B. Use of Estimates in the Preparation of the Financial Statement.
The preparation of financial statements in conformity with NAIC SAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policy
No significant changes for items 1, 3-5, 7 and 9-11

2. Investments - The Company accounts for its investments in bonds in accordance with the provisions of Accounting Standards Codification ("ASC") Topic 320, Investments – Debt and Equity Securities (formerly Statement of Financial Accounting Standards ("SFAS") No. 115, Accounting for Certain Investments in Debt and Equity Securities). ASC Topic 320 requires that debt securities be classified as either held-to-maturity, trading, or available-for-sale.

Bonds consist principally of obligations issued and guaranteed by the U.S. Government or its agencies and corporate debt securities rated in one of the top three credit ratings by Moody's and/or Standard & Poor's rating agencies. Bonds are classified as held-to-maturity and are recorded at amortized cost because the Company has the ability and intent to hold such investments to maturity. The Company utilizes the level-yield method to amortize premiums and accrete discounts over the stated maturity period of the related investment and is reported in net investment income.

Common stocks include the Company's investment in its wholly owned subsidiary and are carried at the value determined under the equity method of accounting, which management believes approximates market value. The estimated fair value of the investment in ESI is determined based on the Statement of Statutory Accounting Principles (SSAP) No. 97, Investments in Subsidiary, Controlled, and Affiliated Entities, A Replacement of SSAP No. 88, and, accordingly is carried at the subsidiary's underlying audited capital and surplus amounts as determined on a statutory basis. Equity in net income or loss and surplus transactions of subsidiaries are reflected directly in the Company's unassigned surplus. For GAAP reporting purposes, the Company prepares consolidated financial statements with its subsidiaries.

A summary of ESI's key financial data (statutory-basis) as of March 31, 2019, is shown below:

Statement of Income data:		
Total revenues	\$	737,598
Income before federal income taxes	\$	156,584
Net income	\$	123,684
Balance Sheet data:		
Total assets	\$	57,745,385
Total liabilities	\$	35,416,719

NOTES TO FINANCIAL STATEMENTS

Common stocks also include 13,094 shares of Federal Home Loan Bank (FHLB) common stock with a cost, par value and carrying value of \$1,309,400 at March 31, 2019 and December 31, 2018, in order for the Company to maintain its membership in the FHLB. To maintain its membership, the Company is required to hold FHLB membership stock in an amount equal to 0.16% of the Company's admitted assets as determined under statutory accounting principles, which is adjusted annually by the FHLB. FHLB membership stock is restricted, can only be sold to the FHLB at par value, and requires a five-year notice by the Company to terminate membership and redeem the shares. The Company may borrow from the FHLB but must purchase additional shares of FHLB stock (activity stock) equal to 2% of borrowings. FHLB activity stock is redeemable at any time by the Company or by the FHLB, as the Company's FHLB borrowings are paid down and can only be sold to the FHLB. Due to the restrictions placed on transferability and the Company's determination that there is no known impairment as to the ultimate recoverability of the par value of FHLB stock, the Company's carrying value of its investment in FHLB stock is considered to approximate its fair value at March 31, 2019 and December 31, 2018.

Common stocks also include publicly-traded equity securities as permitted by Ohio Revised Code Section 3925.08 in an aggregate amount not to exceed the Company's statutory unassigned surplus as reduced by its authorized control level risk-based capital. The Company measures its investments in publicly-traded equity securities at fair value and recognizes changes in the fair value as a component of net income under GAAP. For statutory accounting, only realized gains and losses are recognized in income, while unrealized gains and losses are recognized as a change in statutory surplus. At March 31, 2019 and December 31, 2018, the unrealized gains/(losses) for publicly-traded equity securities were \$60,315 and (\$447,824), respectively. At March 31, 2019 and December 31, 2018, the realized gains/(losses) were \$2,116 and (\$26,631), respectively.

The Company employs a systematic methodology that considers available evidence in evaluating potential other-than-temporary impairment of investments. In the event that the cost of an investment exceeds its fair value, the Company evaluates, among other factors, the magnitude and duration of the decline in fair value; the financial health of and business outlook for the issuer; changes to the debt ratings of the issuer, or specific security, by a rating agency; and the performance of the underlying assets. For debt investments, the ability and intent to hold the security, and the probability that the Company will be unable to collect all amounts due according to contractual terms of a debt security in effect at the date of acquisition is assessed. For equity securities, the Company evaluates impairment by considering a number of factors including the length of time and/or the significance of decline below cost, the Company's ability and intent to hold these securities through their anticipated recovery periods, the current financial condition of the issuer and its future business prospects, and an assessment of the ability of the security's fair value to recover to back to cost in the foreseeable future. Subsequent recoveries in fair value are not recognized in earnings, but are recorded as unrealized gains in statutory surplus. Once a decline in fair value of an investment security is determined to be other than temporary, an impairment charge is recorded to net realized capital gains and losses, in the Statement of Income, and a new cost basis in the investment is established.

