**NOTES TO FINANCIAL STATEMENTS****Note 1 – Summary of Significant Accounting Policies and Going Concern****A. Accounting Practices**

The financial Statements of Loyal American Life Insurance Company ("LALIC" or "the Company" are presented on the basis of accounting practices prescribed or permitted by the Ohio Department of Insurance.

The Ohio Department of Insurance recognizes only statutory accounting practices prescribed or permitted by the State of Ohio for determining and reporting the financial condition and results of operations of an insurance company for determining its solvency under the Ohio Insurance Law. The National Association of Insurance Commissioners' ("NAIC") Accounting Practices and Procedures manual, ("NAIC SAP") has been adopted as a component of prescribed or permitted practices by the State of Ohio.

A reconciliation of the Company's net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the State of Ohio is shown below:

**B. Use of Estimates in the Preparation of the Financial Statement**

The preparation of financial statements in conformity with NAIC SAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

**C. Accounting Policy**

Life premiums are recognized as income over the premium-paying period of the related policies. Annuity considerations are recognized as revenue when received. Health premiums are earned ratably over the terms of the related insurance. Expenses incurred in connection with acquiring new insurance business, including acquisition costs such as sales commissions, are charged to operations as incurred. The Company pays dividends to participating policyholders.

The Company uses the following accounting policies:

**(1)-(2) Basis for Short-Term Investments, Bonds and Amortization**

Investments in bonds and short-term investments are carried at amortized cost, except those in or near default that are carried at the lesser of cost or fair value. Amortization of bond premium or discount is calculated using the scientific (constant yield) interest method. Bonds containing call provisions are amortized to call date which produces the lowest asset value (yield to worst). Investments with original maturities of one year or less from the time of purchase are classified as short-term. Bonds are considered impaired and their cost basis is written down to fair value through an asset valuation reserve for credit-related losses or an interest maintenance reserve for interest-related losses, when management expects a decline in value to persist (i.e., the decline is other-than-temporary).

**(3) Basis for Common Stocks**

Common stocks are carried at fair value except for common stock of affiliates which are valued using methods described below.

**(4) Basis for Preferred Stocks**

Not Applicable

**(5) Basis for Mortgage Loans**

Not Applicable

**(6) Basis for Loan-Backed Securities and Adjustment Methodology**

Loan-backed bonds and structured securities are valued at amortized cost using the constant level yield method. Significant changes in estimated cash flows from the original purchase assumptions are accounted for generally using the retrospective adjustment method. For loan-backed and structured securities that have potential for loss of a significant portion of the original investment, significant changes in estimated cash flows from the original purchase assumptions are accounted for using the prospective method. These securities are presented on the balance sheet as bonds.

Prepayment assumptions for loan-backed securities and other structured securities were obtained from external financial data sources. These assumptions are consistent with the current interest rate and economic environment.

When the Company determines it does not expect to recover the amortized cost basis of loan-backed or structured securities with declines in fair value (even if it does not intend to sell and has the intent and ability to hold), the non-interest portion of the impairment loss is recognized in realized investment losses. The non-interest portion is the difference between the amortized cost basis of the loan-backed or structured security and the net present value of its expected future cash flows. Expected future cash flows are based on assumptions about the collateral attributes, including prepayment speeds, default rates and changes in value.

**NOTES TO FINANCIAL STATEMENTS****(7) Accounting Policies for Investments in Subsidiaries, Controlled and Affiliated Entities**

Investments in subsidiaries, controlled and affiliated entities are reported using the statutory equity method based on the entity's audited equity prepared using NAIC SAP in accordance with SSAP No. 97, Investments in Subsidiary, Controlled, and Affiliated Entities. These entities are presented on the balance sheet as common stock.

**(8) Accounting Policies for Investments in Joint Ventures, Partnerships and Limited Liability Entities**  
Not Applicable**(9) Accounting Policies for Derivatives**  
Not Applicable**(10) Anticipated Investment Income Used in Premium Deficiency Calculation**

The Company utilizes anticipated investment income as a factor in the premium deficiency calculation.

**(11) Management's Policies and Methodologies for Estimating Liabilities for Losses and Loss/Claim Adjustment Expenses**

Unpaid losses and loss adjustment expenses include an amount determined from individual case estimates and loss reports and an amount, based on past experience, for losses incurred but not reported. Such liabilities are necessarily based on assumptions and estimates and while management believes the amount is adequate, the ultimate liability may be in excess of or less than the amount provided. The methods for making such estimates and for establishing the resulting liability are continually reviewed and any adjustments are reflected in the period determined.

