(10) Anticipated Investment Income Used in Premium Deficiency Calculation

The Company anticipates investment income as a factor in the premium deficiency calculation, in accordance with SSAP No. 53: Property/Casualty Contracts-Premiums

(11) Management's Policies and Methodologies for Estimating Liabilities for Losses and Loss/Claim Adjustment Expenses

Unpaid loss and loss adjustment expenses include an amount determined from individual case estimates and loss reports and an amount, based upon past experience, for losses incurred but not reported. Such liabilities are necessarily based on assumptions and estimates. While management believes the amount is adequate, the ultimate liability may be in excess of or less than the amount provided. The methods for making such estimates and for establishing the resulting liability is continually reviewed and any adjustments reflected in the period determined.

(12) Changes in the Capitalization Policy and Predefined Thresholds from Prior Period

The Motorists Insurance Group standardized its thresholds for capitalization across all member companies. The Group also implemented updates for software licenses and maintenance agreements that allow amortization over service periods for material transactions.

(13) Method Used to Estimate Pharmaceutical Rebate Receivables

The Company has no pharmaceutical rebate receivables to report.

D. Going Concern

Management has concluded that there is no substantial doubt about the Company's ability to continue as a going concern.

Note 2 – Accounting Changes and Correction of Errors

The Motorists Insurance Group elected to freeze its defined pension and other non-qualified benefit plans effective December 31, 2017. In conjunction with this election, the company voluntarily changed the accounting for its benefit plans to a mark-to-market (MTM) valuation approach. Under the MTM accounting method, actuarial and asset valuation gains and losses are recognized immediately as current year net benefit costs in the Statement of Operations, rather than by amortizing (smoothing) the gains and losses over future calendar years.

Note 20 – Fair Value Measurements

A. Fair Value Measurements

(1) Fair Value Measurements at Reporting Date

Inputs Used for Assets and Liabilities Measured and Reported at Fair Value

SSAP No. 100, Fair Value Measurements, clarifies the definition of estimated fair value and establishes a hierarchy for measuring estimated fair value. The hierarchy established by this standard consists of three levels to indicate the quality of the estimated fair value measurements as described below:

Level 1 - Quoted Prices in Active Markets for Identical Assets and Liabilities: Unadjusted quoted prices for identical assets or liabilities in active markets that are readily and regularly obtainable.

Level 2 - Significant Other Observable Inputs: Quoted prices in markets that are not active or inputs that are observable either directly or indirectly. These inputs can include quoted prices for similar but not identical assets or liabilities other than quoted prices in Level 1.

Level 3 - Significant Unobservable Inputs: Unobservable inputs that are supported by little or no market activity and are significant to the determination of estimated fair value of assets or liabilities. Unobservable inputs reflect the entity's assumptions about the assumptions that market participants would use in pricing the asset or liability.

Description for Each Type of Asset or Liability	(Level 1)	(Level 2)	(Level 3)	Net Asset Value (NAV)	Total
Assets at Fair Value					
Common Stocks, unaffiliated	\$ 10,043,038	\$	\$	\$	\$ 10,043,038
Total	\$ 10,043,038	\$	\$	\$	\$ 10,043,038
Liabilities at Fair Value					
	\$	\$	\$	\$	\$
Total	\$	\$	\$	\$	\$

At the end of each reporting period, the Company evaluates whether or not any event has occurred or circumstances have changed that would cause an instrument to be transferred between Levels 1 and 2. This policy also applies to transfers into or out of Level 3. The Company had no transfers into or out of any of the levels during the period reported.

(2) Fair Value Measurements in (Level 3) of the Fair Value Hierarchy

Description	Beginning Balance at 1/1/2019	Transfers Into Level 3	Transfers Out of Level 3	Total Gains and (Losses) Included in Net Income	Total Gains and (Losses) Included in Surplus	Purchases	Issuances	Sales	Settlem-ents	Ending Balance at 12/31/2019
a. Assets	\$	\$	\$	\$	\$	\$	\$	\$	\$	\$
Total	\$	\$	\$	\$	\$	\$	\$	\$	\$	\$
b. Liabilities	\$	\$	\$	\$	\$	\$	\$	\$	\$	\$
Total	\$	\$	\$	\$	\$	\$	\$	\$	\$	\$

(3) Policies when Transfers Between Levels are Recognized

At the end of each reporting period, the Company evaluates whether or not any event has occurred or circumstances have changed that would cause an instrument to be transferred between Levels 1 and 2. This policy also applies to transfers into or out of Level 3. The Company had no transfers into or out of any of the levels during the period reported.

C. Fair Value Level

The following tables reflect the estimated fair values and admitted values of all admitted assets and liabilities that are financial instruments excluding those

NOTES TO FINANCIAL STATEMENTS

accounted for under the equity method (subsidiaries, joint ventures and ventures). The estimated fair values are categorized into the three-level fair value hierarchy as described above.

Type of Financial Instrument	Aggregate Fair Value	Admitted Assets	(Level 1)	(Level 2)	(Level 3)	Net Asset Value (NAV)	Not Practicable (Carrying Value)
Bonds	\$ 38,064,049	\$ 36,372,055	\$ -	\$ 38,064,049	\$ -	\$ -	\$ -
Common Stocks, unaffiliated	\$ 10,043,038	\$ 10,043,038	\$ 10,043,038	\$ -	\$ -	\$ -	\$ -

Bonds and Common Stocks

When available, the estimated fair values for bonds, including loan-backed and structured securities, and unaffiliated common stocks are based on quoted prices in active markets that are readily and regularly obtainable. Generally, these investments are classified in Level 1. Generally, these are the most liquid of the Company's securities holdings and valuation of these securities does not involve management's judgment.

When quoted prices in active markets are not available, the determination of estimated fair value is based on market standard valuation methodologies, giving priority to observable inputs. The significant inputs to the market standard valuation methodologies for certain types of securities with reasonable levels of price transparency are inputs that are observable in the market or can be derived principally from or corroborated by observable market data. Generally, these investments are classified as Level 2.

When observable inputs are not available, the market standard valuation methodologies for determining the estimated fair value of certain types of securities that trade infrequently, and therefore have little or no price transparency, rely on inputs that are significant to the estimated fair value that are not observable in the market or cannot be derived principally from or corroborated by observable market data. These unobservable inputs can be based in large part on management's judgment or estimation, and cannot be supported by reference or market activity. Even though these inputs are unobservable, management believes they are consistent with what other market participants would use when pricing such securities and are considered appropriate given the circumstances. Generally, these investments are classified as Level 3.

Reserves for the company's incurred losses and loss adjustment expenses (after intercompany pooling) attributable to insured events of prior years

NOTES TO FINANCIAL STATEMENTS

reflect favorable development totaling \$2,092,863. The development can be attributed primarily to the re-estimation of unpaid losses and loss adjustment expenses in the workers' compensation, commercial multiple perils, private passenger auto liability, commercial auto liability, auto physical damage, and homeowners lines of business. The favorable development in these lines was slightly offset by losses in the other liability and products liability lines of business. The changes reflected in these lines were generally the result of recent development trends. There were not any premium adjustments made as a result of this loss and loss adjustment expense development.

B. Information about Significant Changes in Methodologies and Assumptions

There have been no significant changes in methodologies and assumptions used in calculating the liability for unpaid loss and loss adjustment expense.
