## NOTES TO FINANCIAL STATEMENTS

## 1. Summary of Significant Accounting Policies and Going Concern

## A. Accounting Practices

The financial statements of Integrity Life Insurance Company (the Company) are presented on the basis of accounting practices prescribed or permitted by the Ohio Department of Insurance (the Department).

The Department recognizes only statutory accounting practices prescribed or permitted by the state of Ohio for determining and reporting the financial condition and results of operations of an insurance company. The National Association of Insurance Commissioners' (NAIC) Accounting Practices and Procedures manual (NAIC SAP) has been adopted as a component of prescribed or permitted practices by the state of Ohio. The Department has the right to permit other specific practices that deviate from prescribed practices. There are no differences between the Company's net income and capital and surplus following NAIC SAP or practices prescribed and permitted by the state of Ohio.

A reconciliation of the Company's net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the State of Ohio is shown below:

## B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with statutory accounting practices requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

## C. Accounting Policy

Life premiums are recognized as income over the premium-paying period of the related policies. Annuity considerations are recognized as revenue when received. Amounts received on deposit-type contracts are entered directly as a liability when received. Expenses incurred in connection with acquiring new insurance business, including acquisition costs such as sales commissions, are charged to operations as incurred.

In addition, the Company uses the following accounting policies:

- (1) Short-term investments are stated at amortized cost.
- (2) Bonds not backed by other loans are stated at either amortized cost using the interest method or the lower of amortized cost or fair market value.
- (3) Unaffiliated common stocks are stated at fair market value, except for Federal Home Loan Bank (FHLB) stock, which is carried at cost, adjusted for stock dividends, and is restricted. Common stocks of non-life subsidiaries and non-life affiliates in which the Company has an interest of 10% or more are carried on the GAAP equity basis.
- (4) Preferred stocks are stated at either cost or the lower of cost or fair market value.
- (5) Mortgage loans on real estate are stated at the aggregate unpaid principal balance plus unamortized premium less unaccrued discount.
- (6) Loan-backed and structured securities are stated at amortized cost, except those with an initial NAIC designation of 6, which are stated at the lower of amortized cost or fair value. Loan-backed and structured securities with an initial NAIC designation of 6 could have a final designation of 1 through 5 as determined by the SVO financial modeling process. The retrospective adjustment method is used to determine amortized cost for all loan-backed and structured securities, except for those which an other-than-temporary impairment has been recognized, which use the prospective adjustment method to determine amortized cost.
- (7) The Company owns 100% of the capital stock of National Integrity, which is stated at statutory equity.

# ANNUAL STATEMENT FOR THE YEAR 2019 OF THE Integrity Life Insurance Company

(8) The Company has investments in joint ventures organized as limited partnerships or limited liability companies. The Company carries these interests based on the underlying GAAP equity of the investee. Undistributed earnings allocated to the Company are reported in the change in net unrealized capital gains or losses. Distributions from earnings of the entity are reported as net investment income when received. Because of the indirect nature of these investments, there is an inherent reduction in transparency and liquidity and increased complexity in valuing the underlying investments. As a result, these investments are actively managed by Company management via detailed evaluation of the investment performance relative to risk.

(9) The Company utilizes customized call options to hedge the S&P 500 and Goldman Sachs Multi-Asset Class index exposure embedded in equity indexed annuities. The Company purchases and writes call options to correlate with changes in the annuity features due to movements in the S&P 500 and the Goldman Sachs Multi-Asset Class index. At the beginning of these contracts, a premium is either paid or received for transferring the related risk. The Company retains basis risk and risk associated with actual versus expected assumptions for mortality and lapse rates. The call options are not designated as a hedge for accounting purposes and are carried at fair value on the balance sheet with changes in fair value recorded in surplus. The related gains and losses from terminations or expirations are recorded in realized capital gains and losses.

(10) Anticipated investment income is not a factor in calculating deficiency reserves.

(11) The Company had no accident and health contracts on its books during the statement periods.

(12) The Company does not own capitalizable assets. Therefore, the Company does not have a capitalization policy.

(13) The Company has no pharmaceutical rebate receivables on its books during the statement periods.

