

This tab shows accessibility issues, indicating problems for older users, people with disabilities or accessibility needs. Automated testing cannot detect all accessibility issues, so should be used alongside human testing.

Level	WCAG 2	Key
A		 Priority A - accessibility users will find it impossible to use some pages
AA		 Priority AA - accessibility users will find it difficult to use some pages
AAA		 Priority AAA - accessibility users will find it somewhat difficult to use some pages

	<p>Each A element must contain text or an IMG with an ALT attribute.</p> <p>Add text to the link, or ALT text if the link contains an image. If there is no link text or the ALT text is blank, screen readers have nothing to read, so read out the URL instead.</p> <p>The TITLE attribute on the A element doesn't work in:</p> <ul style="list-style-type: none"> • WindowEyes 8.4 with IE11 (the link HREF is read instead) • VoiceOver on OSX 10.9 (the image filename is read instead) <p>https://legacy.insurance.ohio.gov/Classic/Agent/BusEntityChanges.aspx</p>	<p>WCAG 2.0 A F89 Section 508 (2017) A F89</p>	1 pages
	<p>Identify row and column headers in data tables using TH elements, and mark layout tables with role='presentation'.</p> <p>Data tables allow screen reader users to understand column and row relationships. Layout tables read cells as a series of unrelated paragraphs with no tabular structure. Without TH or ROLE, screen readers apply heuristics to decide whether a table is a layout table or data table. These heuristics vary greatly between screen readers, and are affected by browser being used, window size, and font size (so the outcome is very unpredictable without TH or ROLE). If a data table has headers marked up using TD, then change these to TH. If a data table has no headers, add TH elements describing each row and/or column. If the table is only used for layout add role='presentation' to the TABLE element.</p> <p>Impact on users:</p> <ul style="list-style-type: none"> • JAWS Reading: Treats tables without TH and ROLE as layout tables if the table contains cells above or below certain pixel sizes. This measurement is 	<p>WCAG 2.0 A F91 Section 508 (2017) A F91</p>	1 pages

 Ensure that foreground and background colors have enough contrast. Some users find it hard to read light gray text on a white background, dark gray text on a black background and white text on a red background. <ul style="list-style-type: none"> The contrast ratio should be 3.0 or more for 18 point text, or larger The contrast ratio should be 3.0 or more for 14 point bold text, or larger The contrast ratio should be 4.5 or more for all other text 	WCAG 2.0 AA 1.4.3 Section 508 (2017) AA 1.4.3	1 pages
The 159, 174, 254 foreground color to 255, 255, 255 background color contrast ratio is 2.09999990463257 with point text. https://legacy.insurance.ohio.gov/includes/style.css	Line 88	
 If you set any of the colors on the BODY or A elements you must set all of them. In HTML the color attributes are TEXT, BGCOLOR, LINK, ALINK and VLINK. In CSS the attributes are COLOR and BACKGROUND-COLOR. Some users have browser defaults set to white text on a black background, so setting one color without setting the others can result in black text on a black background. https://legacy.insurance.ohio.gov/includes/print.css	WCAG 2.0 AA F24 Section 508 (2017) AA F24	1 pages
 Use relative rather than absolute units in CSS property values. Absolute units are CM, MM, IN, PC and PT. When used with fonts PX is also considered an absolute unit, because it isn't relative the user's preferred font size. Low-vision users, and a lot of people over 50, increase the browser default font size to make text easier to read. Absolute units ignore this user choice. Relative units like EM and percentages "stretch" according to the screen size and/or user's preferred font size, and work on a large range of devices. https://legacy.insurance.ohio.gov/includes/print.css https://legacy.insurance.ohio.gov/includes/style.css	WCAG 2.0 AA 1.4.4 Section 508 (2017) AA 1.4.4	2 pages

	<p>Avoid specifying a new window as the target of a link with target="_blank".</p> <p>Displaying new windows without warning can be very confusing to non-sighted and mobile users. Some screen readers and mobile devices give very little indication a new tab or window has opened. If you cannot avoid displaying a new window, insert a warning into the link text like the following: "opens in a new window".</p> <p>https://legacy.insurance.ohio.gov/Classic/Agent/BusEntityChanges.htm</p>	WCAG 2.0 AAA F22	1 pages
	<p>Ensure that foreground and background colors have a 7:1 contrast ratio.</p> <p>Some users find it hard to read light gray text on a white background, dark gray text on a black background and white text on a red background.</p> <p>Note: The default link color in IE11 has poor contrast on a white background. Fix by specifying a:link and a:visited colors in CSS.</p> <ul style="list-style-type: none"> • The contrast ratio should be 4.5 or more for 18 point text, or larger • The contrast ratio should be 4.5 or more for 14 point bold text, or larger • The contrast ratio should be 7.0 or more for all other text <p>The 51, 122, 183 foreground color to 255, 255, 255 background color contrast ratio is 4.5.</p> <p>https://legacy.insurance.ohio.gov/includes/style.css</p>	<p>WCAG 2.0 AAA 1.4.6</p> <p>Line 520</p>	1 pages
	<p>Link uses general text like "Click Here" which doesn't explain link purpose.</p> <p>Screen reader users often tab from one link to the next. Tabbing between links labelled "click here" sounds like "Click here, tab, click here, tab, click here". Change the link text, or add an aria-label, so the link makes sense when read without the surrounding text.</p> <p>Link text: "here"</p> <p>https://legacy.insurance.ohio.gov/Classic/Agent/BusEntityChanges.htm</p>	<p>WCAG 2.0 AAA F84</p> <p>Line 757</p>	1 pages