The Company from time to time advances funds in connection with the liquidation or merger of, or capital assistance provided to, troubled credit unions in exchange for the right to receive future repayments. The Company expects to recover these amounts through repayment from the credit unions, the collection of loans, the sale of assets or the settlement of subrogated claims against third party insurers. For any such advances, generally only loans secured by first mortgages are recorded as admitted assets in the accompanying statutory-basis financial statements, in an amount not to exceed the fair value of the underlying collateral. In addition, any unsecured advances that are collected within 90 days of year end are reported as admitted assets (none at March 31, 2019 and December 31, 2018).

Real estate is recorded at cost less depreciation. Depreciation is computed on the straight-line basis using 25-year to 40-year lives, for buildings and improvements.

Gains or losses on investments sold are based on the specific identification method and are included in investment income. Investment purchases and sales are recorded on the trade date. Interest income is accrued when earned.

Beginning in 2016, the Company invested \$500,000 into a start-up joint venture, structured in the form of a limited liability company and operating as a partnership. Effective November 30, 2018 the Company terminated its ownership interest in this joint venture and received proceeds of \$215,700, resulting in an overall loss to the Company of \$284,300. Prior to the termination, the Company owned a one-third interest in the joint venture and its investment therein was carried under the equity method of accounting. The Company's share of the joint venture's net income or losses (net loss of \$173,642 and \$106,056 in 2018 and 2017, respectively) was recorded as an adjustment to the carrying value of the investment and as a change in unassigned surplus. The carrying value of the Company's investment in the joint venture was \$389,343 at December 31, 2017 (none at March 31, 2019 and December 31, 2018).

6. Mortgage-backed Securities – Market values and related prepayment assumptions for CMOs and mortgage-backed securities are obtained from broker dealer survey values. For book purposes, the prospective adjustment method is used where changes in prepayment speeds materially impact expected remaining lives of the securities.

8. Reinsurance – Effective February 1, 2017, the Company and ESI (the "Companies") entered into a renewal reinsurance agreement with an authorized reinsurer, for a two-year term through February 1, 2019, to reinsure its excess share program. The renewal agreement had substantially the same terms and conditions as the prior reinsurance agreement that expired February 1, 2017, including a single layer of aggregate reinsurance coverage of \$7,500,000, aggregate retention of \$7,500,000 and annual premiums of \$375,000, which are allocated between the Companies pro rata based on their monthly excess insurance in force.

NOTES TO FINANCIAL STATEMENTS

Effective February 1, 2019, the Companies entered into a reinsurance agreement with an unauthorized Bermuda reinsurer, wholly-owned by a U.S. insurer and approved as a trustee reinsurer in Ohio and other states, for a two-year term through February 1, 2021. This agreement provides a single layer of aggregate reinsurance coverage of \$9,000,000, aggregate retention of \$9,000,000 and annual premiums of \$450,000, which are allocated between the Companies pro rata based on their monthly excess insurance in force.

B. FHLB (Federal Home Loan Bank) Agreements

(1) Nature of the FHLB Agreement
FHLB (Federal Home Loan Bank) Advised Line of Credit Agreement: In July 2011, the Company became a member of the Federal Home Loan Bank of Cincinnati (FHLB) and purchased \$296,500 in membership capital stock. Additional capital stock in the amount of \$965,200 and \$47,700 was purchased in 2018 and prior to 2017, respectively, for total capital stock of \$1,309,400 (\$309,390 membership stock and \$1,000,010 excess stock) at March 31, 2019. In addition to the \$70,000,000 FHLB committed line, on October 17, 2018, the FHLB approved a one-year renewal line capacity for the Company's \$200 million "advised" line of credit, which expires October 11, 2019. The interest rate on either of the FHLB lines varies depending upon the advance maturity term selected by the Company and can be either fixed or variable rate. Availability of the FHLB advised line, or a portion thereof, is contingent upon the Company maintaining sufficient pledged collateral at the FHLB consisting of US Government Agency securities and other collateral with a market value of at least 103% of the amount borrowed. At March 31, 2019, the Company has approximately \$83.4 million of US Government Agency securities pledged with the FHLB. The Company can also pledge qualifying mortgage loans towards FHLB borrowings, allowing the Company to borrow approximately 75% of the outstanding qualifying mortgage loans. The Company holds no mortgage loans at March 31, 2019. The Company is required to purchase additional FHLB stock equal to 2% of any borrowed funds. The Company had no FHLB borrowings outstanding at March 31, 2019 and December 31, 2018.

