1. Summary of Significant Accounting Policies

A. Accounting Practices

The financial statements of The Health Plan of Ohio, Inc. (the Plan or the Company) have been prepared in conformity with the accounting practices prescribed or permitted by the Ohio Department of Insurance. The statements have been completed in accordance with the National Association of Insurance Commissioners' (NAIC) *Accounting Practices and Procedures* manual except to the extent that state law differs.

A reconciliation of the Company's net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the State of Ohio is shown below:

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of statutory-basis financial statements in conformity with statutory accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the statutory-basis financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates and assumptions.

C. Accounting Policy

The Company uses the following significant accounting policies:

- 1. Cash, Cash Equivalents and Short-Term Investments** - Cash includes cash on deposit. Cash equivalents include investments with original maturities of three months or less. Short-term investments include all investments whose maturity at the time of acquisition are one year or less. Short-term investments are reported at cost, which approximates estimated fair value.
- 2. Debt Investments** - Debt investments, which are classified as bonds and consist of government securities, are recorded at amortized cost or fair value based on their NAIC rating. Premiums and discounts on debt investments are amortized or accreted into income on the constant yield method over the term of the investment.
- 3. Common Stocks** – The Company has no investments in common stocks.
- 4. Preferred Stocks** – The Company has no investments in preferred stocks.
- 5. Mortgage Loans** – The Company has no investments in mortgage loans.
- 6. Loan-backed Securities** – The Company has no investments in loan-backed securities.
- 7. Investments in Subsidiaries, Controlled, and Affiliated Entities** – The Company has no investments in subsidiaries, controlled, and affiliated entities.
- 8. Investments in Joint Ventures, Partnerships, and Limited Liability Companies** – The Company has no investments in joint ventures, partnerships, and limited liability companies.
- 9. Derivatives** – The Company has no investments in derivatives.
- 10. Premium Deficiency Reserve** – Not applicable.

11. Unpaid Claims – Not applicable.

12. Capitalization Policy – The Company has not modified its capitalization policy from the prior period.

13. Pharmacy Rebates – Not applicable.

14. Impairment – The Company continually reviews investments for impairment conditions that indicate an other-than-temporary decline in market value has occurred. In conducting this review, numerous factors are considered which individually or in combination indicate that a decline is other than temporary and that a reduction of the carrying value is required. These factors include specific information pertaining to an individual company or a particular industry and general market conditions that reflect prospects for the economy as a whole. If a decline of fair value is determined to be other-than-temporary, the cost basis of the security is written down to the fair value and the amount is recorded as a net realized loss in the statutory-basis statements of revenues and expenses.

15. Investment Income - Investment income consists of interest income. Interest income includes amortization of premium and accretion of discount on bonds based on the constant yield method. Interest is recognized on an accrual basis. All investment income due and accrued with amounts over 90 days past due are nonadmitted. The Company had no such amounts nonadmitted as of March 31, 2019 or December 31, 2018.

Realized capital gains and losses on securities sold are determined using the first-in, first-out method and are reflected in operations.

16. Revenue Recognition – Not applicable.

17. Retrospectively Rated Contracts – Not applicable.

18. Reinsurance – Not applicable.

19. Income Taxes – Not applicable.

20. Patient Protection and Affordable Care Act - In 2010, the U.S. Congress passed and the President signed into law the Affordable Care Act (ACA). The ACA has created significant changes and will continue to create significant changes for health insurance markets. Certain requirements included changes to Medicare Advantage payments and the minimum Medical Loss Ratio (MLR) provision that requires insurers to pay rebates to customers when insurers do not meet or exceed the specified MLR thresholds. Most of the provisions of the ACA with more significant effects on the health insurance marketplace, both state and federal, went into effect on January 1, 2014, including a requirement that insurers guarantee the issuance of coverage to all individuals regardless of health status, strict rules on how health insurance is rated, the assessment of new taxes and fees (including annual fees on health insurance companies), the creation of new insurance exchanges for individuals and small groups, the availability of premium subsidies for certain individual products, and substantial expansions in eligibility for Medicaid.

Implementation of the ACA brings with it significant oversight responsibilities by health insurers that may result in increased governmental audits, increased assertions of False Claims Act violations, and an increased risk of other asserted claims.

20. Fair Value Measurements

A. Assets and Liabilities Measured at Fair Value

SSAP No. 100, Fair Value, clarifies the definition of estimated fair value and establishes a hierarchy for measuring estimated fair value. The hierarchy established by this standard consists of three levels to indicate the quality of the estimated fair value measurements as follows:

- Level 1 - Quoted Prices in Active Markets for Identical Assets and Liabilities: Unadjusted quoted prices for identical assets or liabilities in active markets that are readily and regularly obtainable.
- Level 2 - Significant Other Observable Inputs: Quoted prices in markets that are not active or inputs that are observable either directly or indirectly. These inputs can include quoted prices for similar but not identical assets or liabilities other than quoted prices in Level 1.
- Level 3 - Significant Unobservable Inputs: Unobservable inputs that are supported by little or no market activity and are significant to the determination of estimated fair value of the assets and liabilities. Unobservable inputs reflect the entity's judgement or estimation about the assumptions that market participants would use in pricing the asset or liability.

As defined in SSAP No. 100, estimated fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. SSAP No. 100 establishes a three-level hierarchy for valuing assets and liabilities based on how transparent (observable) the inputs are that are used to determine estimated fair value, with the inputs considered most observable categorized as Level 1 and those that are the least observable categorized as Level 3. For some assets, the inputs used to measure estimated fair value may fall into different levels of the fair value hierarchy. When this is the case, the asset is categorized in the table based on the lowest level input that is significant to the fair value measurement in its entirety. The Company's assessment of the significance of a particular input to the estimated fair value measurement in its entirety requires judgment and considers factors specific to the assets being valued.

When available, the estimated fair values are based on quoted prices in active markets that are readily and regularly obtainable. Generally, these investments are classified in Level 1. Generally, these are the most liquid of the Company's securities holdings and valuation of these securities does not involve management's judgment.

When quoted prices in active markets are not available, the determination of estimated fair value is based on market standard valuation methodologies, giving priority to observable inputs. The significant inputs to the market-standard valuation methodologies for certain types of securities with reasonable levels of price transparency are inputs that are observable in the market or which can be derived principally from or corroborated by observable market data. Generally, these investments are classified as Level 2.

When observable inputs are not available, the market standard valuation methodologies for determining the estimated fair value of certain types of securities that trade infrequently, and therefore have little or no price transparency, rely on inputs that are significant to the estimated fair value that are not observable in the market or which cannot be derived principally from or corroborated by observable market data. These unobservable inputs can be based in large part on management's judgment or estimation and cannot be supported by reference or market activity. Generally, these investments are classified as Level 3.

The estimated fair value of cash, cash equivalents and short-term investments approximates carrying value, and is classified as Level 1.

Due to the short-term nature of accrued investment income, the Company believes there is minimal risk of material changes in interest rates or credit of the issuer such that estimated fair value approximates carrying value. These amounts are generally classified as Level 2.

As of March 31, 2019 and December 31, 2018, the Company had no financial instruments measured at their estimated fair value under the three-level fair value hierarchy discussed above.

B. Other Fair Value Disclosures

None.

C. Fair Values for All Financial Instruments

The following table presents the admitted value and the estimated fair value for all admitted assets that are considered to be financial instruments as of March 31, 2019 and December 31, 2018. The Company had no liabilities considered to be financial instruments as of March 31, 2019 and December 31, 2018. The estimated fair values are categorized into the three-level fair value hierarchy as described above.
