NOTES TO FINANCIAL STATEMENTS

NOTE 1 Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The financial statements of American Mutual Share Insurance Corporation (the Company) are presented on the basis of accounting practices prescribed or permitted by the Ohio Insurance Department and in accordance with NAIC Statutory Accounting Principles (NAIC SAP). All of the Company's significant statutory accounting practices are prescribed practices.

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with NAIC SAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

In March 2020, the World Health Organization declared a global pandemic related to the outbreak of a respiratory illness caused by the coronavirus, COVID-19. Related impacts and disruptions are being experienced in the geographical areas in the which we operate, and the ultimate duration and intensity of this global health emergency is unclear. Given the dynamic nature of the emergency, its impact on the Company's operations, cash flows, and financial condition cannot be reasonably estimated at this time.

C. Accounting Policy

No significant changes for items 1, 3-8 and 10-11

2. Investments - The Company accounts for its investments in bonds in accordance with the provisions of Accounting Standards Codification ("ASC") Topic 320, Investments – Debt and Equity Securities (formerly Statement of Financial Accounting Standards ("SFAS") No. 115, Accounting for Certain Investments in Debt and Equity Securities). ASC Topic 320 requires that debt securities be classified as either held-to-maturity, trading, or available-for-sale.

Bonds consist principally of obligations issued and guaranteed by the U.S. Government or its agencies and corporate debt securities rated in one of the top three credit ratings by Moody's and/or Standard & Poor's rating agencies. Bonds are classified as held-to-maturity and are recorded at amortized cost because the Company has the ability and intent to hold such investments to maturity. The Company utilizes the level-yield method to amortize premiums and accrete discounts over the stated maturity period of the related investment and is reported in net investment income.

Common stocks include the Company's investment in its wholly owned subsidiary, Excess Share Insurance Corporation (ESI), and is carried at the value determined under the equity method of accounting, which management believes approximates market value. The estimated fair value of the investment in ESI is determined based on the Statement of Statutory Accounting Principles (SSAP) No. 97, Investments in Subsidiary, Controlled, and Affiliated Entities, A Replacement of SSAP No. 88, and, accordingly is carried at the subsidiary's underlying audited capital and surplus amounts as determined on a statutory basis. Equity in net income or loss and surplus transactions of subsidiaries are reflected directly in the Company's unassigned surplus. For GAAP reporting purposes, the Company prepares consolidated financial statements with its subsidiary.

A summary of ESI's key financial data (statutory-basis) as of March 31, 2020, and for the three months then ended, is shown below:

Statement of data:	2021
Total revenues	\$ 718,442
Income before federal income taxes	\$ 137,984
Net income	\$ 108,494
Total assets	\$ 62,219,354
Total liabilities	\$ 38,607,497

Common stocks also include 13,094 shares of Federal Home Loan Bank (FHLB) common stock with a cost, par value and carrying value of \$1,309,400 at March 31, 2021 and December 31, 2020, in order for the Company to maintain its membership in the FHLB. To maintain its membership, the Company is required to hold FHLB membership stock in an amount equal to 0.16% of the Company's admitted assets as determined under statutory accounting principles, which is adjusted annually by the FHLB. FHLB membership stock is restricted, can only be sold to the FHLB at par value, and requires a five-year notice by the Company to terminate membership and redeem the shares. The Company may borrow from the FHLB but must purchase additional shares of FHLB stock (activity stock) equal to 2% of borrowings. FHLB activity stock is redeemable at any time by the Company or by the FHLB, as the Company's FHLB borrowings are paid down and can only be sold to the FHLB. Due to the restrictions placed on transferability and the Company's determination that there is no known impairment as to the ultimate recoverability of the par value of FHLB stock, the Company's carrying value of its investment in FHLB stock is considered to approximate its fair value at March 31, 2021 and December 31, 2020.

Common stocks also include publicly-traded equity securities as permitted by Ohio Revised Code Section 3925.08 in an aggregate amount not to exceed the Company's statutory unassigned surplus as reduced by its authorized control level risk-based capital. The Company measures its investments in publicly-traded equity securities at fair value and recognizes changes in the fair value as a component of net income under GAAP. For statutory accounting, only realized gains and losses are recognized in income, while unrealized gains and losses are recognized as a change in statutory surplus. At March 31, 2021 and December 31, 2020, the unrealized gains for publicly-traded equity securities were \$1,142,771 and \$1,900,669, respectively. At March 31, 2021 the realized gain was \$54,558, realized loss was \$108,120 at December 31, 2020.

