NOTES TO FINANCIAL STATEMENTS

NOTE 1 Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The financial statements of The American Insurance Company (the Company or TAIC) are presented on the basis of accounting practices prescribed or permitted by the National Association of Insurance Commissioners’ (NAIC) Accounting Practices and Procedures manual. These accounting practices and procedures have been adopted as a component of prescribed or permitted practices by the state of Ohio.

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of the financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policy

Premiums are earned over the terms of the related insurance policies and reinsurance contracts. Unearned premium reserves are established to cover the unexpired portion of the premiums written. Such reserves are computed by pro rata methods using the contract terms for direct business and are based on reports received from ceding companies for reinsurance.

Expenses incurred in connection with acquiring new insurance business, including such acquisition costs as commissions, are charged to operations as incurred. Expenses incurred are reduced for ceding allowances received or receivable.

In addition, the Company uses the following accounting policies, as applicable:

1. Short-term investments are stated at amortized cost.
2. Bonds are stated at amortized cost, except bonds rated at below investment grade, which are carried at the lower of amortized cost or market value. Amortization of bond premium or discount is calculated using the modified scientific method, which calculates the yield in the same manner as in the scientific method, and there is no effect from accrued interest on coupon dates.
3. Common stocks of unaffiliated entities are stated at fair value. Investments in common stocks of unconsolidated subsidiary, controlled, and affiliated entities are accounted for according to the market valuation or equity method as required by SSAP No. 97 Investments in Subsidiary, Controlled, and Affiliated Entities, A Replacement of SSAP No. 88.
4. The Company does not own non-redeemable preferred stocks.
5. Mortgage loans on real estate are stated at the unpaid principle balance excluding accrued interest. Prepayments of principal are recorded as a reduction in the loan balance. Prepayments of interest are recorded as a liability and recognized as interest income in the period.
6. Prepayment assumptions for loan-backed bonds and structured securities were obtained from sources within the Bloomberg system or internal estimates. The assumptions are consistent with the current interest rate and economic environment. The retrospective adjustment method is used to value all Collateralized Mortgage Obligations (CMO) and Asset Backed Securities (ABS) with significant changes in the estimated cash flows.
7. The Company carries investments in subsidiaries, controlled and affiliated companies, in which the Company has interest of 20% or more, on the equity method basis.
8. The Company has no ownership interests in joint ventures or partnerships.
9. The Company does not hold or issue any derivative financial instruments.
10. The Company anticipates investment income as a factor in the premium deficiency calculation in accordance with SSAP No. 53, Property -Casualty Contracts – Premiums.
11. NOTE 4 Discontinued Operations

A. Discontinued Operations Disposed of or Classified as Held for Sale: None

The Company made a strategic decision to exit the U.S. Agribusiness (agriculture and farm) sector within its MidCorp portfolio. The U.S. Agribusiness portfolio no longer fits within the current underwriting appetite for the MidCorp business – based largely on the portfolio's lack of scale. To best support the growth to scale needed, a significant investment would have been needed in technology, which could not be justified among other priorities. Effective February 24, 2020, an agreement has been reached to sell the renewal rights to the U.S. Agribusiness book of business to Chubb, with a transition process beginning immediately and anticipated through August 2021. Chubb will serve as a replacement rights carrier for the U.S. book of business.

Any results from discontinued operations reflect the application of the Pooling Agreement wherein FFIC will reinsure and be liable on all policies and contracts of insurance and assumed reinsurance of the Company. See Note 26.

