NOTES TO FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The financial statements of Western-Southern Life Assurance Company (the Company) are presented on the basis of accounting practices prescribed or permitted by the Ohio Department of Insurance (the Department).

The Department recognizes only statutory accounting practices prescribed or permitted by the state of Ohio for determining and reporting the financial condition and results of operations of an insurance company. The National Association of Insurance Commissioners' (NAIC) Accounting Practices and Procedures manual (NAIC SAP) has been adopted as a component of prescribed or permitted practices by the state of Ohio. The Department has the right to permit other specific practices that deviate from prescribed practices. There are no differences between the Company's net income and capital and surplus following NAIC SAP or practices prescribed and permitted by the state of Ohio.

A reconciliation of the Company's net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the State of Ohio is shown below:

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with statutory accounting practices requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policy

Life premiums are recognized as income over the premium-paying period of the related policies. Annuity considerations are recognized as revenue when received. Amounts received on deposit-type contracts are entered directly as a liability when received. Expenses incurred in connection with acquiring new insurance business, including acquisition costs such as sales commissions, are charged to operations as incurred.

In addition, the Company uses the following accounting policies:

- (1) Short-term investments are stated at amortized cost.
- (2) Bonds not backed by other loans are stated at either amortized cost using the interest method or the lower of amortized cost or fair market value. All SVO-Identified securities are reported at fair value. The Company has not reacquired any SVO-Identified securities during the reporting period.
- (3) Unaffiliated common stocks are stated at fair market value, except for Federal Home Loan Bank (FHLB) stock, which is carried at cost, adjusted for stock dividends, and is restricted. Common stocks of non-life subsidiaries and non-life affiliates in which the Company has an interest of 10% or more are carried on the GAAP equity basis.
- (4) Preferred stocks are stated at either cost or the lower of cost or fair market value.
- (5) Mortgage loans on real estate are stated at the aggregate unpaid principal balance plus unamortized premium less unaccrued discount.
- (6) Loan-backed and structured securities are stated at amortized cost, except those with an initial NAIC designation of 6, which are stated at the lower of amortized cost or fair value. Loan-backed and structured securities with an initial NAIC designation of 6 could have a final designation of 1 through 5 as determined by the SVO financial modeling process. The retrospective adjustment method is used to determine amortized cost for all loan-backed and structured securities, except for those which an other-than-temporary impairment has been recognized, which use the prospective adjustment method to determine amortized cost.
- (7) The Company owns 100% of the capital stock of its non-life insurance subsidiaries, which are stated at GAAP equity.

(8) The Company has investments in joint ventures organized as limited partnerships or limited liability companies. The Company carries these interests based on the underlying GAAP equity of the investee. Undistributed earnings allocated to the Company are reported in the change in net unrealized capital gains or losses. Distributions from earnings of the entity are reported as net investment income when received. Because of the indirect nature of these investments, there is an inherent reduction in transparency and liquidity and increased complexity in valuing the underlying investments. As a result, these investments are actively managed by Company management via detailed evaluation of the investment performance relative to risk.

(9) The company did not hold any investments in derivative financial instruments as of December 31, 2019.

(10) Anticipated investment income is not a factor in calculating deficiency reserves.

(11) The Company had no accident and health contracts on its books during the statement periods.

(12) The Company does not capitalize assets. Therefore, the Company does not have a capitalization policy.

(13) The Company has no pharmaceutical rebate receivables on its books during the statement periods.

(14) The Company monitors investments to determine if there has been an other-than-temporary decline in fair value. Factors management considers for each identified security include the following:

- the length of time and the extent to which the fair value is below the book/adjusted carry value;
- the financial condition and near term prospects of the issuer, including specific events that may affect its operations;
- for equity securities and debt securities with credit related declines in fair value, the Company's intent and ability to hold the security long enough for it to recover its value to book/adjusted carry value;
- for debt securities with interest related declines in fair value, the Company's intent to sell the security before recovery of its book/adjusted carry value;
- for loan-backed securities, the Company's intent and ability to hold the security long enough for it to recover its value to book/adjusted carry value;
- for loan-backed securities, the Company's intent to sell the security before recovery of its book/adjusted carry value.

If the decline is judged to be other-than-temporary, an impairment charge is recorded as a net realized capital loss in the period the determination is made.

