ANNUAL STATEMENT FOR THE YEAR 2020 OF THE Root Insurance Company

NOTES TO FINANCIAL STATEMENTS

NOTE 1 - Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

Basis of Presentation - The financial statements of Root Insurance Company (“Root”, the “Company” or “RIC”) are presented on the basis of accounting practices prescribed or permitted by the Ohio Department of Insurance. The Ohio Department of Insurance recognizes only statutory accounting practices prescribed or permitted by the State of Ohio for determining and reporting the financial condition and results of operations of an insurance company, for determining its solvency under the Ohio Insurance Law. The National Association of Insurance Commissioners’ (NAIC) Accounting Practices and Procedures Manual (NAIC SAP) has been adopted as a component of prescribed or permitted practices by the state Ohio, subject to any deviations prescribed or permitted by the Ohio Department of Insurance.

There are no significant differences between Ohio prescribed practices and the NAIC SAP which affect the Company.

The following reconciliation table illustrates the Company’s net income and capital and surplus under NAIC SAP and those practices prescribed and permitted by the State of Ohio:

		SSAP #	F/S Page	F/S Line #	2020	2019

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of statutory financial statements requires management to make certain estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the statutory financial statements and the reported amounts of revenue and expense during the reporting period. Actual results could differ from those estimates.

C. Accounting Policy

Premiums are recognized as earned pro rata over the policy period. Unearned premium is established to cover the unexpired portion of premiums written. A premium deficiency is recorded when the sum of expected losses, loss adjustment expenses and maintenance costs exceed the recorded unearned premium reserve and anticipated investment income. A premium deficiency reserve is recognized by accruing an additional liability for the deficiency, with a corresponding charge to operations. The Company did not record a premium deficiency reserve in 2020 and 2019.

Acquisition costs, including commissions paid to Root Insurance Agency (“RIA”), premium taxes, and other policy initiation costs, are charged to operations as incurred. Ceding commissions received under the terms of the Company’s quota share reinsurance treaties are recorded as a reduction of underwriting expenses. If the ceding commission percentage exceeds the acquisition costs of the business ceded the excess ceding commission is recorded as a deferred liability and amortized over the period in which the related premiums are earned.

Loss and loss adjustment expense reserves include an amount determined from case-base estimates for reported claims and on estimates, based on experience and perceived trends, for unreported losses and loss expenses. These reserves have been established to cover the estimated ultimate cost to settle insured losses. The amounts are based on estimates of loss cost trends and other factors, and accordingly the ultimate liability may vary materially from such estimates. These estimates are continually reviewed by management and adjusted as necessary; with adjustments included in the period determined. As such, loss and loss adjustment expense reserves represent management’s best estimate of the ultimate liability related to reported and unreported claims.

In the ordinary course of business, the Company cedes a portion of its business written to limit the maximum net loss potential arising from large risks and catastrophes. These arrangements, known as treaties, provide for reinsurance coverage on quota share and excess of loss basis. Although the ceding of reinsurance does not discharge the Company from its primary liability to its policyholder, the insurance company that assumes the coverage assumes the related liability. Amounts recoverable from reinsurers are estimated in a manner consistent with the claim liability associated with the reinsured business. Ceded reinsurance premiums are recognized over the remaining policy period based on the reinsurance protection provided. The Company evaluates and monitors the financial condition associated with its reinsurers in order to minimize its exposure to significant losses from reinsurer insolvencies. All reinsurance contracts provide for indemnification against loss or liability relating to insurance risk and have been accounted for as reinsurance.

Cash consists of cash on deposit. Cash equivalents are short-term, highly liquid investments that mature within three months from the date of origination. Money market mutual funds are stated at fair value and other cash equivalents are principally stated at amortized cost, which approximates their fair value. Short-term investments are securities with an original maturity greater than 3 months, but less than 1 year, and are stated at amortized cost, which approximates fair value.

Bonds are valued in accordance with the valuations prescribed by the NAIC. Bonds with an NAIC designation of 1 or 2 are valued and reported at amortized cost. Bonds with an NAIC designation of 3 through 6 are carried at the lower of amortized cost or fair value, with the difference reflected in unassigned surplus.

Investment income is recognized when earned. Realized investment gains and losses are determined on the basis of specific identification. The effective interest method is used for amortization of premiums or discounts. Unrealized gains and losses, net of taxes, on investments are included in unassigned surplus.

D. Going Concern - There are no going concern issues.

(1) For fixed-rate agency mortgage-backed securities, the Company calculates prepayment speeds utilizing Mortgage Industry Advisory Corporation (MIAC) Mortgage Industry Medians (MIMs). MIMs are derived from a semi-monthly dealer-consensus survey of long-term prepayment projections. For other mortgage-backed, loan-backed, and structured securities, Clearwater utilizes prepayment assumptions from Moody’s Analytics. Moody’s applies a flat economic credit model and utilizes a vector of multiple monthly speeds as opposed to a single speed for more robust projections. In instances where Moody’s projections are not available, Clearwater uses data from Reuters, which utilizes the median prepayment speed from contributors’ models.