2. The Company has no assets or liabilities carried at fair value in the level 3 category of the fair value hierarchy.

NOTES TO FINANCIAL STATEMENTS

3. The Company reviews its fair value hierarchy classifications quarterly. This review could reveal that previously observable inputs for specific assets or liabilities are no longer available or reliable. For example, if the market for a Level 1 asset becomes inactive, the Company may need to adopt a valuation technique that relies on unobservable components causing the asset to be transferred to Level 2 or Level 3. Alternatively, if the market for a Level 3 asset or liability becomes active, the Company will report a transfer out of Level 3. Transfers in or out of Level 3 are reported as of the beginning of the reporting period in which the change occurs. During 2020, there have not been any transfers of assets or liabilities from one level of the fair value hierarchy to another.
4. The Company has analyzed the valuation techniques and related inputs, evaluated its assets and liabilities reported at fair value, and determined a fair value hierarchy level based upon trading activity and the observability of market inputs consistent with SSAP 100, Fair Value Measurement. Based on the results of this evaluation and investment class analysis, each valuation was classified into Level 1, 2, or 3. An asset's or a liability's classification is based on the lowest level input that is significant to its measurement. The fair value of bonds is based primarily on quoted market prices in active markets. Based on the market data, the securities are categorized into asset class, and based on the asset class of the security, appropriate pricing applications, models, and related methodology and standard inputs are utilized to determine what a buyer in the market place would pay for the security in a current sale. When quoted prices are not readily available or in an inactive market, standard inputs used in the valuation models, listed in approximate order of priority, include, but are not limited to, benchmark yields, reported trades, municipal securities rulemaking board (MSRB) reported trades, nationally recognized municipal securities information repository (NRMSIR) material event notices, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, bids, offers, reference data, and industry and economic events. In certain cases, including private placement securities as well as certain difficult-to-price securities, internal pricing models may be used that are based on market proxies.
5. The Company does not hold any derivative assets or liabilities.

- B. Other Fair Value Disclosures: None
- C. Aggregate fair value for all financial instruments and the level within the fair value hierarchy in which the fair value measurements in their entirety fall:

FFIC is the lead insurer in an intercompany reinsurance pool. The Company participates in the intercompany pooling arrangement with several affiliated insurance entities pursuant to the Second Amended and Restated intercompany Reinsurance Agreement effective January 1, 2012 ("Pooling Agreement"). The Pooling Agreement applies to all lines of business. Under the terms of the Pooling Agreement each of the participating affiliates cedes and FFIC assumes the liabilities of the participating affiliates for all policies and contracts of insurance issued, assumed or otherwise reinsured by the participating affiliates, excluding reinsurance obligations of the affiliates to third party reinsurers, and FFIC cedes into the pool all of the liabilities for policies and contracts of insurance issued directly by FFIC. FFIC retains 100% of the pool liabilities, in accordance with its pool participation percentage, and the other participating insurers (including the Company) do not assume any portion of pool results.

NOTE 33 Asbestos/Environmental Reserves

The Company has exposures to asbestos and environmental claims primarily through Commercial Multi-peril, Products Liabilities and Other Liability policies.

Reported asbestos and environmental claims are handled by an experienced and dedicated claims unit that attempts to establish full case reserves for known claims.

The Company's method of estimating reserves starts with an outside consultant's estimates of ultimate losses, which are calculated at the individual policy-level and supplemented with additional bulk reserve components. Company actuaries then review these estimates and consider additional information and incurred loss activity since the time of those studies to establish the current carried provision. This is believed to provide the most appropriate combination of data informing the reserve selection.

A-F Results reflect application of the Pooling Agreement wherein FFIC will reinsure and be liable on all policies and contracts of insurance and assumed reinsurance of the Company. See Note 26.

GENERAL INTERROGATORIES

PART 2 - PROPERTY AND CASUALTY INTERROGATORIES

6.1

What provision has this reporting entity made to protect itself from an excessive loss in the event of a catastrophe under a workers' compensation contract issued without limit of loss?
The Company typically writes Workers' Compensation in conjunction with a package policy that includes modeled Property exposure. The insight achieved from the Property underwriting process includes the Construction, Occupancy, Protection and Exposure aspects for each account, enhancing risk selection. We also model such risks for Natural Catastrophe and Terrorism risk as part of risk selection including the potential impact from Workers' Compensation exposure. There is a stated PML limit built into the corporate authority template requiring referral. (see 6.2 below)

6.2

Describe the method used to estimate this reporting entity's probable maximum insurance loss, and identify the type of insured exposures comprising that probable maximum loss, the locations of concentrations of those exposures and the external resources (such as consulting firms or computer software models), if any, used in the estimation process.
The Company uses both deterministic and probalistic models to identify catastrophe exposure and uses the RMS software program Risklink 16 (for both Natural Catastrophe and Terrorism) in the evaluation. Catastrophe reinsurance is purchased which covers catastrophic perils in all exposed regions.

6.3

What provision has this reporting entity made (such as a catastrophic reinsurance program) to protect itself from an excessive loss arising from the types and concentrations of insured exposures comprising its probable maximum property insurance loss?
The Company is protected under catastrophe reinsurance coverage for both terrorism and natural catastrophe. The catastrophe reinsurance covers catastrophic perils in all exposed regions.