**(12) Changes in the Capitalization Policy and Predefined Thresholds from Prior Period**  
Not Applicable**(13) Method Used to Estimate Pharmaceutical Rebate Receivables**  
Not Applicable**D. Going Concern**

In accordance with SSAP No. 1, "Accounting Policies, Risks and Uncertainties, and Other Disclosures," management has made an evaluation of the Company's ability to continue as a going concern, including such factors as its current financial position, recent earnings and cash flow trends and projections, liquidity and capital requirements, readily available sources of liquidity and such other factors deemed by management to be appropriate under the circumstances. As a result of management's evaluation, no conditions, events or trends have been identified that causes substantial doubt as to the ability of the Company to continue as a going concern and, accordingly, the accompanying financial statements have been prepared on the going concern basis.

Prepayment assumptions for loan-backed securities and other structured securities were obtained from external financial data sources. These assumptions are consistent with the current interest rate and economic environment.

**(2) Securities with Recognized Other-Than-Temporary Impairment**

As of December 31, 2019, the Company had no loan-backed and structured securities with recognized other-than-temporary impairments where the Company had the intent to sell or does not have the intent and ability to retain the investment for a period of time sufficient to recover the amortized cost basis.

**(3) Recognized OTTI Securities**

As of December 31, 2019, the Company had no loan-backed and structured securities with recognized other-than-temporary impairments where the present value of cash flow expected to be collected is less than the amortized cost basis.

**(4) All impaired securities (fair value is less than cost or amortized cost) for which an other-than-temporary impairment has not been recognized in earnings as a realized loss (including securities with a recognized other-than-temporary impairment for non-interest related declines when a non-recognized interest related impairment remains):**

As of December 31, 2019 loan-backed and structured securities with a decline in fair value from amortized cost were as follows, including the length of time of such decline:

a. The aggregate amount of unrealized losses:	1. Less than 12 Months	\$
	2. 12 Months or Longer	\$ 34,965
b. The aggregate related fair value of securities with unrealized losses:	1. Less than 12 Months	\$
	2. 12 Months or Longer	\$ 681,857

**(5) Information Investor Considered in Reaching Conclusion that Impairments are Not Other-Than-Temporary**

**NOTES TO FINANCIAL STATEMENTS**

Management reviews loan-backed and structured securities with a decline in fair value from cost for impairment based on criteria that include:

- Length of time and severity of decline.
- Financial and specific near term prospects of the issuer.
- Changes in the regulatory, economic or general market environment of the issuer's industry or geographic region.
- The Company's intent to sell or the inability or lack of intent to retain the investment in the security for a period of time sufficient to recover the amortized cost.

Based on this review, management believes the unrealized depreciation on loan-backed securities to be temporary and, therefore, has not impaired these amounts.

## 2. The manner in which the Board of Directors sets forth for allocating the consolidated federal income tax:

Effective for the tax year ending in 2018, the Company became party to Cigna's Consolidated Federal Income Tax Agreement (the Agreement), which sets forth the method of allocation of Cigna's federal income taxes to its wholly-owned domestic subsidiaries subject to The Agreement. The Agreement provides for immediate reimbursement to companies with net operating losses to the extent that their losses are utilized to reduce consolidated taxable income; while those companies with current taxable income as calculated under federal separate return provisions, are liable for payments determined as if they had each filed a separate return. However, current credit is given for any foreign tax credit, operating loss, or investment tax credit carryovers actually utilized in the current consolidated return.

## G. Federal or Foreign Federal Income Tax Loss Contingencies:

## (1) The statute of limitations for the Company's consolidated income tax returns through 2015 have closed, and there are no pending examinations.

Cigna has filed amended consolidated tax returns for various years and the pending refund is subject to Internal Revenue Service (IRS) review. The IRS has examined ESI's tax returns for 2010 through 2012 for which there is a significant disputed tax matter, and currently under examination for 2013 through 2015. No material impacts are anticipated for the Company.

(2) In management's opinion the Company has adequate tax liabilities to address potential exposures involving tax positions the Company has taken that may be challenged by the IRS upon audit. These liabilities could be revised in the near term if estimates of the Company's ultimate liability change as a result of new developments or change in circumstances. No material contingent tax liability is included in the Company's current federal income tax payable. The Company does not expect a significant increase in federal contingent tax liability within the next twelve months.