D. Going Concern. Management has not raised any doubts about the entity's ability to continue as a going concern.

2. Accounting Changes and Correction of Errors

Effective January 1, 2019, the Company changed its deferred tax assets admission calculation related to clarification updates to Statement of Statutory Accounting Principles 101 - Income Taxes, Exhibit A - Implementation Question and Answers, in the Accounting Practices & Procedures Manual. The Company has recorded a \$6.3 million increase to surplus as a result of the change in application of the admission criteria through the Cumulative Effect of Changes in Accounting Principles on the Summary of Operations.

Effective January 1, 2018, the Company updated mortality assumptions on certain universal life reserves. This resulted in a change of statutory reserve valuation that is required to be recorded directly to surplus rather than through the Increase in Aggregate Reserves for Life and Accident and Health Contracts in the Summary of Operations. The Company has recorded a \$1.4 million decrease to surplus as a result of the change in valuation bases through the Change in Reserve on Account of Change in Valuation Basis on the Summary of Operations.

D. Loan-Backed Securities

(1) Prepayment assumptions are derived from Bloomberg and broker dealer prepayment models or from empirical data.

(2) The Company had no other-than-temporary impairments on loan-backed and structured securities for the year ended December 31, 2019, due to the intent to sell the security or the inability or lack of intent to retain the investment in the security for a period of time sufficient to recover the amortized cost basis of the security.

(3) The following is a list of each loan-backed and structured security with a recognized other-than-temporary impairment, for the year ended December 31, 2019, as the present value of future cash flows expected to be collected is less than the amortized cost basis of the securities:

1 CUSIP	2 Book/Adjusted Carrying Value Amortized Cost Before Current Period OTTI	3 Present Value of Projected Cash Flows	4 Recognized Other-Than- Temporary Impairment	5 Amortized Cost After Other- Than- Temporary Impairment	6 Fair Value at time of OTTI	7 Date of Financial Statement Where Reported

(4) The following is an aggregate total of all impaired loan-backed securities (fair value is less than cost or amortized cost) for which an other-than-temporary impairment has not been recognized in earnings as a realized loss, including securities with a recognized other-than-temporary impairment for non-interest related declines when a non-recognized interest related impairment remains as of December 31, 2019:

a. The aggregate amount of unrealized losses:	
1. Less than 12 Months	4,698,049
2. 12 Months or Longer	3,210,648
b. The aggregate related fair value of securities with unrealized losses:	
1. Less than 12 Months	648,679,985
2. 12 Months or Longer	191,465,655

(5) See Note 1C (14) for the factors management considers when evaluating for an other-than-temporary decline in fair value.

E. Dollar Repurchase Agreements and/or Securities Lending Transactions

At December 31, 2019, the Company has loaned \$315.7 million (fair value) of various debt securities, preferred stocks and common stocks as part of a securities lending program administered by Deutsche Bank. At December 31, 2018, the Company had loaned \$324.2 million (fair value) of various debt securities, preferred stocks and common stocks as part of a securities lending program administered by Deutsche Bank. The Company maintains effective control over all loaned securities and, therefore, continues to report such securities as invested assets in the balance sheets.

(1) The Company requires at the initial transaction that the fair value of the cash collateral received must be equal to 102% of the fair value of the loaned securities. The Company monitors the ratio of the fair value of the collateral to loaned securities to ensure it does not fall below 100%. If the fair value of the collateral falls below 100% of the fair value of the securities loaned, the Company non-admits that portion of the loaned security. At December 31, 2019 and 2018, the Company did not non-admit any portion of the loaned securities.

(2) Not Applicable.

(4) The Company reports all collateral on the balance sheet with an offsetting liability recognized for the obligation to return the collateral. Collateral for the securities lending program is either managed by an affiliated agent of the Company or is managed by Deutsche Bank, an unaffiliated agent. Collateral managed by an affiliated agent is invested primarily in investment-grade debt securities and cash equivalents and is included in the applicable amount on the balance sheet because the funds are available for the general use of the Company. The following discussion describes the valuation methodologies utilized by the Company for assets and liabilities measured or disclosed at fair value. Fair value estimates are made at a specific point in time, based on available market information and judgments about the financial instrument, including discount rates, estimates of timing, amount of expected future cash flows and the credit standing of the issuer. Such estimates do not consider the tax impact of the realization of unrealized gains or losses. For Level 3 investments, the fair value estimates cannot be substantiated by comparison to independent markets. In addition, the disclosed fair value may not be realized in the immediate settlement of the financial instrument. As described below, certain fair values are determined through the use of third-party pricing services. Management does not adjust prices received from third-parties; however, we do analyze the third-party pricing services' valuation methodologies and related inputs and perform additional evaluation to determine the appropriate level within the fair value hierarchy. Care should be exercised in deriving conclusions about the Company's business, its value or financial position based on the fair value information of financial instruments presented below.