Note 20 – Fair Value Measurements

A. Fair Value Measurements
(1) Fair Value Measurements at Reporting Date
With regard to the Company's financial assets that are disclosed at a fair value, which is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, the Company uses various valuation approaches, including quoted market prices and discounted cash flows. The ASC and SSAP No. 100, Fair Value Measurement, establishes a hierarchy for inputs used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the most observable inputs be used when available. Observable inputs are obtained from independent sources and can be validated by a third party, whereas, unobservable inputs reflect assumptions regarding what a third party would use in pricing an asset or liability. The fair value hierarchy is broken down into three levels based on the reliability of inputs as follows:

Level 1 - Valuations based on quoted prices in active markets for identical instruments that the Company is able to access. Since valuations are based on quoted prices that are readily and regularly available in an active market, valuation of these products does not entail a significant degree of judgment.

Level 2 - Valuations based on quoted prices in active markets for instruments that are similar, or quoted prices in markets that are not active for identical or similar instruments, and model-derived valuations in which all significant inputs and significant value drivers are observable in active markets.

Level 3 - Valuations based on inputs that are unobservable and significant to the overall fair value measurement.

Reclassification of certain financial instruments may occur when observability of inputs change. There were no transfers between assets carried at fair value classified within Level 1 and Level 2 of the fair value hierarchy during the periods ended March 31, 2019 and December 31, 2018.

There were no purchases, sales, transfers into, or transfers out of assets carried at fair value and classified within Level 3 of the fair value hierarchy during the periods ended March 31, 2019 and December 31, 2018.

A. Change in Incurred Losses and Loss Adjustment Expenses

The Company writes only one line of business, “Other” (with two products written solely to credit unions: primary share insurance and excess share insurance) and sets loss reserves on a prudent basis for potential claims events. Primary insurance claims can involve specifically identified claims events and other events incurred but not reported (IBNR). The Company also sets aside unallocated loss reserves for its primary insurance book of business so that aggregate loss reserves remain within an actuarially accepted range. Excess insurance claims events are infrequent (rare) but potentially severe and as a result, upon consultation with the Company’s independent actuary, the Company provides annual loss reserve additions so that cumulative loss reserves are within an actuarially accepted range.

The Company provided specific loss reserves of approximately \$32.24 million during 2009 related to two Primary-insured credit unions in Nevada, one of which was acquired by another Primary-insured credit union through a purchase and assumption (P&A) transaction that resulted in a gross claim paid of \$8,000,000 under a secondary capital note transaction. The Company transferred \$7,533,000 of guaranty loss reserves to an allowance for loss on the secondary capital note as of

NOTES TO FINANCIAL STATEMENTS

June 30, 2017 and December 31, 2016. As part of the guarantee agreement extension expiring September 30, 2017, the Company and the credit union entered into a partial claims settlement on September 30, 2014 in which the Company paid \$14,154,150 out of the \$20.9 million specific loss reserve at that date for this guarantee. The Company also recorded recovery income prior to 2016 of \$472,886 on the secondary capital note, primarily for interest collected that was previously fully reserved.

On September 29, 2017 the Company and the credit union entered into a final claims settlement in which the Company paid \$3,002,368, representing the amount of cumulative guarantee losses not previously paid by the Company under the September 30, 2014 partial claims settlement, and which was approximately \$597,000 less than the \$3,600,000 specific loss reserve held by the Company through August 31, 2017. The excess amount of case loss reserves was transferred to the Company's unallocated bulk loss reserves at September 30, 2017. On September 29, 2017, the Company also received \$208,320 of accrued interest that was due on the secondary capital note as of September 30, 2017. As part of the settlement, the credit union was released by the Company from, and the Company agreed to forgive the credit union of future obligations under, the secondary capital note, resulting in the Company charging off the remaining outstanding note balance of approximately \$7,533,000 against the fully funded allowance for loss account that had been recorded by the Company since 2009.