When the Company, in the normal course of its regular review of such matters has determined that a material loss is reasonably possible, the matter is disclosed. contingencies that are both probable and estimable, the Company accrues the estimated loss by a charge to operations. The amount accrued represents management's best estimate of the probable loss at the time. If only a range of estimated losses can be determined, the Company accrues an amount within the range that, in management's judgment, reflects the most likely outcome. If none of the estimates within the range is a better estimate than any other amount, the Company accrues the mid-point of the range.

Management does not believe that litigation or other matters currently pending against the Company would have a material adverse effect on the Company's results of operations, financial condition or liquidity based on its current knowledge of those matters.

**Note 20 – Fair Value Measurements**

## A. Fair Value Measurements

Fair value is defined as the price at which an asset could be exchanged in an orderly transaction between market participants at the balance sheet date. The Company's financial assets have been classified based upon a hierarchy defined by SAP. The hierarchy gives the highest ranking to fair values determined using unadjusted quoted prices in active markets for identical assets and liabilities (Level 1) and the lowest ranking to fair values determined using methodologies and models with unobservable inputs (Level 3). An asset's or a liability's classification is based on the lowest level input that is significant to its measurement. For example, a financial asset or liability carried at fair value would be classified in Level 3 if unobservable inputs were significant to the instrument's fair value, even though the measurement may be derived using inputs that are both observable (Levels 1 and 2) and unobservable (Level 3).

Level 1	Inputs for instruments classified in Level 1 include unadjusted quoted prices for identical assets in active markets accessible at the measurement date. Active markets provide pricing data for trades occurring at least weekly and include exchanges and dealer markets.
Level 2	Inputs for instruments classified in Level 2 include quoted prices for similar assets in active markets, quoted prices from those willing to trade in markets that are not active, or other inputs that are market observable or can be corroborated by market data for the term of the instrument. Such other inputs include market interest rates and volatilities, spreads and yield curves. An instrument is classified in Level 2 if the Company determines that unobservable inputs are insignificant. Level 2 assets primarily include corporate bonds valued using recent trades of similar securities or pricing models that discount future cash flows at estimated market interest rates.
Level 3	Certain inputs for instruments classified in Level 3 are unobservable (supported by little or no market activity) and significant to their resulting fair value measurement. Unobservable inputs reflect the Company's best estimate of what hypothetical market participants would use to determine a transaction price for the asset or liability at the reporting date.

SSAP 100 allows the use of net asset value (NAV) as a practical expedient to fair value for investments in investment companies where there is no readily determinable fair value. There were no such investments owned by the Company for either period presented.

**B. Fair Value Reporting under SSAP 100 and Other Accounting Pronouncements**

The Company provides additional fair value information in Notes 1 and 5.

**C. Fair Value Level**

The following tables provide the fair value, carrying value, and classification in the fair value hierarchy of the Company's financial instruments as of December 31, 2019 and 2018.

Type of Financial Instrument	Aggregate Fair Value	Admitted Assets	(Level 1)	(Level 2)	(Level 3)	Net Asset Value (NAV)	Not Practicable (Carrying Value)

Contract Loans	\$	\$ 1,703	\$	\$	\$	\$	\$ 1,703

The following valuation methodologies and significant assumptions are used by the Company to determine fair value for each instrument.

**Bonds**

The Company estimates fair values using prices from third parties or internal pricing methods. Fair value estimates received from third-party pricing services are based on reported trade activity and quoted market prices when available, and other market information that a market participant may use to estimate fair value. Such other inputs include market interest rates and volatilities, spreads, and yield curves. The internal pricing methods are performed by the Company's investment professionals and generally involve using discounted cash flow analyses, incorporating current market inputs for similar financial instruments with comparable terms and credit quality, as well as other qualitative factors. In instances where there is little or no market activity for the same or similar instruments, the fair value is estimated using methods, models, and assumptions that the Company believes a hypothetical market participant would use to determine a current transaction price.

**Short-Term Investments, Cash Equivalents, and Cash**

Short-term investments, cash equivalents, and cash are carried at cost which approximates fair value. Short-term investments and cash equivalents are classified in Level 2 and cash is classified in Level 1.

**D. Not Practicable to Estimate Fair Value****Contract Loans**

Fair values are based on quoted market prices when available. When market prices are not available, fair value is generally estimated using discounted cash flow analyses, incorporating current market inputs for similar financial instruments with comparable terms and credit quality. In instances where there is little or no market activity for the same or similar instruments, the Company estimates fair value using methods, models and assumptions that the Company believes a hypothetical market participant would use to determine a current transaction price. These valuation techniques involve some level of estimation and judgment by the Company which become significant with increasingly complex instruments or pricing models. Where appropriate, adjustments are included to reflect the risk inherent in a particular methodology, model or input used.
