(10) Anticipated Investment Income Used in Premium Deficiency Calculation

The Company anticipates investment income as a factor in the premium deficiency calculation, in accordance with SSAP No. 53: Property/Casualty Contracts-Premiums

(11) Management's Policies and Methodologies for Estimating Liabilities for Losses and Loss/Claim Adjustment Expenses for A&H Contracts

Unpaid loss and loss adjustment expenses include an amount determined from individual case estimates and loss reports and an amount, based upon past experience, for losses incurred but not reported. Such liabilities are necessarily based on assumptions and estimates. While management believes the amount is adequate, the ultimate liability may be in excess of or less than the amount provided. The methods for making such estimates and for establishing the resulting liability is continually reviewed and any adjustments reflected in the period determined.

(12) Changes in the Capitalization Policy and Predefined Thresholds from Prior Period

The Motorists Insurance Group standardized its thresholds for capitalization across all member companies. The Group also implemented updates for software licenses and maintenance agreements that allow amortization over service periods for material transactions.

(13) Method Used to Estimate Pharmaceutical Rebate Receivables

The Company has no pharmaceutical rebate receivables to report.

D. Going Concern

Management has concluded that there is no substantial doubt about the Company's ability to continue as a going concern.

Note 2 – Accounting Changes and Correction of Errors

The Motorists Insurance Group elected to freeze its defined pension and other non-qualified benefit plans effective December 31, 2017. In conjunction with this election, the company voluntarily changed the accounting for its benefit plans to a mark-to-market (MTM) valuation approach. Under the MTM accounting method, actuarial and asset valuation gains and losses are recognized immediately as current year net benefit costs in the Statement of Operations, rather than by amortizing (smoothing) the gains and losses over future calendar years.

The company's deferred income tax assets and liabilities as of December 31, 2018, were reported using the 21% tax rate, enacted on December 22, 2017, under the Tax Cuts and Jobs Act (Act). The change in deferred taxes due to the change in tax rates is reflected in Note 9D, line "Rate Differential". In addition, deferred taxes for 2017 included provisional amounts related to loss reserves discounting adjustments under the Act. These provisional evaluations were based on the company's current interpretation of the legislation and insurance industry group guidance. Given the complexity of the legislation, anticipated guidance from the U.S. Treasury, and the potential for additional guidance from the U.S. Treasury, and the potential for additional guidance from Statutory Accounting Principle Working Group, these estimates may be adjusted during 2019.

C. Fair Value Level

The following tables reflect the estimated fair values and admitted values of all admitted assets and liabilities that are financial instruments excluding those accounted for under the equity method (subsidiaries, joint ventures and ventures). The estimated fair values are categorized into the three-level fair value hierarchy as described above.

| Type of Financial Instrument | Aggregate Fair Value | Admitted Assets | (Level 1) | (Level 2) | (Level 3) | Net Asset Value (NAV) | Not Practicable (Carrying Value) |
|------------------------------|----------------------|-----------------|-----------|---------------|-----------|-----------------------|----------------------------------|

| Other invested assets | \$ 1,576 | \$ | \$ | \$ | \$ | \$ | \$ 1,576 |

Bonds and Common Stocks

When available, the estimated fair values for bonds, including loan-backed and structured securities, and unaffiliated common stocks are based on quoted prices in active markets that are readily and regularly obtainable. Generally, these investments are classified in Level 1. Generally, these are the most

NOTES TO FINANCIAL STATEMENTS

liquid of the Company's securities holdings and valuation of these securities does not involve management's judgment.

When quoted prices in active markets are not available, the determination of estimated fair value is based on market standard valuation methodologies, giving priority to observable inputs. The significant inputs to the market standard valuation methodologies for certain types of securities with reasonable levels of price transparency are inputs that are observable in the market or can be derived principally from or corroborated by observable market data. Generally, these investments are classified as Level 2.

When observable inputs are not available, the market standard valuation methodologies for determining the estimated fair value of certain types of securities that trade infrequently, and therefore have little or no price transparency, rely on inputs that are significant to the estimated fair value that are not observable in the market or cannot be derived principally from or corroborated by observable market data. These unobservable inputs can be based in large part on management's judgment or estimation, and cannot be supported by reference or market activity. Even though these inputs are unobservable, management believes they are consistent with what other market participants would use when pricing such securities and are considered appropriate given the circumstances. Generally, these investments are classified as Level 3.

| Type of Class or Financial Instrument | Carrying Value | Effective Interest Rate | Maturity Date | Explanation |

Reserves for the Company's incurred losses and loss adjustment expenses (after intercompany pooling) attributable to insured events of prior years reflect favorable development totaling \$799,464. The favorable development in these lines was slightly offset by losses in the other liability and commercial multiple peril lines of business. There were not any premium adjustments made as a result of this loss and loss adjustment expense development.

B. Information about Significant Changes in Methodologies and Assumptions