(14) The Company monitors investments to determine if there has been an other-than-temporary decline in fair value. Factors management considers for each identified security include the following:

- the length of time and the extent to which the fair value is below the book/adjusted carry value;
- the financial condition and near term prospects of the issuer, including specific events that may affect its operations;
- for equity securities and debt securities with credit related declines in fair value, the Company's intent and ability to hold the security long enough for it to recover its value to book/adjusted carry value;
- for debt securities with interest related declines in fair value, the Company's intent to sell the security before recovery of its book/adjusted carry value;
- for loan-backed securities, the Company's intent and ability to hold the security long enough for it to recover its value to book/adjusted carry value;
- for loan-backed securities, the Company's intent to sell the security before recovery of its book/adjusted carry value.

If the decline is judged to be other-than-temporary, an impairment charge is recorded as a net realized capital loss in the period the determination is made.

## D. Going Concern. Management has not raised any doubts about the entity's ability to continue as a going concern.

### 2. Accounting Changes and Correction of Errors

Effective January 1, 2019, the Company changed its deferred tax assets admission calculation related to clarification updates to Statement of Statutory Accounting Principles 101 - Income Taxes, Exhibit A - Implementation Question and Answers, in the Accounting Practices & Procedures Manual. The Company has recorded an \$11.5 million increase to surplus as a result of the change in application of the admission criteria through the Cumulative Effect of Changes in Accounting Principles on the Summary of Operations.

The Company did not have any accounting changes in 2018.

B. Debt Restructuring. None.

C. Reverse Mortgages. None.

D. Loan-Backed Securities

(1) Prepayment assumptions are derived from Bloomberg and broker dealer prepayment models or from empirical data.

(2) The Company had no other-than-temporary impairments on loan-backed and structured securities for the year ended December 31, 2019, due to the intent to sell the security or the inability or lack of intent to retain the investment in the security for a period of time sufficient to recover the amortized cost basis of the security.

(3) The following is a list of each loan-backed and structured security with a recognized other-than-temporary impairment, for the year ended December 31, 2019, as the present value of future cash flows expected to be collected is less than the amortized cost basis of the securities:

1 CUSIP	2 Book/Adjusted Carrying Value Amortized Cost Before Current Period OTTI	3 Present Value of Projected Cash Flows	4 Recognized Other-Than-Temporary Impairment	5 Amortized Cost After Other-Than-Temporary Impairment	6 Fair Value at time of OTTI	7 Date of Financial Statement Where Reported

Total	XXX	XXX	605,681	XXX	XXX	XXX

(4) The following is an aggregate total of all impaired loan-backed securities (fair value is less than cost or amortized cost) for which an other-than-temporary impairment has not been recognized in earnings as a realized loss, including securities with a recognized other-than-temporary impairment for non-interest related declines when a non-recognized interest related impairment remains as of December 31, 2019:

a. The aggregate amount of unrealized losses:

1. Less than 12 Months	\$ 1,254,648
2. 12 Months or Longer	\$ 1,408,168

b. The aggregate related fair value of securities with unrealized losses:

1. Less than 12 Months	\$ 244,589,267
2. 12 Months or Longer	\$ 130,038,851

(5) See Note 1C (14) for the factors management considers when evaluating for an other-than-temporary decline in fair value.

## E. Dollar Repurchase Agreements and/or Securities Lending Transactions

At December 31, 2019, the Company has loaned \$149.4 million and \$24.3 million (fair value) in the general and separate account, respectively, of various debt securities, preferred stocks and common stocks as part of a securities lending program administered by Deutsche Bank. At December 31, 2018, the Company had loaned \$147.8 million and \$33.1 million (fair value) in the general and separate account, respectively, of various debt securities, preferred stocks and common stocks as part of a securities lending program administered by Deutsche Bank. The Company maintains effective control over all loaned securities and, therefore, continues to report such securities as invested assets in the balance sheets. There is no difference in the policy and procedures for the separate account.