Debt Securities, Surplus Notes, and Equity Securities

The fair values of actively traded debt securities, asset/mortgage-backed securities, and surplus notes have been determined through the use of third-party pricing services utilizing market observable inputs. Less liquid private placement securities trading in less liquid or illiquid markets with limited or no pricing information are valued using either broker quotes or by discounting the expected cash flows using current market-consistent rates applicable to the yield, credit quality and maturity of each security.

The fair values of actively traded equity securities and exchange traded funds (including exchange traded funds with debt like characteristics) have been determined utilizing publicly quoted prices obtained from third-party pricing services. The fair values of certain equity securities for which no publicly quoted prices are available have been determined through the use of third-party pricing services utilizing market observable inputs. Actively traded mutual funds are valued using the net asset values of the funds. The fair value of preferred stock included in Level 3 has been determined by either broker quotes or by discounting the expected cash flows using current market-consistent rates applicable to the yield.

Mortgage Loans

The fair values for mortgage loans, consisting principally of commercial real estate loans, are estimated using discounted cash flow analyses, using interest rates currently being offered for similar loans collateralized by properties with similar investment risk. The fair values for mortgage loans in default are established at the lower of the fair value of the underlying collateral less costs to sell or the carrying amount of the loan.

Derivative Instruments

The fair value of the stock warrants have been determined through the use of third-party pricing services utilizing market observable inputs.

Cash, Cash Equivalents and Short-Term Investments

The fair values of cash, cash equivalents and short-term investments are based on quoted market prices.

Securities Lending Reinvested Collateral Assets

The fair value of securities lending reinvested collateral assets are from third-party sources utilizing publicly quoted prices.

Assets Held in Separate Accounts

Assets held in separate accounts include debt securities and mutual funds. The fair values of these assets have been determined using the same methodologies as similar assets held in the general account.

Life and Annuity Reserves for Investment-type Contracts and Deposit Fund Liabilities

The fair value of liabilities for investment-type contracts is based on the present value of estimated liability cash flows. Present values reflect the Company's margin for uncertainty of the timing of liability cash flows. Key assumptions to the cash flow model include the timing of policyholder withdrawals and the level of interest credited to contract balances.

Fair values for insurance reserves are not required to be disclosed. However, the estimated fair values of all insurance reserves and investment contracts are taken into consideration in the Company's overall management of interest rate risk.

Securities Lending Liability

The liability represents the Company's obligation to return collateral related to securities lending transactions. The liability is short-term in nature and therefore, the fair value of the obligation approximates the carrying amount.

Separate Account Liabilities

Certain separate account liabilities are classified as investment contracts and are carried at an amount equal to the related separate account assets. Carrying value is a reasonable estimate of the fair value as it represents the exit value as evidenced by withdrawal transactions between contract holders and the Company.

F. Subprime Mortgage Related Risk Exposure

The Company does not have any direct investments in subprime mortgage loans. The Company does not have any equity investments in subsidiary, controlled or affiliated entities with significant subprime mortgage related risk exposure. This disclosure does not include an evaluation of mortgage-backed debt securities commonly referred to as Alt A because these debt securities do not generally share all characteristics of subprime mortgage related risk.

The Company invests directly in certain debt securities which are considered to have subprime mortgage related risk. The Company considers the following general characteristics typical of its debt securities with subprime mortgage exposure:

- Underlying borrowers with low credit ratings (FICO score generally lower than 670);
- Underlying loans with interest rates above rates available to prime borrowers;
- Underlying loans with generally higher initial loan-to-value ratios;
- Underlying loans with generally higher concentration of second liens;
- Underlying loans with generally higher concentration of manufactured housing;
- Securities with generally higher spread between collateral interest received and interest payments to investors;
- Securities with generally higher level of overcollateralization.

Investments in debt securities with subprime mortgage exposure, similar to other types of investments, can subject an investor to unrealized losses due to changing interest rates or general credit spread widening. Similarly, an investor is exposed to realized losses if actual cash flow of the underlying mortgages is worse than expected due to higher defaults which can result in principal loss for the investor.

