment Policies section for further information regarding methods used to determine fair market value.

NOTES TO FINANCIAL STATEMENTS

The Company's management evaluated whether the market was distressed or inactive in determining the fair value of the Company's securities and reviewed certain market level inputs to evaluate whether sufficient activity, volume, and new issuances existed to create an active market. Based on this evaluation, management concluded that there was sufficient activity in determining the fair market value of the Company's securities.

As of the reporting date, the Company did not measure and report any securities at fair value on the balance sheet. All bonds were carried at amortized cost.

3. Policy on Transfers Into and Out of Level 3

The following subprime disclosure and the review and procedures described within are completed at a consolidated level for all the Progressive companies. To the extent the Company had any direct subprime exposure, those securities would be listed in Note 21.F.3.

Management's review of the investment portfolio for securities with direct subprime exposure, such as Alt-A residential mortgage loan-backed bonds and home equity loan-backed bonds is performed in conjunction with the OTTI analysis and procedures (see Note 1.C). Additionally, securities that were determined to have an indirect subprime exposure were also reviewed as part of the OTTI process.

The Company's management continues to perform a detailed review of its investment portfolio, paying particular attention to the credit profile of the issuers to identify the extent to which any asset values may have been impacted by direct or indirect exposure to the subprime mortgage loan disruption, as well as broader credit and financial market events.

In the reporting period, the Company recorded no OTTI write-downs on any securities as a result of direct subprime exposure.

Incurred losses and LAE attributable to insured events of prior accident years increased by \$2,543,772 in 2018, which is 1.8% of the total prior year net unpaid losses and LAE of \$142,614,093. The unfavorable development is primarily due to reopening of personal injury protection (PIP) claims in Florida. LAE reserves developed unfavorably in total. Defense and cost containment reserves developed unfavorably primarily due to higher than anticipated attorney costs, while adjusting and other reserves developed unfavorably primarily due to higher than anticipated claims costs related to the reopening of Florida PIP claims.

Note 26 – Intercompany Pooling Arrangements

The Company participates in a pooling reinsurance agreement with the property-casualty affiliates listed below (the “Direct Pool”) under which 100% of the underwriting business of each member company, net of external reinsurance, is ceded to Progressive Direct, the Direct Pool manager and a Direct Pool participant. The combined premiums, losses, and expenses are then retroceded to each Direct Pool member based on pre-determined pooling percentages.

Mountain Laurel Assurance Company (“Mountain Laurel”), an insurance affiliate domiciled in Ohio, terminated its future participation in the Direct Pool effective November 5, 2005. Mountain Laurel has a zero percent retrocession participation in the Direct Pool for all policies written prior to that date.

Effective January 1 , 2019, The Company's pooling reinsurance agreement with property-casualty affiliates was amended to include Progressive Choice Insurance Company (see Note 22).

The pooling percentages for each Direct Pool member were as follows:

Company	NAIC Code	2018 Pool %	2017 Pool %
Progressive Direct Insurance Company (Lead)	16322	77.5%	77.5%
Progressive Marathon Insurance Company	37605	6.0	6.0
Progressive Max Insurance Company	24279	6.0	6.0
Progressive Advanced Insurance Company	11851	4.0	4.0
Progressive Universal Insurance Company	21727	4.0	4.0
Progressive Premier Insurance Company of Illinois	21735	2.0	2.0
Progressive Paloverde Insurance Company	44695	0.5	0.5
Mountain Laurel Assurance Company	44180	--	--
		100.0%	100.0%

All business written by each Direct Pool member is subject to pooling with the exception of loss reserves from Progressive Max Insurance Company's assumed asbestos and environmental claims, for which the Company has no exposure. Business ceded by Direct Pool members to non-affiliated reinsurers prior to pooling, is primarily due to state-provided reinsurance programs. The Direct Pool does not participate in any intercompany sharing of the provision for reinsurance and the write-offs of uncollectible reinsurance.

At the reporting period, amounts recoverable from and payable to Progressive Direct and all affiliates participating in the Direct Pool are as follows:

Company	Amounts Recoverable	Amounts Payable
Progressive Direct Insurance Company (Lead)	\$ 37,257,926	\$ 30,077,734