Collateral for separate account securities lent is held in the general account with a corresponding payable and receivable between the general and separate accounts. The corresponding payable and receivable is included in the due to/from general account/separate account line on the balance sheets and was \$24.8 million and \$33.9 million at December 31, 2019 and 2018, respectively.

(1) The Company requires at the initial transaction that the fair value of the cash collateral received must be equal to 102% of the fair value of the loaned securities. The Company monitors the ratio of the fair value of the collateral to loaned securities to ensure it does not fall below 100%. If the fair value of the collateral falls below 100% of the fair value of the securities loaned, the Company non-admits that portion of the loaned security. At December 31, 2019 and 2018, the Company did not non-admit any portion of the loaned securities.

(2) Not Applicable.

(3) Collateral Received

b. The fair value of that collateral and of the portion of that collateral that it has sold or repledged is \$177.0 million.

c. The Company receives cash collateral in an amount in excess of the fair value of the securities lent. The Company reinvests the cash collateral primarily in investment-grade debt securities and cash equivalents.

(4) The Company reports all collateral on the balance sheet with an offsetting liability recognized for the obligation to return the collateral. Collateral for the securities lending program is either managed by an affiliated agent of the Company or is managed by Deutsche Bank, an unaffiliated agent. Collateral managed by an affiliated agent is invested primarily in investment-grade debt securities and cash equivalents and is included in the applicable amount on the balance sheet because the funds are available for the general use of the Company. Collateral managed by an unaffiliated agent is invested in cash equivalents and is included in securities lending reinvested collateral assets on the balance sheet at December 31, 2019 and 2018.

A. Due and accrued income is excluded from surplus on the following bases:

All investment income due and accrued with amounts that are over 90 days past due with the exception of mortgage loans in default.

Due and accrued income is excluded from investment income on mortgage loans which are in foreclosure, delinquent more than one year or where collection of interest is uncertain.

B. The total amount excluded was \$0 for bond and \$0 for mortgage loans.

**8. Derivative Instruments**

The Company has entered into call options to hedge the S&P 500 and Goldman Sachs Multi-Asset Class index. The discussion of the accounting policies, risks, and objectives are in Note 1C. The net gain recognized in unrealized gains and losses during the reporting period related to the call options was \$37,307,192. The net gain recognized in net income within realized gains and losses during the reporting period related to the call options was \$26,112,014. The Company has entered into a collateral agreement with the counterparty whereby under certain conditions the counterparty is required to post assets on the Company's behalf. The posted amount is equal to the difference between the net positive fair value of the option and the agreed upon thresholds that are based on the credit rating of the counterparty. Inversely, if the net fair value of the option is negative, then the Company may be required to post assets instead using similar thresholds. At December 31, 2019, \$80,490,000 cash collateral has been posted to the Company.

F. The Company's federal income tax return is consolidated with the following entities:

The Western and Southern Life Insurance Company  
 Western & Southern Mutual Holding Company  
 Western & Southern Financial Group, Inc.  
 Western-Southern Life Assurance Company and Subsidiaries  
 Columbus Life Insurance Company  
 Integrity Life Insurance Company and Subsidiary  
 The Lafayette Life Insurance Company and Subsidiary  
 Western-Southern Agency, Inc.  
 Eagle Realty Investments, Inc.  
 Fort Washington Investment Advisors, Inc.

The Western and Southern Life Insurance Company (Western and Southern), parent of the Company, files a consolidated income tax return with its eligible subsidiaries, including the Company. The provision for federal income taxes is allocated to the Company using a separate return method based upon a written tax sharing agreement. Under the agreement, the benefits from losses of subsidiaries are retained by the subsidiary companies. The Western and Southern Life Insurance Company pays all federal income taxes due for all members in the consolidated return. The Western and Southern Life Insurance Company then immediately charges or reimburses, as the case may be, these members an amount consistent with the method described in the tax sharing agreement. At December 31, 2019, the Company has a receivable/(payable) of (\$5,588,504).

G. SSAP No. 5R, Liabilities, Contingencies and Impairments of Assets. As of December 31, 2019, the Company had a liability for federal tax loss contingencies of \$799,455. An estimate of the amount of any increase in the Company's liability related to any federal tax loss contingencies during the twelve month period ending December 31, 2019 cannot be made.