In order to manage subprime mortgage related risk the Company uses proprietary risk models to project probability of default and recoveries of underlying collateral, proprietary surveillance systems to monitor credit performance, exposure analysis by risk category and maintenance of a watchlist for higher risk investments.

The following table shows our investments in debt securities with subprime mortgage exposure based on the definition above:

(3) Direct exposure through other investments.

G. Retained Assets

(1) The Company offered retained asset accounts as an optional form of settlement for life insurance policy proceeds in 2019. The retained asset account option provided to beneficiaries was not the default method for satisfying life insurance claims in 2019, as a signature of the beneficiary authorizing the creation of such an account was required for this method of settlement.

The Company's retained asset accounts are transferred to the parent company, Western and Southern. Accounts established after 2004 are serviced by Western and Southern and accounts established prior to 2004 are serviced by an unaffiliated bank, with the assets and liabilities related to these retained assets accounts remaining on the parent company's financial statements.

ANNUAL STATEMENT FOR THE YEAR 2019 OF THE Western-Southern Life Assurance Company

The interest rate paid to retained asset account holders during 2019 was 0.5%. This rate did not change during 2019. Accountholders are not charged for routine administrative fees associated with these retained asset accounts; provided, however, that accountholders are responsible for certain fees associated with insufficient funds checks/drafts and stop-payment orders.

35. Separate Accounts

A. Separate Account Activity

(1) The Company utilizes separate accounts to record and account for assets and liabilities for particular lines of business and/or transactions. For the current reporting year, the Company reported assets and liabilities from the following product lines/transactions into a separate account:

- Variable Annuities
- Group Variable Universal Life Insurance
- Market Value Adjusted Annuities

In accordance with the Ohio Department of Insurance procedures for approving items within the separate accounts, the separate account classification of Variable Annuity contracts and Market Value Adjusted Annuity contracts are supported by Ohio Revised Code §3907.15.

(2) In accordance with the products recorded within the separate accounts, all separate account assets are considered legally insulated from the general account. The legal insulation of the separate account assets prevents such assets from being generally available to satisfy claims resulting from the general account.

As of December 31, 2019 and 2018, the Company's separate account statement included legally insulated assets of \$89,614,972 and \$67,516,977, respectively. The assets legally insulated from the general accounts as of December 31, 2019 are attributed to the following products:

(1) Product/Transaction	(1) Legally Insulated Assets	(2) Separate Account Assets (Not Legally Insulated)
Variable Annuities	18,348,733	—
Group Variable Universal Life Insurance	51,748,078	—
Market Value Adjusted Annuities	19,518,160	—
Total	89,614,971	—

(3) In accordance with the products recorded within the separate accounts, some separate account liabilities are guaranteed by the general account. In accordance with the guarantees provided, if the investment proceeds are insufficient to cover the rate of return guaranteed for the product, the policyholder proceeds will be remitted by the general account.

To compensate the general account for the risk taken, the separate accounts have paid risk charges as follows for the past five years:

a. 2019	1,679
b. 2018	1,546
c. 2017	1,881
d. 2016	1,799
e. 2015	2,416

The Company's general account has paid the following amounts towards separate account guarantees for the past five years:

a. 2019	4,166
b. 2018	310
c. 2017	—
d. 2016	—
e. 2015	—

(4) The Company does not engage in securities lending transactions within the separate accounts.

B. General Nature and Characteristics of Separate Account Business

The Company's guaranteed separate account consists of non-indexed, guaranteed rate options that include market value adjustments. The guaranteed rate options were sold in a fixed annuity product. These options carry a minimum interest guarantee based on the guarantee period selected by the policyholder. The fixed annuity product provides a death benefit equal to the account value.

The Company's nonguaranteed separate accounts consist of subaccounts available through variable annuities and group variable universal life

ANNUAL STATEMENT FOR THE YEAR 2019 OF THE Western-Southern Life Assurance Company

insurance. The net investment experience of each subaccount is credited directly to the policyholder and can be positive or negative. Variable annuities include guaranteed minimum death benefits that vary by product and include optional death benefits available on some products. The death benefits include the following: account value, return of premium paid, a death benefit that accumulates at a specified interest rate, a death benefit that is adjusted septennially to the current account value, and a death benefit that is adjusted annually to the current account value. The death benefit under the group variable universal life insurance policies may vary with the investment performance of the underlying investments in the separate accounts.

Assets held in the separate account supporting variable annuities and group variable universal life insurance are carried at fair value. Assets held in the separate account supporting market value adjusted annuities are carried at the general account basis.