(3) The Company records transfers between Fair Value Levels at the end of each reporting period.

(4) Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (exit price) in an orderly transaction between market participants at the measurement date. In determining fair value, the Company primarily uses the market approach which utilizes processes and other relevant information generated by market transactions involving identical or comparable assets or liabilities. To a lesser extent, the Company also uses the income approach which uses discounted cash flows to determine fair value. When applying either approach, the Company maximizes the use of observable inputs and minimizes the use of unobservable inputs. Observable inputs reflect the assumptions market participants would use in valuing a financial instrument based on market data obtained from sources independent of the Company. Unobservable inputs reflect the Company’s estimates about the assumptions market participants would use in valuing financial assets and financial liabilities based on the best information available in the circumstances.

The Company is required to categorize its financial assets and financial liabilities carried at fair value on the statutory statements of admitted assets, liabilities and capital and surplus according to a three-level hierarchy. A level is assigned to each financial asset and financial liability based on the lowest level input that is significant to the fair value measurement in its entirety. The levels of fair value hierarchy are as follows.

Level 1 - Fair Value is based on unadjusted quoted prices for identical assets or liabilities in an active market. The types of assets and liabilities utilizing Level 1 valuations generally include money-market funds.

Level 2 - Fair value is based on significant inputs, other than quoted prices included in Level 1, that are observable in active markets for identical or similar assets and liabilities.

Level 3 - Fair value is based on at least one or more significant unobservable inputs. These inputs reflect the Company’s assumptions about the inputs market participants would use in pricing the assets or liabilities.

The fair value of the Company’s financial assets and financial liabilities has been determined using available market information as of December 31, 2020. Although the Company is not aware of any factors that would significantly affect the fair value of financial assets and financial liabilities such amounts have not been comprehensively revalued since those dates. Therefore, estimates of fair value subsequent to the valuation dates may differ significantly from the amounts presented herein. Considerable judgement is required to interpret mater data to develop the estimates of fair value. The use of different market assumption and/or estimation methodologies may have a material effect on the estimated fair value amounts.

The Company uses prices and inputs that are current as of the measurement date. In periods of market disruption, the ability to observe prices and inputs may be reduced, which could cause an asset or liability to be reclassified to a lower level.

Inputs used to measure fair value or an asset or liability may fall into different levels of the fair value hierarchy. In these situations, the Company will determine the level in which the fair value based upon the lowest level input that is significant to the determination of the fair value.

NOTE 21 Other Items

A. Unusual or Infrequent Items

In December 2019, COVID-19 was first reported in Wuhan, China and in March 2020, the World Health Organization declared a global pandemic. The global pandemic has severely impacted businesses worldwide, including within the insurance industry. We have been impacted by certain individual state bulletins that outline COVID-19 premium relief efforts, including restrictions on the ability to cancel policies for non-payment, requiring deferral of insurance premium payments for up to 60 days and restrictions on increasing policy premiums. COVID-19 has impacted and may further impact the broader economic environment, including negatively impacting unemployment levels, economic growth, the proper functioning of financial and capital markets and interest rates. As the COVID-19 pandemic continues to

develop, there is uncertainty around the severity and duration of the pandemic and the pandemic’s potential change on our business and our financial performance. Due to a significant reduction in the number of auto accidents and in an effort to fairly price our personal auto customers during the COVID-19 pandemic, the Company issued premium credits, accounted for as an immediate reduction of premium, totaling \$1.5 million to qualifying policyholders. Premium credits ranged from 0% to 10% of April and May monthly premiums and were calculated based on each policyholder’s actual reduction in driving during the program period measured using smartphone-based telematics. Most qualifying policyholders were provided an option of receiving their premium credits as a refund to their last used payment method or as a credit to their next bill.

NOTE 25 Change in Incurred Losses and Loss Adjustment Expenses

- A. Change in Incurred Losses and Loss Adjustment Expenses

Incurring losses and LAE attributable to prior accident years was an increase of \$18.6 million and an increase of \$8.8 million during 2020 and 2019, respectively. For the year ended December 31, 2020, the increase to held loss reserves of prior years was primarily related to higher than estimated reported losses resulting from frequency and severity in excess of expectations for bodily injury claims as well as higher emergence of collision claims from accident years 2019 and prior, partially due to timing of reported claims. The year ended December 31, 2020 also included development of incurred losses related to accident years 2019 and prior as a result of a change in estimate. The adjustments recorded in the year ended December 31, 2020 were necessary in order to effectuate management's best estimate for determining the estimated ultimate cost of settling claims using our knowledge and experience about past and current events and developments.

