Fair Value Measurement****Inputs Used for Assets and Liabilities Measured at Fair Value**

The Company financial assets carried at fair value have been classified, for disclosure purposes, based on a hierarchy defined by ASC 820 Fair Value Measurements and Disclosures. The hierarchy gives the highest ranking to fair values determined using unadjusted quoted prices in active markets for identical assets and liabilities (Level 1) and the lowest ranking to fair values determined using methodologies and models with unobservable inputs (Level 3). An asset or a liability classification is based on the lowest level input that is significant to its measurement. For example, a Level 3 fair value measurement may include inputs that are both observable (Levels 1 and 2) and unobservable (Level 3). The levels of the fair value hierarchy are defined as follows:

- Level 1 Values are unadjusted quoted prices for identical assets and liabilities in active markets accessible at the measurement date.
- Level 2 Inputs include quoted prices for similar assets or liabilities in active markets, quoted prices from those willing to trade in markets that are not active, or other inputs that are observable or can be corroborated by market data for the term of the instrument. Such inputs include market interest rates and volatilities, spreads and yield curves.
- Level 3 Certain inputs are unobservable (supported by little or no market activity) and significant to the fair value measurement. Unobservable inputs reflect the Company's best estimate of what hypothetical market participants would use to determine a transaction price for the asset or liability at the reporting date.

(1) Fair value measurements at reporting date

Assets recorded on the financial statements at fair value measurements by accounting hierarchy levels 1, 2 and 3.

The Company has categorized its assets that are measured at fair value into the three-level fair value hierarchy as reflected in the following table. The Company had no liabilities recorded at fair value.

Description for each class of asset or liability	Level 1	Level 2	Level 3	Net Asset Value (NAV)	Total
a. Assets at fair value					
Cash Equivalent-Money Market Mutual Funds.....	\$ 151,202	\$	\$	\$	\$ 151,202
Total assets measured at fair value	<u>\$ 151,202</u>	<u>\$</u>	<u>\$</u>	<u>\$</u>	<u>\$ 151,202</u>
b. Liabilities at fair value					
Liabilities.....	\$	\$	\$	\$	\$
Total liabilities measured at fair value	<u>\$</u>	<u>\$</u>	<u>\$</u>	<u>\$</u>	<u>\$</u>

Reclassifications impacting Level 3 financial instruments are reported as transfers in (out) of the Level 3 category as of the beginning of the quarter in which the transfer occurs; gains and losses in income only reflect activity for the period the instrument was classified in Level 3. The same policy is followed when a transfer between Level 1 and Level 2 occurs.

There were no transfers between Level 1 and Level 2 assets during the current period.

(2) Fair value measurements in Level 3 of the fair value hierarchy - None**(3) At the end of each reporting period, the Company evaluates whether or not any event has occurred or circumstances have changed that would cause an instrument to be transferred into or out of Level 3. During the current year, no transfers into or out of Level 3 were required.**

Notes to the Financial Statements**20. Fair Value Measurements (Continued)**

- (4) Fair value measurements for fixed income and equity securities are based on values either published by the NAIC's Security Valuation Office (SVO) or from an independent pricing service vendor. Under certain circumstances, if neither an SVO price nor a Vendor price is available, a price may be obtained from a broker. Short term securities and cash equivalents are valued at amortized cost.

When published prices from the SVO are not available, the Company relies predominately on independent pricing service vendors that have been evaluated and approved by our investment management company's internal pricing policy committee. Generally, pricing service vendors use a pricing methodology involving the market approach, including pricing models, which use prices and relevant market information regarding a particular security or securities with similar characteristics to establish a valuation.

Certain investments are carried at fair value, while others may periodically be carried at fair value based on certain factors such as the NAIC's lower of cost or market rule or an impairment. Assets recorded at fair value are categorized based on an evaluation of the various inputs used to measure the fair value. Supporting documentation received from pricing vendors detailing the inputs, models and processes used in the vendor's evaluation process is used by the Company to determine the appropriate fair value hierarchy. Documentation from each pricing vendor is reviewed and monitored periodically to ensure they are consistent with the Company's pricing policy. Market Information obtained from brokers with respect to security valuations is also considered in the pricing hierarchy.
