The financial statements of Plans' Liability Insurance Company (the Company) are presented on the basis of accounting practices prescribed or permitted by the Ohio Insurance Department.

The state of Ohio requires insurance companies domiciled in the state of Ohio to prepare their statutory financial statements in accordance with the National Association of Insurance Commissioners' (NAIC) *Accounting Practices and Procedures Manual* (NAIC SAP) subject to any deviations prescribed or permitted by the Ohio Insurance Department.

#### B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

#### C. Accounting Policy

Direct and ceded premiums are earned over the terms of the related policies and reinsurance contracts. Unearned premium reserves are established to cover the unexpired portion of premiums written. Such reserves are computed by pro rata methods. An estimate of earned but unbilled premiums is recorded as an asset/liability and is a component of unearned premiums.

Expenses incurred in connection with acquiring new insurance business are charged to operations as incurred. Expenses incurred are reduced for ceding allowances received or receivable.

Net investment income earned consists of interest less investment related expenses. Interest is recognized on an accrual basis. Net realized capital gains (losses) are recognized on a specific identification basis when securities are sold, redeemed or otherwise disposed. Realized capital losses include write-downs for impairments considered to be other than temporary.

In addition, the Company uses the following accounting policies:

1. Short-term Investments are stated at amortized cost using the interest method. Non-investment grade short-term investments are stated at the lower of amortized value or fair value.
2. Investment grade bonds not backed by other loans are stated at amortized cost using the interest method. Non-investment grade bonds with NAIC designations of 3 through 6 would be stated at the lower of amortized cost or fair value. The Company does not currently have any of these non-investment grade bonds. The Company's bond portfolio is reviewed quarterly and as a result the carrying value of a bond may be reduced to reflect changes in valuation resulting from asset impairment. The Company does not hold any mandatory convertible securities or SVO-Identified investments identified in SSAP No. 26R.
3. Common Stock is stated at fair value. The value is based on the underlying book value of Federal Home Loan Bank of Cincinnati.

20. Fair Value Measurements

SSAP 100, Fair Value Measurements, establishes a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The three levels of the fair value hierarchy are described as follows:

## NOTES TO FINANCIAL STATEMENTS

Level 1 – Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Company has the ability to access.

Level 2 – Inputs to the valuation methodology include quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in inactive markets; inputs other than quoted prices that are observable; or inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3 – Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. The Company believes its valuation methods are appropriate and consistent with other market participants. The use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

### A. Inputs used for assets measured and reported at Fair Value

#### 1. Fair Value Measurements at Reporting Date

Description for each class of asset or liability	(Level 1)	(Level 2)	(Level 3)	Net Asset Value (NAV)	Total
a. Assets at fair value

Total assets at fair value/NAV	\$ -	\$ 44,100	\$ -	\$ -	\$ 44,100

#### 2. Fair Value Measurements in Level 3 of the Fair Value Hierarchy

None

#### 3. Policy for Determining Transfers Between Levels

At the end of each reporting period, the Company evaluates whether or not any event has occurred or circumstances have changed that would cause an instrument to be transferred into or out of Level 3. During the current year, no transfers into or out of Level 3 were required.

#### 4. Inputs and valuation techniques used for level 2 and level 3

Bonds carried at fair value categorized as Level 2 were valued using a market approach. These valuations were determined to be Level 2 valuations as quoted markets prices for similar instruments in an active market were utilized.

The Company has no assets or liabilities measured at fair value in the Level 3 category.
