6. Loan-backed securities

Loan-backed and structured securities are accounted for as prescribed by Statement of Statutory Accounting Principles No. 43R, Loan-backed and Structured Securities. These securities are generally stated at amortized cost as determined by the estimated value of future cash flows. Prepayment assumptions for loan-backed and structured debt securities are obtained from available market data, broker/dealers, and/or internal estimates, and are consistent with current interest rate and economic trends. See Note 5.D.

D. Going Concern

Management continuously monitors the Company's financial results and compliance with regulatory requirements and found no reason to expect the Company to not continue as a going concern.

D. Loan-Backed Securities

1. The sources used to determine prepayment assumptions are derived from updated cash flows from widely utilized reputable industry sources. The Company's portfolio managers review the available cash flow data and prepayment assumptions and make adjustments based on current performance indicators on the underlying assets (e.g., delinquency rates, foreclosure rates, and default rates), credit support (via current levels of subordination), and historical credit ratings.
2. Intent to Sell or Inability to Hold Securities with a Recognized Other-Than-Temporary Impairment

Not Applicable
3. The Company has not recorded an other-than-temporary impairment for loan-backed and structured debt securities during the current year.
4. At the end of the reporting period, the composition of fair value and gross unrealized losses on loan-backed and structured debt securities by the length of time that individual securities have been in a continuous unrealized loss position is as follows:

a. The aggregate amount of unrealized losses:	1. Less than 12 Months	\$ 99,712
	2. 12 Months or Longer	\$
b. The aggregate related fair value of securities with unrealized losses:	1. Less than 12 Months	\$ 4,689,365
	2. 12 Months or Longer	\$

NOTES TO FINANCIAL STATEMENTS

5.	Additional information
	Under SSAP No. 43R, the Company analyzes its structured debt securities to determine if the Company intends to sell, or if it is more likely than not that the Company will be required to sell, the security prior to recovery and, if so, the Company writes down the security to its current fair market value with the entire amount of the write-down recorded as a realized loss. To the extent that it is more likely than not that the Company will hold the debt security until recovery (which could be maturity), the Company determines if any of the decline in value is due to a credit loss (i.e., where the present value of cash flows expected to be collected is lower than the amortized cost basis of the security) and, if so, the Company recognizes that portion of the impairment as a realized loss.

The Company routinely assesses the collectibility of premiums and agents' balances receivable and records a bad debt reserve for amounts exceeding the nonadmitted balance that the Company believes are uncollectible.

All legal actions relating to claims made under insurance policies are considered by the Company in establishing its loss and loss adjustment expense ("LAE") reserves. The Company also has potential exposure relating to lawsuits due to its participation in the management agreement for which it is allocated litigation expenses.

Note 20 – Fair Value Measurements

A. Inputs Used for Assets and Liabilities Measured at Fair Value

1. Fair Value Measurements by Levels 1, 2 and 3

The Company categorizes its financial instruments, based on the degree of subjectivity inherent in the method by which they are valued, into a fair value hierarchy of three levels, as follows:

Level 1 - Inputs are unadjusted, quoted prices in active markets for identical instruments at the measurement date (e.g., U.S. government obligations, which are continually priced on a daily basis, active exchange-traded equity securities, and certain short-term securities).

Level 2 - Inputs (other than quoted prices included within Level 1) that are observable for the instrument either directly or indirectly (e.g., certain corporate and municipal bonds and certain preferred stocks). This includes: (i) quoted prices for similar instruments in active markets, (ii) quoted prices for identical or similar instruments in markets that are not active, (iii) inputs other than quoted prices that are observable for the instruments, and (iv) inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3 - Inputs that are unobservable. Unobservable inputs reflect our subjective evaluation about the assumptions market participants would use in pricing the financial instrument (e.g., certain structured securities and privately held investments).

Determining the fair value of the investment portfolio is the responsibility of management. As part of the responsibility, management evaluates whether a market is distressed or inactive in determining the fair value for our portfolio. Management reviews certain market level inputs to evaluate whether sufficient activity, volume, and new issuances exist to create an active market. Based on this evaluation, management concluded that there was sufficient activity related to the sectors and securities for which we obtained valuations.

As of the reporting date, the Company did not measure and report any securities at fair value on the balance sheet. All bonds were carried at amortized cost.

2. Rollforward of Level 3 Items

Not Applicable

3. Policy on Transfers Into and Out of Level 3

At the end of each reporting period, the Company evaluates whether or not any event has occurred or circumstances have changed that would cause an instrument to be transferred into or out of Level 3.

Note 22 – Events Subsequent

Subsequent events have been considered through May 8, 2020 for the statutory statement that was available for issuance by May 15, 2020.

The Company currently expects that our operations and financial results will continue to be impacted as long as restrictions related to COVID-19 are in place, although the nature of these impacts may change over time, and the Company cannot predict the likely duration or extent of these impacts. Moreover, even after the current restrictions begin to be lifted, there remains significant uncertainty regarding the potential for and timing of any economic recovery, whether and when driving and insurance shopping patterns will return to historical patterns, and the near-term and longer-term impacts on insurance markets, small businesses, critical vendors, counterparties, and the investment markets, among many other issues and, ultimately, how the Company's businesses and financial results will be impacted during these recovery periods.

As previously announced, the Company will return to our personal auto customers, via credits or payments of 20% of their monthly premiums to customers who are policyholders on April 30 and May 31, 2020. The Company's expense ratio will continue to be adversely impacted for the bad debt reserves relating to our billing leniency efforts, such as suspending cancellations and non-renewals for non-payment and pausing collection activities, that the Company put in place to help policyholders who may be experiencing financial hardships as a result of the COVID-19 restrictions and the impact on the economy.