NOTES TO FINANCIAL STATEMENTS

The Company employs a systematic methodology that considers available evidence in evaluating potential other-than-temporary impairment of investments. In the event that the cost of an investment exceeds its fair value, the Company evaluates, among other factors, the magnitude and duration of the decline in fair value; the financial health of and business outlook for the issuer; changes to the debt ratings of the issuer, or specific security, by a rating agency; and the performance of the underlying assets. For debt investments, the ability and intent to hold the security, and the probability that the Company will be unable to collect all amounts due according to contractual terms of a debt security in effect at the date of acquisition is assessed. For equity securities, the Company evaluates impairment by considering a number of factors including the length of time and/or the significance of decline below cost, the Company's ability and intent to hold these securities through their anticipated recovery periods, the current financial condition of the issuer and its future business prospects, and an assessment of the ability of the security's fair value to recover back to cost in the foreseeable future. Subsequent recoveries in fair value are not recognized in earnings, but are recorded as unrealized gains in statutory surplus. Once a decline in fair value of an investment security is determined to be other than temporary, an impairment charge is recorded to net realized capital gains and losses, in the Statement of Income, and a new cost basis in the investment is established.

The Company from time to time advances funds in connection with the liquidation or merger of, or capital assistance provided to, troubled credit unions in exchange for the right to receive future repayments. The Company expects to recover these amounts through repayment from the credit unions, the collection of loans, the sale of assets or the settlement of subrogated claims against third party insurers. For any such advances, generally only loans secured by first mortgages are recorded as admitted assets in the accompanying statutory-basis financial statements, in an amount not to exceed the fair value of the underlying collateral. In addition, any unsecured advances that are collected within 90 days of year end are reported as admitted assets.

Real estate is recorded at cost less depreciation. Depreciation is computed on the straight-line basis using 25-year to 40-year lives, for buildings and improvements.

Gains or losses on investments sold are based on the specific identification method and are included in investment income. Investment purchases and sales are recorded on the trade date. Interest income is accrued when earned.

9. Reinsurance – Effective February 1, 2021, the Company and ESI (the "Companies") entered into a renewal reinsurance agreement with an unauthorized Bermuda reinsurer, wholly-owned by a US insurer and approved as a trustee reinsurer in Ohio and other states, for a two-year term through February 1, 2023 to reinsure its excess share program. The renewal agreement had substantially the same terms and conditions of the prior reinsurance agreement that expired February 1, 2021, including a single layer of aggregate reinsurance coverage of \$9,000,000, aggregate retention of \$9,000,000 with annual premiums of \$505,000, which are allocated between the Companies pro rata based on their monthly excess insurance in force.

D. Going Concern

Based upon an evaluation of relevant conditions and events, management does not have substantial doubt about the Company's ability to continue as a going concern.

B. FHLB (Federal Home Loan Bank) Agreements

(1) FHLB (Federal Home Loan Bank) Advised Line of Credit Agreement: In July 2011, the Company became a member of the Federal Home Loan Bank of Cincinnati (FHLB) and purchased \$296,500 in membership capital stock. Additional membership capital stock in the amount of \$965,200, \$9,600, \$5,500, and \$32,600 was purchased in June 2018, April 2014, 2013 and 2012, respectively, for total capital stock of \$1,309,400 (\$446,891 membership stock and \$862,509 excess stock) at March 31, 2021. In addition to the \$100,000,000 FHLB committed line, in October 2020, the FHLB approved a one-year renewal line capacity for the Company's \$200 million "advised" line of credit, which expires November 12, 2021. The interest rate on either of the FHLB lines varies depending upon the advance maturity term selected by the Company and can be either fixed or variable rate. Availability of the FHLB advised line, or a portion thereof, is contingent upon the Company maintaining sufficient pledged collateral at the FHLB consisting of investment securities and other collateral with a market value of up to approximately 97% of US Government Agency securities pledged. At March 31, 2021, the Company has approximately \$66.8 million of US Government Agency securities pledged with the FHLB. The Company can also pledge qualifying mortgage loans towards FHLB borrowings, allowing the Company to borrow approximately 75% of the outstanding qualifying mortgage loans. The Company holds no mortgage loans at March 31, 2021. The Company is required to purchase additional FHLB stock equal to 2% of any borrowed funds. The Company had no FHLB borrowings outstanding at March 31, 2021 and December 31, 2020.

