NOTES TO FINANCIAL STATEMENTS

Note 1 – Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The accompanying financial statements of Century Surety Company ("Company") have been completed in accordance with the National Association of Insurance Commissioners' (NAIC) Accounting Practices and Procedures Manual except to the extent that Ohio state laws and regulations differ.

The Ohio Department of Insurance recognizes only statutory accounting practices prescribed or permitted by the state of Ohio for determining and reporting the financial condition and results of operations of an insurance company, for determining its solvency under the Ohio Insurance Law. The NAIC *Accounting Practices and Procedures Manual – Effective January 1, 2001* (NAIC SAP) has been adopted as a component of prescribed or permitted practices by the state of Ohio. The state has adopted certain prescribed accounting practices that differ from those found in NAIC SAP. The Company has no such deviations as of June 30, 2021.

A reconciliation of the Company's surplus between NAIC SAP and practices prescribed and permitted by the state of Ohio is shown below.

B. Use of Estimates in the Preparation of the Financial Statement

No significant change.

C. Accounting Policy

- 1.-5., 7.-13. No significant change.
6. Loan-backed securities are stated at amortized cost. Significant changes in estimated cash flows from the original purchase assumptions are accounted for using the prospective method. Loan-backed securities with NAIC designations of 3 through 6 are stated at the lower of amortized cost or fair value.

The carrying value and final NAIC designation for non-agency residential mortgage backed securities and commercial mortgage backed securities are determined using a special two-step NAIC process. In the first step, those assigned a NAIC designation of 1 or 2 are stated at amortized cost and those assigned a 3 through 6 designation are stated at the lower of amortized cost or fair value. The NAIC designation assigned under the second step of the process is reported for those securities in Schedule D and is used in the risk-based capital calculation.

D. Going Concern

After consideration by management, there is no substantial doubt about the Company's ability to continue as a going concern.

Note 2 – Accounting Changes and Corrections of Errors

No significant changes.

Note 3 – Business Combinations and Goodwill

Not applicable.

Note 4 – Discontinued Operations

Not applicable.

Note 5 – Investments

A.-C. Not applicable.

D. Loan-Backed Securities

- (1) For fixed-rate agency mortgage-backed securities, Clearwater Analytics calculates prepayment speeds utilizing Mortgage Industry Advisory Corporation (MIAC) Mortgage Industry Medians (MIMs). MIMs are derived from a semi-monthly dealer-consensus survey of long-term prepayment projections. For other mortgage-backed, loan-backed, and structured securities, Clearwater utilizes prepayment assumptions from Moody's Analytics. Moody's applies a flat economic credit model and utilizes a vector of multiple monthly speeds as opposed to a single speed for more robust projections. In instances where Moody's projections are not available, Clearwater uses data from Reuters, which utilizes the median prepayment speed from contributors' models.
- (2) Securities where the Company has either the intent to sell or lacks the ability to retain the securities - Not applicable.
- (3) Loan-backed securities with a historical or current period other-than-temporary impairment ("OTTI"), currently held by the reporting entity where the present value of the discounted cash flows was/is less than the amortized cost basis of the securities - Not applicable.

Note 20 – Fair Value Measurements

A. Inputs Used for Assets and Liabilities Measured at Fair Value

1. Fair Value Measurements at Reporting Date

The Company has categorized its assets and liabilities that are measured at fair value into the three-level fair value hierarchy as reflected in the following table.

Level 1 - Valuations that are based on unadjusted quoted market prices in active markets for identical securities. The fair value of exchange-traded equities and mutual funds included in the Level 1 category were based on quoted prices that are readily and regularly available in an active market and are thus classified as Level 1.

Level 2 - Valuations that are based on observable inputs (other than Level 1 prices), such as quoted prices for similar assets at the measurement date; quoted prices in markets that are not active; or other inputs that are observable, either directly or indirectly. The fair value of securities included in the Level 2 category were based on market values obtained from a third-party pricing service. They were evaluated using pricing models that vary by asset class and incorporate available trade, bid and other observable market information. The third-party service monitors market indicators as well as industry and economic events. The Level 2 category includes corporate bonds, government and agency bonds, asset-backed, residential mortgage-backed and commercial mortgage-backed securities and municipal bonds.

Level 3 - Valuations that are derived from techniques in which one or more of the significant inputs are unobservable and/or involve management judgment and/or are based on non-binding broker quotes.

Description for Each Type of Asset or Liability	Level 1	Level 2	Level 3	Net Asset Value (NAV)	Total

3. Policies when Transfers Between Levels are Recognized

At the end of each reporting period, the Company evaluates whether or not any event has occurred or circumstances have changed that would cause an instrument to be transferred into or out of Level 3. During the current year, no transfers into or out of Level 3 were required.

4. Description of Valuation Techniques and Inputs Used in Fair Value Measurement

The estimated fair values of the Company's investments are based on prices provided by a third party pricing service and a third party investment manager. The prices provided by these services are based on quoted market prices, when available; non-binding broker quotes, or matrix pricing. The Company has not historically adjusted security prices.

For corporate, government and municipal bonds, the third party pricing service utilizes a pricing model with standard inputs that include benchmark yields, reported trades, issuer spreads, two-sided markets, benchmark securities, market bids / offers, and other reference data observable in the marketplace. The model uses the option adjusted spread methodology and is a multi-dimensional relational model. All bonds valued under these techniques are classified as Level 2.

For asset-backed, residential mortgage-backed and commercial mortgage-backed securities, the third party pricing service valuation methodology includes consideration of interest rate movements, new issue data, monthly remittance reports and other pertinent data that is observable in the marketplace. This information is used to determine the cash flows for each tranche and identifies the inputs to be used such as benchmark yields, prepayment assumptions and collateral performance. All asset-backed, residential mortgage-backed and commercial mortgage-backed securities valued under these methods are classified as Level 2.

For all assets where readily observable pricing methods are not available the third party investment manager will price the asset using a combination of non-binding broker / dealer quotes, benchmarking techniques, and sector specific knowledge. All assets priced by using this methodology are classified as Level 3.