GENERAL INTERROGATORIES

PART 2 - PROPERTY AND CASUALTY INTERROGATORIES

6.1

What provision has this reporting entity made to protect itself from an excessive loss in the event of a catastrophe under a workers' compensation contract issued without limit of loss?
Not applicable

6.2

Describe the method used to estimate this reporting entity's probable maximum insurance loss, and identify the type of insured exposures comprising that probable maximum loss, the locations of concentrations of those exposures and the external resources (such as consulting firms or computer software models), if any, used in the estimation process.
The company models PML from extreme weather events for personal auto physical damage comprehensive coverage across the geographic footprint of the company, including estimates of exposure growth by region. The reinsurance broker uses the company's prospective distribution of exposures for the time period and runs both the RMS RiskLink v18 model and the AIR Touchstone V6 model to get alternate views of the PML.

6.3

What provision has this reporting entity made (such as a catastrophic reinsurance program) to protect itself from an excessive loss arising from the types and concentrations of insured exposures comprising its probable maximum property insurance loss?
The company has reinsurance agreements including quota share, excess of loss, stop-loss and catastrophe coverage.

6.4

Does the reporting entity carry catastrophe reinsurance protection for at least one reinstatement, in an amount sufficient to cover its estimated probable maximum loss attributable to a single loss event or occurrence?

Yes ☒ No ☐

6.5

If no, describe any arrangements or mechanisms employed by the reporting entity to supplement its catastrophe reinsurance program or to hedge its exposure to uninsured catastrophic loss.

7.1

Has this reporting entity reinsured any risk with any other entity under a quota share reinsurance contract that includes a provision that would limit the reinsurer's losses below the stated quota share percentage (e.g., a deductible, a loss ratio corridor, a loss ratio cap, an aggregate limit or any similar provisions)?

Yes ☒ No ☐

7.2

If yes, indicate the number of reinsurance contracts containing such provisions:

5

7.3

If yes, does the amount of reinsurance credit taken reflect the reduction in quota share coverage caused by any applicable limiting provision(s)?

Yes ☒ No ☐

8.1

Has this reporting entity reinsured any risk with any other entity and agreed to release such entity from liability, in whole or in part, from any loss that may occur on this risk, or portion thereof, reinsured?

Yes ☐ No ☒

8.2

If yes, give full information

9.1

Has the reporting entity ceded any risk under any reinsurance contract (or under multiple contracts with the same reinsurer or its affiliates) for which during the period covered by the statement: (i) it recorded a positive or negative underwriting result greater than 5% of prior year-end surplus as regards policyholders or it reported calendar year written premium ceded or year-end loss and loss expense reserves ceded greater than 5% of prior year-end surplus as regards policyholders; (ii) it accounted for that contract as reinsurance and not as a deposit; and (iii) the contract(s) contain one or more of the following features or other features that would have similar results:
(a) A contract term longer than two years and the contract is noncancellable by the reporting entity during the contract term;
(b) A limited or conditional cancellation provision under which cancellation triggers an obligation by the reporting entity, or an affiliate of the reporting entity, to enter into a new reinsurance contract with the reinsurer, or an affiliate of the reinsurer;
(c) Aggregate stop loss reinsurance coverage;
(d) A unilateral right by either party (or both parties) to commute the reinsurance contract, whether conditional or not, except for such provisions which are only triggered by a decline in the credit status of the other party;
(e) A provision permitting reporting of losses, or payment of losses, less frequently than on a quarterly basis (unless there is no activity during the period); or
(f) Payment schedule, accumulating retentions from multiple years or any features inherently designed to delay timing of the reimbursement to the ceding entity.

Yes ☒ No ☐

9.2

Has the reporting entity during the period covered by the statement ceded any risk under any reinsurance contract (or under multiple contracts with the same reinsurer or its affiliates), for which, during the period covered by the statement, it recorded a positive or negative underwriting result greater than 5% of prior year-end surplus as regards policyholders or it reported calendar year written premium ceded or year-end loss and loss expense reserves ceded greater than 5% of prior year-end surplus as regards policyholders; excluding cessions to approved pooling arrangements or to captive insurance companies that are directly or indirectly controlling, controlled by, or under common control with (i) one or more unaffiliated policyholders of the reporting entity, or (ii) an association of which one or more unaffiliated policyholders of the reporting entity is a member where:
(a) The written premium ceded to the reinsurer by the reporting entity or its affiliates represents fifty percent (50%) or more of the entire direct and assumed premium written by the reinsurer based on its most recently available financial statement; or
(b) Twenty-five percent (25%) or more of the written premium ceded to the reinsurer has been retroceded back to the reporting entity or its affiliates in a separate reinsurance contract.
