C. Accounting Policy:

6. Loan-backed securities are valued at amortized cost using the scientific interest method. The retrospective adjustment method is used to determine the fair value of all loan-backed securities.

D. Going Concern:

Management has evaluated the Company's viability and has no doubt as to the Company's ability to continue as a going concern.

2. Accounting Changes and Corrections of Errors:

A. As of January 1, 2019, management revised previously disclosed financial information related to accounting for its pension and postretirement benefits. The Company participates in an intercompany pooling arrangement as defined in Note 26. In accordance with this arrangement, the Company had been pooling the prepaid pension asset, overfunded pension plan asset, net liabilities and the unrecognized actuarial gains and losses along with prior service costs recorded in unassigned funds (surplus) for pension and postretirement benefits. However, management determined that such pooling was not appropriate for these items. Amounts recognized as pension expense continue to be appropriately pooled in each period presented.

As a result, the balance sheets for Milbank, Patrons Mutual, State Auto Mutual and State Auto P&C have been revised to reverse the impact of pooling these items. In addition, the associated deferred tax benefit at March 31, 2019 reflected the impact of no longer pooling these items. The increases (decreases) to each company's annual statement line items at January 1, 2019 are detailed in the table below.

- The RHC transaction described in Note 3A was accounted for as a statutory purchase.

20. Fair Value Measurement:

A. Inputs Used for Assets and Liabilities Measured and Reported at Fair Value or Net Asset Value:

The Company has categorized its assets and liabilities that are reported on the balance sheet at fair value into the three-level fair value hierarchy as reflected in the table below. The three-level fair value hierarchy is based on the degree of subjectivity inherent in the valuation method by which fair value was determined. The three levels are defined as follows.

Level 1 - Quoted Prices in Active Markets for Identical Assets and Liabilities: This category, for items measured at fair value on a recurring basis, includes exchange-traded common stocks and other invested assets. The estimated fair value of the equity securities within this category are based on unadjusted market prices provided by the Securities Valuation Office ("SVO") and are thus classified as level 1. The Company's other invested assets include an investment that consists primarily of holdings in publicly-traded mutual funds. The Company believes that its prices for these publicly-traded mutual funds, which are based on an observable market price for an identical asset in an active market, reflect their fair values.

Level 2 - Significant Other Observable Inputs: The Company has no assets or liabilities measured and reported at fair value in this category.

Level 3 - Significant Unobservable Inputs: This category, for items measured at fair value on a recurring basis, includes common stocks that are not publicly traded. The estimated fair value of the equity securities within this category are based on per share cost and are thus classified as level 3. The Company holds equity securities as a member of Federal Home Loan Bank of Cincinnati (FHLB), which is not publicly traded. SVO does not provide a fair value for this security.

Net asset value (NAV): This category, for items measured at net asset value, includes other invested assets. The Company's other invested assets include one international private equity fund, Silchester International Partners Ltd. ("the fund") that invests in equity securities of foreign issuers and is managed by a third party investment manager. The estimated fair value of the fund within this category is based on net asset value obtained from a third party trustee statement.

- The Company has categorized its assets that are measured at fair value or net asset value into the three-level fair value hierarchy as reflected in the following table. The Company has no liabilities that are measured and reported at fair value. See item 3 below for a discussion of the Company's transfer policy. See item 4 below for a discussion of Level 2 and Level 3 assets.

3. Transfers between level categorizations may occur due to changes in the availability of market observable inputs. Transfers in and out of level categorizations are reported as having occurred at the beginning of the quarter in which the transfer occurred. There were no transfers between level categorizations as of June 30, 2019.

See item A above for a discussion of valuation techniques and inputs used in determining fair value. Since these equity securities are not publicly traded, they are classified as Level 3.
5. The Company has no derivative assets or liabilities.

B. Other Fair Value Disclosures: Not applicable.

C. Fair Values for All Financial Instruments by levels 1, 2, and 3:

See Item A for a discussion on valuation techniques for assets and liabilities that are measured and reported at fair value or net asset value.

The Company utilizes information provided by the SVO to estimate fair value measurements for the majority of its fixed maturities. If market data is not provided by the SVO, fair value is determined by using data provided by a nationally recognized pricing service.

The Company estimates the fair value of the notes payable to affiliates using market quotations for U.S. treasury securities with similar maturity dates and applies an appropriate credit spread.
