D. Loan-Backed Securities

1. The Company uses dealer-modeled prepayment assumptions for mortgage-backed and asset-backed securities at the date of purchase to determine effective yields; significant changes in estimated cash flows from the original purchase assumptions are accounted for on a prospective basis.
2. The Company had no loan-backed securities with a recognized other-than-temporary impairment ("OTTI") due to either the intent to sell or the inability or lack of intent to hold to recovery during the three months ended March 31, 2019.

NOTES TO FINANCIAL STATEMENTS

3. The Company does not have any loan-backed securities with an OTTI recognized during the three months ended March 31, 2019.

4. The following table shows all loan-backed securities with an unrealized loss:

a. The aggregate amount of unrealized losses:		
1. Less than 12 months	\$ (10,651)	
2. 12 months or longer	(89,356)	
b. The aggregate related fair value of securities with unrealized losses:		
1. Less than 12 months	\$ 1,971,230	
2. 12 months or longer	4,055,250	

5. Based on cash flow projections received from independent sources (which reflect loan to collateral values, subordination, vintage and geographic concentration), implied cash flows inherent in security ratings and analysis of historical payment data, management believes that the Company will recover its cost basis in all securities with unrealized losses as of March 31, 2019. The Company has the intent to hold such securities until they recover in value or mature.

Note 20 – Fair Value Measurements

A. Inputs Used for Assets and Liabilities Measured at Fair Value

1. Fair Value Measurements by Level 1, 2 and 3

The Company categorizes its financial instruments, based on the degree of subjectivity inherent in the method by which they are valued, into a fair value hierarchy of three levels. The fair value hierarchy prioritizes the inputs, which refer broadly to assumptions market participants would use in pricing an asset or liability, into three levels. It gives the highest priority to quoted prices (unadjusted) in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The level in the fair value hierarchy within which a fair value measurement in its entirety falls is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

Level 1 inputs are quoted prices (unadjusted) in active markets for identical securities that the reporting entity has the ability to access at the measurement date.

Level 2 inputs are inputs other than quoted prices within Level 1 that are observable for the security, either directly or indirectly. Level 2 inputs include quoted prices for similar securities in active markets, quoted prices for identical or similar securities that are not active and observable inputs other than quoted prices, such as interest rate and yield curves.

Level 3 inputs are unobservable inputs for the asset or liability.

The Company did not hold any investments measured at fair value at March 31, 2019 or at December 31, 2018.

The Company uses the end of the reporting period as its policy for determining transfers into and out of each level. There were no transfers between Level 1 and Level 2 during 2019 and 2018, respectively.

2. Rollforward of Level 3 Items

The Company did not hold any Level 3 securities carried at fair value during the three months ended March 31, 2019 or 2018.

NOTES TO FINANCIAL STATEMENTS**3. Policy on Determining when Transfers between Levels are Recognized**

At the end of each reporting period, the Company evaluates whether or not any event has occurred or circumstances have changed that would cause an instrument to be transferred between levels. The Company's policy is to recognize transfers in and transfers out as of the end of the reporting period.

4. Inputs and Techniques Used for Level 2 and Level 3 Fair Values

The Company's investment manager, American Money Management Corporation ("AMMC") (an affiliate) is responsible for the valuation process and uses data from outside sources (including nationally recognized pricing services and broker/dealers) in establishing fair value. Pricing services use a variety of observable inputs to estimate the fair value of fixed maturities that do not trade on a daily basis. These inputs include, but are not limited to, recent reported trades, benchmark yields, issuer spreads, bids or offers, reference data and measures of volatility. Included in the pricing of mortgage-backed securities are estimates of the rate of future prepayments and defaults of principal over the remaining life of the underlying collateral. Inputs from brokers and independent financial institutions include, but are not limited to, yields or spreads of comparable investments which have recent trading activity, credit quality, duration, credit enhancements, collateral value and estimated cash flows based on inputs including delinquency rates, estimated defaults and losses, and estimates of the rate of future prepayments. Valuation techniques utilized by pricing services and prices obtained from external sources are reviewed by the Company's affiliated investment professionals who are familiar with the securities being priced and the markets in which they trade to ensure the fair value determination is representative of an exit price. To validate the appropriateness of the prices obtained, these investment professionals compare the valuation received to independent third party pricing sources and consider widely published indices (as benchmarks), recent trades, changes in interest rates, general economic conditions and the credit quality of the specific issuers. In addition, AMMC communicates directly with the pricing service regarding the methods and assumptions used in pricing, including verifying, on a test basis, the inputs used by the pricing service to value specific securities.

Level 1 consists of publicly traded equity securities and highly liquid, direct obligations of the U.S. Government whose fair value is based on quoted prices that are readily and regularly available in an active market. Level 2 primarily consists of financial instruments whose fair value is based on quoted prices in markets that are not active and include U.S. government agency securities, fixed maturity investments and perpetual preferred stocks that are not actively traded. The Company primarily uses the market approach valuation technique for all investments.

A. Reserves as of December 31, 2018 were \$13,418,769. As of March 31, 2019, \$1,156,000 has been paid for incurred claims and claim adjustment expenses attributable to insured events of prior years. Reserves remaining for prior years are now \$12,202,769 as a result of re-estimation of unpaid claims and claim adjustment expenses. Therefore, there has been a \$60,000 favorable prior year development since December 31, 2018 to March 31, 2019. The favorable development in 2019 resulted from the combination of settling cases and adjusting current estimates of open cases and incurred but not reported losses (IBNR) for amounts less than the case and IBNR estimates carried at the end of the prior year. For purposes of computing the recorded case and IBNR estimates, management of the Company analyzes historic data and estimates the impact of various loss development factors, such as our historic loss experience and that of the industry, trends in claims frequency and severity, our mix of business, our claims processing procedures, legislative enactments, judicial decisions, legal developments in imposition of damages and changes and trends in general economic conditions, including the effects of inflation. Additionally, management utilizes analysis that is derived from a review of quarterly results performed by actuaries employed by Great American Insurance Company.
