

AMENDED FILING EXPLANATION

We were notified by the West Virginia Offices of the Insurance Commissioner that the right side of the PDF file submitted to the NAIC was cut off. This appears to be the result of an issue in our software, which has now been corrected. Therefore, we will resubmit all P&C companies electronically on the NAIC site so the remaining data will now be visible.

Note 20 – Fair Value Measurements

A. Fair Value Measurements

(1) Fair Value Measurements at Reporting Date

Inputs Used for Assets and Liabilities Measured and Reported at Fair Value

SSAP No. 100, Fair Value Measurements, clarifies the definition of estimated fair value and establishes a hierarchy for measuring estimated fair value.

The hierarchy established by this standard consists of three levels to indicate the quality of the estimated fair value measurements as described below:

Level 1 - Quoted Prices in Active Markets for Identical Assets and Liabilities: Unadjusted quoted prices for identical assets or liabilities in active markets that are readily and regularly obtainable.

Level 2 - Significant Other Observable Inputs: Quoted prices in markets that are not active or inputs that are observable either directly or indirectly. These inputs can include quoted prices for similar but not identical assets or liabilities other than quoted prices in Level 1.

Level 3 - Significant Unobservable Inputs: Unobservable inputs that are supported by little or no market activity and are significant to the determination of estimated fair value of assets or liabilities. Unobservable inputs reflect the entity's assumptions about the assumptions that market participants would use in pricing the asset or liability.

Description for Each Type of Asset or Liability	Level 1	Level 2	Level 3	Net Asset Value (NAV)	Total
Assets at Fair Value					
Bonds	\$	\$ 127,265	\$	\$	\$ 127,265
Common Stocks, unaffiliated	\$ 9,463,880	\$	\$	\$	\$ 9,463,880
Total	\$ 9,463,880	\$ 127,265	\$	\$	\$ 9,591,145
Liabilities at Fair Value					
	\$	\$	\$	\$	\$
Total	\$	\$	\$	\$	\$

At the end of each reporting period, the Company evaluates whether or not any event has occurred or circumstances have changed that would cause an instrument to be transferred between Levels 1 and 2. This policy also applies to transfers into or out of Level 3. The Company had no transfers into or out of any of the levels during the period reported.

(2) Fair Value Measurements in (Level 3) of the Fair Value Hierarchy

(3) Policies when Transfers Between Levels are Recognized

At the end of each reporting period, the Company evaluates whether or not any event has occurred or circumstances have changed that would cause an instrument to be transferred between Levels 1 and 2. This policy also applies to transfers into or out of Level 3. The Company had no transfers into or out of any of the levels during the period reported.

NOTES TO FINANCIAL STATEMENTS

C. Fair Value Level

The following tables reflect the estimated fair values and admitted values of all admitted assets and liabilities that are financial instruments excluding those accounted for under the equity method (subsidiaries, joint ventures and ventures). The estimated fair values are categorized into the three-level fair value hierarchy as described above.

Type of Financial Instrument	Aggregate Fair Value	Admitted Assets	(Level 1)	(Level 2)	(Level 3)	Net Asset Value (NAV)	Not Practicable (Carrying Value)
Bonds	\$ 39,928,861	\$ 36,956,653	\$	\$ 39,928,861	\$	\$	\$
Common Stocks, unaffiliated	\$ 9,463,880	\$ 9,463,880	\$ 9,463,880	\$	\$	\$	\$

Bonds and Common Stocks

When available, the estimated fair values for bonds, including loan-backed and structured securities, and unaffiliated common stocks are based on quoted prices in active markets that are readily and regularly obtainable. Generally, these investments are classified in Level 1. Generally, these are the most liquid of the Company's securities holdings and valuation of these securities does not involve management's judgment.

When quoted prices in active markets are not available, the determination of estimated fair value is based on market standard valuation methodologies, giving priority to observable inputs. The significant inputs to the market standard valuation methodologies for certain types of securities with reasonable levels of price transparency are inputs that are observable in the market or can be derived principally from or corroborated by observable market data. Generally, these investments are classified as Level 2.

When observable inputs are not available, the market standard valuation methodologies for determining the estimated fair value of certain types of securities that trade infrequently, and therefore have little or no price transparency, rely on inputs that are significant to the estimated fair value that are not observable in the market or cannot be derived principally from or corroborated by observable market data. These unobservable inputs can be based in large part on management's judgment or estimation, and cannot be supported by reference or market activity. Even though these inputs are unobservable, management believes they are consistent with what other market participants would use when pricing such securities and are considered appropriate given the circumstances. Generally, these investments are classified as Level 3.

Note 21 – Other Items

A. Unusual or Infrequent Items

Due to decreased activity as a result of the COVID-19 pandemic, the Company elected to provide credits to personal auto policyholder accounts. After pooling, the impact to the Company is an incurred underwriting expense of \$45,425.

Note 22 – Events Subsequent

Subsequent events have been considered through November 14, 2020 for these statutory financial statements which are to be issued on November 15, 2020. There were no events occurring subsequent to the end of the quarter that merited recognition or disclosure in these statements.

Note 25 – Change in Incurred Losses and Loss Adjustment Expenses

NOTES TO FINANCIAL STATEMENTS

A. Change in Incurred Losses and Loss Adjustment Expenses

Reserves for the Company's incurred losses and loss adjustment expenses (after intercompany pooling) attributable to insured events of prior years reflect favorable development totaling \$1,562,889. The development can be attributed primarily to the re-estimation of unpaid losses and loss adjustment expenses in the workers' compensation, homeowners and farmowners, commercial auto, private passenger auto and auto physical damage. The unfavorable development in these lines was slightly offset by losses in the commercial multi peril, other liability and products liability lines of business. The changes reflected in these lines were generally the result of recent development trends. There were not any premium adjustments made as a result of this loss and loss adjustment expense development.

B. Information about Significant Changes in Methodologies and Assumptions

There have been no significant changes in methodologies and assumptions used in calculating the liability for unpaid loss and loss adjustment expense.