H. Repatriation Transition Tax (RTT) - Not Applicable

I. Alternative Minimum Tax (AMT) Credit - Not Applicable

J. On December 22, 2017, the Tax Cuts and Jobs Act (the Tax Act) was enacted, significantly changing the US income tax law. Among the provisions of the Tax Act were the establishment of a flat corporate income tax rate of 21%, a general repeal of net operating loss carrybacks and a reduction in the maximum deduction for net operating loss carryforwards arising in tax years beginning after 2017, and the elimination or reduction of certain deductions, exclusions and credits. At December 31, 2018, the Company completed its accounting for all of the enactment-date income tax effects of the Tax Act.

(3) The Company's policy is to recognize transfers in and transfers out of levels at the beginning of each quarterly reporting period.

(4) The derivatives in Level 3 consist of options on the Goldman Sachs Multi-Asset Class index and are valued using a valuation model and inputs from outside sources. The models include the Black-Scholes-Merton model for point to point options, spreads and average (SPAV) algorithm model for monthly average options and a Monte Carlo model monthly cap (cliquet) options. The SPAV model is provided by Financial Engineering Associates of Berkley, California.

The assumptions used to determine the fair value of derivatives in Level 3 are derived from outside sources. Bloomberg Investment Services supplies the S&P Index level, the dividend yield and the London Interbank Offering (interest) Rates (LIBOR). Investment banks supply estimates of the implied volatility surface. Other than interpolation of the interest rates and implied volatility rates all inputs are provided by the outside sources.

Derivative instruments included in Level 2 consist of stock warrants and options. The fair values of these instruments have been determined through the use of third-party pricing services utilizing market observable inputs.

Assets held in Level 2 of the separate accounts carried at fair value primarily include stock warrants. The fair values of these assets have been determined using the same aforementioned methodologies in the general account for stock warrants.

The following discussion describes the valuation methodologies utilized by the Company for assets and liabilities measured or disclosed at fair value. Fair value estimates are made at a specific point in time, based on available market information and judgments about the financial instrument, including discount rates, estimates of timing, amount of expected future cash flows and the credit standing of the issuer. Such estimates do not consider the tax impact of the realization of unrealized gains or losses. For Level 3 investments, the fair value estimates cannot be substantiated by comparison to independent markets. In addition, the disclosed fair value may not be realized in the immediate settlement of the financial instrument. As described below, certain fair values are determined through the use of third-party pricing services. Management does not adjust prices received from third-parties; however, we do analyze the third-party pricing services' valuation methodologies and related inputs and perform additional evaluation to determine the appropriate level within the fair value hierarchy. Care should be exercised in deriving conclusions about the Company's business, its value or financial position based on the fair value information of financial instruments presented below.

### *Debt Securities, Surplus Notes, and Equity Securities*

The fair values of actively traded debt securities, asset/mortgage-backed securities, and surplus notes have been determined through the use of third-party pricing services utilizing market observable inputs. Less liquid private placement securities trading in less liquid or illiquid markets with limited or no pricing information are valued using either broker quotes or by discounting the expected cash flows using current market-consistent rates applicable to the yield, credit quality and maturity of each security.

The fair values of actively traded equity securities and exchange traded funds (including exchange traded funds with debt like characteristics) have been determined utilizing publicly quoted prices obtained from third-party pricing services. The fair values of certain equity securities for which no publicly quoted prices are available have been determined through the use of third-party pricing services utilizing market observable inputs. Actively traded mutual funds are valued using the net asset values of the funds. The fair value of preferred stock included in Level 3 has been determined by discounting the expected cash flows using current market-consistent rates applicable to the yield. For investments utilizing NAV, see Note 20E for a description.

### *Mortgage Loans*

The fair values for mortgage loans, consisting principally of commercial real estate loans, are estimated using discounted cash flow analyses, using interest rates currently being offered for similar loans collateralized by properties with similar investment risk. The fair values for mortgage loans in default are established at the lower of the fair value of the underlying collateral less costs to sell or the carrying amount of the loan.