The Company had also provided \$24.6 million in the reserve for guaranty losses account at December 31, 2009 for estimated losses on a second troubled Nevada credit union. The Company determined its estimated loss at the time on this credit union through an analysis of potential losses under different events that may transpire during the workout period for this credit union, including capital assistance, merger/P&A with guarantees, liquidation and financial and operational recovery by the credit union, and the likelihood of occurrence of each identified event. Between 2014 and January 2016 the capital assistance notes were paid down and were fully collected and paid off as of January 26, 2016, including \$4.47 million for the final Note installment and interest, and resulted in recovery income of approximately \$27.5 million, including approximately \$1.0 million in interest on the notes that was recorded in 2014-2015.

Although the Company does not normally charge a premium under its primary insurance program, the Company's governing Ohio statute and its primary insurance policy permit premiums to be assessed against Primary-insureds in order to ensure that the Company maintains a sufficient equity base for its insurance risk. As a result of escalating risks identified in the state of Nevada in 2009, as discussed above, the Company billed its Primary-insureds a first time ever special premium assessment of \$0.15 per \$100 of each Primary-insured's total shares on December 31, 2009. This special premium assessment generated approximately \$15.2 million of revenues in 2009 but was not collected until 2010, to partially offset the primary insurance losses of over \$32 million discussed above.

On September 30, 2010, the Company again billed its Primary-insureds a special premium assessment of \$0.15 per \$100 of each Primary-insured's total shares. The special premium assessment generated approximately \$16.2 million of revenues in 2010.

On September 30, 2011, the Company billed its Primary-insureds a third special premium assessment of \$0.15 per \$100 of each Primary-insured's total shares. The special premium assessment generated approximately \$16.4 million of revenues in 2011.

On September 30, 2012, the Company billed its Primary-insureds a fourth special premium assessment of \$0.09 per \$100 of each Primary-insured's total shares. The special premium assessment generated approximately \$10.5 million of revenues in 2012.

On September 30, 2013, the Company billed its Primary-insureds a fifth special premium assessment of \$0.075 per \$100 of each Primary-insured's total shares. The special premium assessment generated approximately \$9.0 million of revenues in 2013.

As a result of the repayments of the previously fully reserved Special Reserve Instrument (described above) the Company did not assess a special premium assessment from 2014 through 2016.

As a result of continuing suppressed market interest rates, the Company charged a special premium assessment in 2017 of \$0.025 per \$100 of each Primary-insured's total shares or 2.5 basis points. The special premium assessment generated approximately \$3.5 million of revenues in 2017.

The Company did not assess a special premium assessment in 2018.

Since the Company has no specific excess insurance loss events identified at March 31, 2019, for which a loss reserve would normally be established, all of the Company's loss reserves related to excess insurance and its unallocated primary insurance loss reserves are treated as unallocated IBNR loss reserves. For purposes of Schedule P, in any given year the cumulative unallocated IBNR loss reserves held are considered to have occurred as follows: (1) 60% in current year; (2) 30% in the previous year; and (3) 10% in the second previous year and have been allocated as such in Schedule P, which is comparable to methods used by other insurance companies with infrequent claims events. Since claims events are rare (infrequent but potentially severe), the typical year shows favorable development. A summary of the favorable loss development for the Company's single line of business ("Other") for 2019 and a reconciliation of loss provision, claims payments, prior year loss development and gross losses incurred in 2019, follows (dollars in thousands):

Note 30 – Premium Deficiency Reserves
The Company provides deposit insurance to participating credit unions under the Company's primary and excess contracts. Under the primary insurance contract, a deposit of 1.3% of the member's year-end share balance is required. These capitalization deposits are non-interest bearing and the investment earnings therefrom are used to fund the Company's deposit insurance programs in lieu of a normal premium charge. Special Premium Assessments may be charged from time to time against insured credit unions to fund claims activity during unusual times, such as in 2009 – 2013 and again in 2017, in order to maintain the insurance fund at a regulatory acceptable primary insurance equity ratio (currently the equity ratio is 1.66% of primary insurance fund equity to primary insured shares). Even so, the deposits for the primary and excess deposit contracts are at-risk to the insured credit unions and ultimately can act as a reserve that is available to pay claims if needed. The aggregate of capitalization deposits that are available to pay claims are \$199,071,509 at March 31, 2019. Therefore the Company has determined there is not a need for a premium deficiency reserve and none has been recorded at March 31, 2019. This evaluation was completed on April 29, 2019. The Company considers investment income when evaluating the need for premium deficiency reserves.
