No significant change.

**20. FAIR VALUE MEASUREMENTS**

The NAIC SAP defines fair value, establishes a framework for measuring fair value, and outlines the disclosure requirements related to fair value measurements. The fair value hierarchy is as follows:

*Level 1* — Quoted (unadjusted) prices for identical assets in active markets.

*Level 2* — Other observable inputs, either directly or indirectly, including:

- Quoted prices for similar assets in active markets;
- Quoted prices for identical or similar assets in nonactive markets (few transactions, limited information, noncurrent prices, high variability over time, etc.);
- Inputs other than quoted prices that are observable for the asset (interest rates, yield curves, volatilities, default rates, etc.);
- Inputs that are derived principally from or corroborated by other observable market data.

*Level 3* — Unobservable inputs that cannot be corroborated by observable market data.

The estimated fair values of bonds and cash equivalents are based on quoted market prices, where available. The Company obtains one price for each security primarily from a third-party pricing service (“pricing service”), which generally uses quoted prices or other observable inputs for the determination of fair value. The pricing service normally derives the security prices through recently reported trades for identical or similar securities, making adjustments through the reporting date based upon available observable market information. For securities not actively traded, the pricing service may use quoted market prices of comparable instruments or discounted cash flow analyses, incorporating inputs that are currently observable in the markets for similar securities. Inputs that are often used in the valuation methodologies include, but are not limited to, non-binding broker quotes, benchmark yields, credit spreads, default rates and prepayment speeds. As the Company is responsible for the determination of fair value, it performs quarterly analyses on the prices received from the pricing service to determine whether the prices are reasonable estimates of fair value. Specifically, the Company compares the prices received from the pricing service to a secondary pricing source; prices reported by its custodian, its investment consultant and third-party investment advisors. Additionally, the Company compares changes in the reported market values and returns to relevant market indices to test the reasonableness of the reported prices. The Company’s internal price verification procedures and review of fair value methodology documentation provided by independent pricing services have not historically resulted in an adjustment in the prices obtained from the pricing service.

In instances in which the inputs used to measure fair value fall into different levels of the fair value hierarchy, the fair value measurement has been determined based on the lowest-level input that is significant to the fair value measurement in its entirety. The Company’s assessment of the significance of a particular item to the fair value measurement in its entirety requires judgment, including the consideration of inputs specific to the asset or liability.

**21. OTHER ITEMS**

**COVID-19 Trends and Uncertainties**

The COVID-19 pandemic is rapidly evolving and the ultimate impact on our business, statutory basis results of operations, financial condition and cash flows is uncertain and difficult to predict. We have expanded benefit coverage in areas such as COVID-19 testing and treatment, telemedicine, and pharmacy benefits; offered additional enrollment opportunities to those who previously declined employer-sponsored offerings; extended certain premium payment terms for customers experiencing financial hardship; simplified administrative practices; and began accelerating payments to care providers, all with the aim of assisting our customers, providers and members in addressing the COVID-19 crisis. Potential economic costs, including cost of care and loss of commercial membership due to higher rates of unemployment, may initially be more than offset by temporary deferrals of elective care and increased membership in Medicaid and individual programs. Following the crisis, consumer demand for care is expected to return, resulting in potentially increased future medical costs. Depending on the pacing and intensity of the virus, as well as the duration of policies and initiatives to address COVID-19, such as stay-at-home and social distancing guidelines, the ultimate impact is uncertain.