### *Cash, Cash Equivalents and Short-Term Investments*

The fair values of cash, cash equivalents and short-term investments are based on quoted market prices.

### *Derivative Instruments*

The fair values of free-standing derivative instruments, primarily call options, are determined through the use of third-party pricing services utilizing market observable inputs or valuation models incorporating significant unobservable inputs, including projected discounted cash flows, applicable swap curves and implied volatilities. The fair value of the stock warrants have been determined through the use of third-party pricing services utilizing market observable inputs. Derivatives included in Level 1 represent the cash deposits with brokers relating to futures. The fair value is based upon the stated amount.

### *Securities Lending Reinvested Collateral Assets*

The fair value of securities lending reinvested collateral assets are from third-party sources utilizing publicly quoted prices.

### *Assets Held in Separate Accounts*

Assets held in separate accounts include debt securities, equity securities, mutual funds, mortgage loans, and stock warrants. The fair values of these assets have been determined using the same methodologies as similar assets held in the general account.

### *Life and Annuity Reserves for Investment-type Contracts and Deposit Fund Liabilities and Fixed-Indexed Annuity Contracts*

The fair value of liabilities for investment-type contracts is based on the present value of estimated liability cash flows. Present values reflect the Company's margin for uncertainty of the timing of liability cash flows. Key assumptions to the cash flow model include the timing of policyholder withdrawals and the level of interest credited to contract balances.

## ANNUAL STATEMENT FOR THE YEAR 2019 OF THE Integrity Life Insurance Company

Fair values for insurance reserves are not required to be disclosed. However, the estimated fair values of all insurance reserves and investment contracts are taken into consideration in the Company's overall management of interest rate risk.

The fair value of liabilities for fixed indexed annuities is based on embedded derivatives that have been bifurcated from the host contract. The fair value of embedded derivatives is calculated based on actuarial and capital market assumptions reflecting the projected cash flows over the life of the contract and incorporating expected policyholder behavior. The host is adjusted for acquisition costs with revised accretion rates.

### *Cash Collateral Payable*

The payable represents the obligation to return cash collateral the Company has received relating to derivative instruments. The fair value is based upon the stated amount.

### *Securities Lending Liability*

The liability represents the Company's obligation to return collateral related to securities lending transactions. The liability is short-term in nature and therefore, the fair value of the obligation approximates the carrying amount.

### *Separate Account Liabilities*

Certain separate account liabilities are classified as investment contracts and are carried at an amount equal to the related separate account assets. Carrying value is a reasonable estimate of the fair value as it represents the exit value as evidenced by withdrawal transactions between contract holders and the Company.

- D. Not applicable.
- E. Assets that use a net asset value (NAV) as a practical expedient consists of an investment in a business development corporation as defined by the Investment Company Act of 1940. The investment can be sold or transferred with prior consent from the corporation. The NAV for this investment is \$15.00. The Company does not intend to sell any investments utilizing NAV.

- A. Extraordinary Items. None.
- B. Troubled Debt Restructuring. None.
- C. Other Disclosures and Unusual Items. None.
- D. Business Interruption Insurance Recoveries. None.
- E. State Transferable Tax Credits. None.
- F. Subprime Mortgage Related Risk Exposure

The Company does not have any direct investments in subprime mortgage loans. The Company does not have any equity investments in subsidiary, controlled or affiliated entities with significant subprime mortgage related risk exposure. This disclosure does not include an evaluation of mortgage-backed debt securities commonly referred to as Alt A because these debt securities do not generally share all characteristics of subprime mortgage related risk.

The Company invests directly in certain debt securities which are considered to have subprime mortgage related risk. The Company considers the following general characteristics typical of its debt securities with subprime mortgage exposure:

- Underlying borrowers with low credit ratings (FICO score generally lower than 670);
- Underlying loans with interest rates above rates available to prime borrowers;
- Underlying loans with generally higher initial loan-to-value ratios;
- Underlying loans with generally higher concentration of second liens;
- Underlying loans with generally higher concentration of manufactured housing;
- Securities with generally higher spread between collateral interest received and interest payments to investors;
- Securities with generally higher level of overcollateralization.