NOTE 20 Fair Value Measurements

A. (1) Fair Value Measurements at Reporting Date
With regard to the Company's financial assets that are disclosed at a fair value, which is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, the Company uses various valuation approaches, including quoted market prices and discounted cash flows. The ASC and SSAP No. 100, Fair Value Measurement, establishes a hierarchy for inputs used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the most observable inputs be used when available. Observable inputs are obtained from independent sources and can be validated by a third party, whereas, unobservable inputs reflect assumptions regarding what a third party would use in pricing an asset or liability. The fair value hierarchy is broken down into three levels based on the reliability of inputs as follows:

Level 1 - Valuations based on quoted prices in active markets for identical instruments that the Company is able to access. Since valuations are based on quoted prices that are readily and regularly available in an active market, valuation of these products does not entail a significant degree of judgment.

Level 2 - Valuations based on quoted prices in active markets for instruments that are similar, or quoted prices in markets that are not active for identical or similar instruments, and model-derived valuations in which all significant inputs and significant value drivers are observable in active markets.

Level 3 - Valuations based on inputs that are unobservable and significant to the overall fair value measurement.

Reclassification of certain financial instruments may occur when observability of inputs change. There were no transfers between assets carried at fair value within Level 1 and Level 2 of the fair value heirarchy during the periods ended March 31, 2021 and December 31, 2020.

There were no purchases, sales, transfers into or transfers out of assets carried at fair value and classified within Level 3 of the fair value heirarchy during the periods ended March 31, 2021 and December 31, 2020.

NOTE 25 Change in Incurred Losses and Loss Adjustment Expenses

The company writes only one line of business, "Other" (with two products written solely to credit unions: primary share insurance and excess share insurance) and sets loss reserves on a prudent basis for potential claims events. Primary insurance claims can involve specifically identified claims events and other events incurred but not reported (IBNR). The Company also sets aside unallocated loss reserves for its primary insurance book of business so that aggregate loss reserves remain within an actuarially accepted range. Excess insurance claims events are infrequent (rare) but potentially severe and as a result, upon consultation with the Company's independent actuary, the Company provides annual loss reserve additions so that cumulative loss reserves are within an actuarially accepted range.

Although the Company does not normally charge a premium under its primary isurance program, the Company's governing Ohio statute and its primary insurance policy permit premiums to be assessed against Primary-insureds in order to ensure that the Company maintains a sufficient equity base for its insurance risk.

As a result of continuing suppressed market interest rates, the Company charged a special premium assessment in 2020 and 2019 of \$0.020 per \$100 of each Primary-insured's total shares or 2.0 basis points. The special premium assessment generated approximately \$3.4 million and \$3.1 million of revenues in 2020 and 2019, respectively.

Since the Company has no specific excess insurance loss events identified at March 31, 2021, for which a loss reserve would normally be established, all of the Company's loss reserves related to excess insurance and its unallocated primary insurance loss reserves related to excess insurance and its unallocated primary insurance loss reserves are treated as unallocated IBNR loss reserves. For purposes of Schedule P, in any given year the cumulative unallocated IBNR loss reserves held are considered to have occurred as follows: (1) 60% in current year; (2) 30% in the previous year; and (3) 10% in the second previous year and have been allocated as such in Schedule P, which is comparable to methods used by other insurance companies with infrequent claims events. Since claims events are rare (infrequent buy potentially severe), the typical year shows favorable development. A summary of the favorable loss development for the Company's single line of business ("Other") for 2020 and a reconciliation of loss provision, claims payments, prior year loss development and gross losses incurred in 2020, follows (dollars in thousands):

NOTE 30 Premium Deficiency Reserves
The Company provides deposit insurance to participating credit unions under the Company's primary and excess contracts. Under the primary insurance contract, a deposit of 1.3% of the member's year-end share balance is required. These capitalization deposits are non-interest bearing and the investment earnings therefrom are used to fund the Company's deposit insurance program in lieu of a normal premium charge. Special Premium Assessments may be charged from time to time against insured credit unions to fund claims activity during unusual times, such as in 2009 - 2013 and again in 2017, 2019 and 2020. In order to maintain the insurance fund at a regulatory acceptable primary insurance equity ratio (currently the equity ratio is 1.63% of primary insurance fund equity to primary insured shares). Even so, the deposits for the primary and excess deposit contracts are at-risk to the insured credit unions and ultimately can act as a reserve that is available to pay claims if needed. The aggregate of capitalization deposits that are available to pay claims are \$239,179,846 at March 31, 2021. Therefore the Company has determined there is not a need for a premium deficiency reserve and none has been recorded at March 31, 2021. The evaluation was completed on May 6, 2021. The Company considers investment income when evaluating the need for premium deficiency reserves.