Investments in debt securities with subprime mortgage exposure, similar to other types of investments, can subject an investor to unrealized losses due to changing interest rates or general credit spread widening. Similarly, an investor is exposed to realized losses if actual cash flow of the underlying mortgages is worse than expected due to higher defaults which can result in principal loss for the investor.

In order to manage subprime mortgage related risk the Company uses proprietary risk models to project probability of default and recoveries of underlying collateral, proprietary surveillance systems to monitor credit performance, exposure analysis by risk category and maintenance of a watchlist for higher risk investments.

- (2) Have any policies issued by the company been reinsured with a company chartered in a country other than the United States (excluding U.S. Branches of such companies) that is owned in excess of 10% or controlled directly or indirectly by an insured, a beneficiary, a creditor or an insured or any other person not primarily engaged in the insurance business? Yes ( ) No ( X )

#### Section 2 - Ceded Reinsurance Report - Part A

- (1) Does the company have any reinsurance agreements in effect under which the reinsurer may unilaterally cancel any reinsurance for reasons other than for nonpayment of premium or other similar credits? Yes ( ) No ( X )
  - a. If yes, what is the estimated amount of the aggregate reduction in surplus of a unilateral cancellation by the reinsurer as of the date of this statement, for those agreements in which cancellation results in a net obligation of the reporting entity to the reinsurer, and for which such obligation is not presently accrued? Where necessary, the reporting entity may consider the current or anticipated experience of the business reinsured in making this estimate.

# ANNUAL STATEMENT FOR THE YEAR 2019 OF THE Integrity Life Insurance Company

b. What is the total amount of reinsurance credits taken, whether as an asset or as a reduction of liability, for these agreements in this statement?

(2) Does the reporting entity have any reinsurance agreements in effect such that the amount of losses paid or accrued through the statement date may result in a payment to the reinsurer of amounts that, in aggregate and allowing for offset of mutual credits from other reinsurance agreements with the same reinsurer, exceed the total direct premium collected under the reinsured policies? Yes ( ) No ( X )

## Section 3 - Ceded Reinsurance Report - Part B

(1) What is the estimated amount of the aggregate reduction in surplus, (for agreements other than those under which the reinsurer may unilaterally cancel for reasons other than for nonpayment of premium or other similar credits that are reflected in Section 2 above) of termination of ALL reinsurance agreements, by either party, as of the date of this statement? Where necessary, the company may consider the current of anticipated experience of the business reinsured in making this estimate. \$0

(2) Have any new agreements been executed or existing agreements amended, since January 1 of the year of this statement, to include policies or contracts that were in force or which had existing reserves established by the company as of the effective date of the agreement? Yes ( ) No ( X )

(3) If yes, what is the amount of reinsurance credits, whether an asset or a reduction of liability, taken for such new agreements or amendments?

B. The Company had no uncollectible reinsurance balances written off through income or expense during the year.

## C. Commutation of Reinsurance Reflected in Income and Expenses

In the fourth quarter of 2018, a reinsurance agreement with the Company's parent, Western & Southern Life Insurance Company (WSLIC), was recaptured with no impact to net income or surplus. The Company had entered into a modified coinsurance agreement ceding certain life and annuity risks to WSLIC on December 31, 2002. As of the date of recapture, the statutory modeo reserves totaled \$694.6 million; in accordance with SSAP 61R, the results of the recapture are presented in the Summary of Operations in line 7, Reserve adjustments on reinsurance ceded, as well as in line 8.3, Aggregate write-ins for miscellaneous income, within a line titled *Termination of reinsurance agreement - LIC*.

The preceding recapture did not impact the categories outlined in the table below.

The company has reported in its operations in the current year as a result of commutation of reinsurance with the companies listed below, amounts that are reflected as:

# ANNUAL STATEMENT FOR THE YEAR 2019 OF THE Integrity Life Insurance Company

## 35. Separate Accounts

### A. Separate Account Activity

(1) The Company utilizes separate accounts to record and account for assets and liabilities for particular lines of business and/or transactions. For the current reporting period, the Company reported assets and liabilities from the following product lines/transactions into separate accounts:

- Variable Universal Life Insurance
- Variable Annuities
- Fixed Annuities with Market Value Adjustments

In accordance with the Ohio Department of Insurance procedures for approving items within the separate accounts, the separate account classification of variable universal life insurance policies, variable annuity contracts and fixed annuity contracts with market value adjustments are supported by Ohio Revised Code §3907.15.

(2) All separate account assets are legally insulated from the general account. The legal insulation of the separate account assets prevents such assets from being generally available to satisfy claims resulting from the general account.

As of December 31, 2019 and 2018, the Company's separate account statement included legally insulated assets of \$2,158,563,224 and \$2,242,401,209, respectively. The assets legally insulated from the general accounts as of December 31, 2019 are attributed to the following products:

(1) Product/Transaction	(1) Legally Insulated Assets	(2) Separate Account Assets (Not Legally Insulated)
Variable Universal Life Insurance	7,050,610	—
Variable Annuities	832,234,393	—
Market Value Adjusted Annuities	1,319,278,221	—
<b>Total</b>	<b>2,158,563,224</b>	<b>—</b>

(3) Some liabilities under the separate account products are guaranteed by the general account. In accordance with the guarantees provided, if the investment proceeds of the separate account assets are insufficient to cover the guaranteed for the product, the policyholder proceeds will be remitted by the general account.

To compensate the general account for the risk taken, the separate accounts have paid risk charges as follows for the past five years:

a. 2019	3,764,549
b. 2018	4,151,772
c. 2017	3,240,456
d. 2016	2,364,829
e. 2015	2,245,090

The Company's general account has paid the following amounts towards separate account guarantees for the past five years:

a. 2019	158,106
b. 2018	173,434
c. 2017	108,390
d. 2016	206,156
e. 2015	234,848

(4) The Company engages in securities lending transactions within the separate account. The Company has loaned \$22,915,411 (book/adjusted carrying value) of various debt and equity securities within the separate account as part of the securities lending program administered by Deutsche Bank. The loaned securities are attributable to the Market Value Adjusted Annuity contracts. In accordance with such transactions conducted from the separate account, the Company follows the same policies and procedures as the general account.

### B. General Nature and Characteristics of Separate Account Business

The Company's guaranteed separate account consists of non-indexed, guaranteed rate options that include market value adjustments and systematic transfer options. The guaranteed rate options are sold in fixed annuity products and as investment options within the Company's variable annuity products. The guaranteed rate options and systematic transfer options carry a minimum interest guarantee based on the guarantee period selected by the policyholder. The fixed annuity products offered provide a death benefit equal to the account value, with one product offering an optional death benefit ranging from 25% to 40% of the gain in the contract. The fixed investment options offered within the Company's variable annuity products provide the death benefits listed below for variable annuities.

The Company's nonguaranteed separate accounts consist of subaccounts available through variable annuities and variable universal life insurance. The net investment experience of each subaccount is credited directly to the policyholder and can be positive or negative. The variable annuities include guaranteed minimum death benefits that vary by product and include optional death benefits available on some products. The death benefits offered by the Company include the following: account value, return of premium paid, a death benefit that is adjusted after seven years to the current account value, a death benefit that is adjusted annually to the current account value, and an additional death benefit ranging from 25% to 40% of the gain in the contract. Some variable annuities also provide living benefits, which include guaranteed accumulation amounts on a date certain, guaranteed minimum withdrawal amounts and guaranteed minimum lifetime withdrawal amounts. The death benefit under the variable universal life insurance policies may vary with the investment performance of the underlying investments in the separate accounts. The minimum guaranteed death benefit reserve is held in Exhibit 5, Life Insurance Section, of the Company's general account and annual statement.

The Company's nonguaranteed separate accounts also include a small amount of Flexible Premium Variable Life Insurance (FPVLI). The net investment experience of FPVLI sub accounts is credited directly to the policyholder and can be positive or negative.

Assets held in the separate account supporting variable annuities and variable universal life insurance are carried at fair value. Assets held in the separate account supporting market value adjusted annuities are carried at the general account basis.
